Brookside-Howard 138 kV Transmission Line Reconductoring Project
Supplemental Information
Case No. 14-0930-EL-BNR

Dear Mr. O'Dell:

This letter provides supplemental information to the Board concerning the construction access of the Brookside-Howard 138 kV Transmission Line Reconductoring Project ("Project"), Case No. 14-0930-EL-BNR. The construction access to structures 1658 and 1678 for this Project has been altered.

Construction access to structure #1678 originally called for hand climbing of the structure. After further evaluation, the structure cannot be climbed and construction access will need to be modified. The original construction access to structure #1678 was from North Main Street, west through the existing right-of-way. The new access to structure #1678 is from Ganges-Five Points Road, east through the existing right-of-way. The new access route is depicted on pages 8 and 9 of the attached documents.

Changes to the construction access for structure #1658 are being proposed to initiate more efficient construction. The original construction access to structure #1658 was off of North Olivesburg Road, to structure #1659, then continued east through the existing right-of-way to structure #1658. The new access to structure #1658 will come from Charles Road, and travel west through existing right-of-way to the structure. The new access is depicted on page 21 of the attached documents.

These changes are believed to be in compliance with the previously approved certificate. Should the Ohio Power Siting Board desire further information or discussion of this submittal, please contact me at (330) 384-5955.

Sincerely,

Jessica Thacker
Supervisor, Transmission Siting
Energy Delivery Transmission and Substation Design
FirstEnergy Service Company
