PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Sheridan Lorraine

PUCO Commissioners

Subject: No bailouts for Big Coal

Dear PUCO Commissioners,

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my money. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

AEP's request: To charge Ohio citizens \$117 million to prop up dirty, expensive coal plants is deplorable, unacceptable.

PUCO: Don't let Ohio residents get charged more for dirty air! Say NO to the Big Coal Bailout.

Sincerely,  
Michael White

I do not support Ohio's electric utilities' attempt to bail out their old coal plants on my dime. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and negatively impact public health while contributing to climate disruption. Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Hope Phillips

PUCO Commissioners

Subject: Support Ohioans, not Coal

Dear PUCO Commissioners,

It was disgusting to hear about the Ohio electric utilities' attempt to bail out their old coal plants and have users pay for their complacency. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water.

Due to Ohio's heavy reliance on coal, we have some of the worst air in the nation. It is time to start protecting our homes and families, not the last century ways of doing things.

Ohio's utilities' request to bail out coal plants that are no longer economically feasible is counter to all free market principles. It is also bad public policy that in effect amounts to a policy-mandated, special interest sponsored tax increase, costing Ohio electric customers more.

Staying in the past will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution. This is not the way to attract industry and jobs to the state, nor is holding onto the past a smart way to build a sound economic structure for the future.

Sincerely,  
Joseph Mucci

PUCO Commissioners

Subject: No bailouts for coal

Dear PUCO Commissioners,

I am writing to express my total lack of support for Ohio's electric utilities' attempt to bail out their old coal plants using taxpayer dollars. These plants are not competitive with today's market prices for electricity, and they spew toxic pollution into our air and water, hampering the health of Ohio's citizens.

I believe coal, which generates nearly 70 percent of electricity in Ohio, is known to cause major air pollution and contributes directly to climate disruption. Unfortunately, because of Ohio's heavy reliance on coal, we have some of the worst air quality in the nation. This is a disgrace to our fine and beautiful state.

I strongly believe that Ohio's utilities' request to bail out coal plants that are no longer economically feasible is bad public policy that, in addition to costing Ohio electric customers more, will prevent Ohio from reducing dangerous emissions of carbon, soot, smog and mercury pollution.

Sincerely,  
Anne Randolph
