Re: OPPOSITION COMMENT UNDER CASE # 14-1297-EL-SSO

Dear Public Utilities Commission of Ohio,

The owners and operators of the Davis-Besse nuclear plant want your Commission to continue siphoning billions from Ohio's shaky economy into their pockets, despite the plant's horrific safety record.

Structural problems have been an issue at the plant since it first opened, and every winter the freezing temperatures widen cracks in its shield wall. The Great Lakes region is home to millions of people as well as diverse wildlife—all of which are under constant threat from the Davis-Besse plant. A Chernobyl-scale disaster has already been narrowly averted there. Such a catastrophe could render the Great Lakes hostile to life for thousands of years.

Much of the blame for the plant's sorry state rests with the owners themselves. Yet rather than protect the public and voluntarily decommission Davis-Besse they are urging you to put Ohio ratepayers on the hook for billions of dollars to keep it running.

I must insist that the Public Utilities Commission call for the plant's immediate deactivation. Stand up for the safety of now and future generations of Ohio residents, and shut down Davis-Besse for good.

Sincerely,
Serenity Madrone

Subject: SHUT IT DOWN!

It's time for common sense thinking; while safe economical resources are at our disposal; this nuclear plant has served its purpose. It's hazards with expenses and its nuclear storage questions who no one has answers for or these answers have timely wasteful endings. Switching to an easy more practical futuristic method that make money, protect environment and cost less in lawyers stress and law suits...Thank You
