I am writing about the request to have First Energy et al, raise consumer rates so that coal power plants can be improved and continue to function. I oppose this because I believe the time for fossil fuel extraction should cease, and we should transfer to renewable sources for energy. I request all persons to personally go to Charleston West Virginia or other places where coal is removed from the earth. Go and stand there, and witness the devastation. Breathe in the air, see the countless life forms squandered, drink the water. Chances are you will not want to drink the water. You will not want to study in the area. When there are alternate, renewable sources of energy vs coal, it makes no sense to continue the destructive use of coal. America is short changing itself...taking away the beauty for the short term purpose. Please oppose First Energy et al rate increase request. Thankyou for the opportunity to give input.
