Re: *In the Matter of the Letter of Notification for Miami Fort Generating Station CG25
Natural Gas Pipeline Project*
Case No. 15-0094-GA-BLN

Dear Ms. McNeal:

Attached please find the newspaper notice and affidavit from the Cincinnati Enquirer and Cincinnati.com verifying publication of Duke Energy Ohio's legal notice in this case.

Please feel free to contact me should you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Dianne B. Kuhnell".

Don't undermine the couple at their wedding

Dear Carolyn: My son and his fiancée live in California and will be married there next summer. My entire family has met the fiancée and feels she is warm and friendly. We live in the Midwest and plan to attend the wedding.

My sister has three sons in grade school, and they are excited about this trip, their first to California. Also, my three nephews adore my son and are looking forward to seeing him get married.

However, my son's fiancée has informed us that only adults are invited to the wedding, and she has already informed her family of this. All of her family lives in California.

We have asked my son and his fiancée to make an exception, given the distance my family is traveling. So far, we have not heard anything more. The nephews will be attending the ceremony and not the reception, so we cannot understand what the issue is. I think my sister should bring her sons to the wedding and hope for the best. I would appreciate any advice.

-R.B.

For the love of personalized matchbooks, do not, do not, *do not* bring people to a wedding who have not been expressly included.

I realize church weddings are technically open to the public, assuming this is one, and it's not uncommon for congregations to have open invita-

tions to ceremonies. (Receptions – closed, of course.) But if you use this technicality to justify defying the couple – as in, not just the bride, don't think I didn't catch the implication of "she is warm and friendly" and "she informed us" – then you risk souring your relationship with them both, indefinitely.

And over what? The boys' excitement is heartwarming, yes, but not so sacred that it justifies undermining the very people this event is about.

Your inability to "understand what the issue is" moved my disingenuity needle a second time, too. There are many issues, the most obvious being that other parents on the guest list, the ones who cooperate and leave their kids home with (expensive) baby sitters, will be justifiably angry when your three nephews walk in.

The bride and groom will also have standing to hold it against you and your sister for setting them up to look bad in this way.

Would I have said yes to your request? Possibly. Probably. But it's no more my call than it is yours.

Something else to consider, to

make you and your sister feel better about arranging care for the nephews during the wedding: While weddings can be thrilling for kids, most bring out the bored-and-squirmies.

So please take this opportunity to be gracious, understanding, compli-

ant. The cousins can hang out some other, more appropriate time.

Email Carolyn at tellme@washpost.com, follow her on Facebook at www.facebook.com/carolyn.hax or chat with her online at noon Eastern time each Friday at www.washingtonpost.com.

NOTICE OF PROPOSED MAJOR UTILITY FACILITY

Duke Energy Ohio, Inc (Duke Energy Ohio) has proposed to construct the Miami Fort Generating Station CG25 Natural Gas Pipeline Project (Project). The proposed Project is a major utility facility and has been proposed and previously submitted to the Ohio Power Siting Board (Board) through a Letter of Notification Application submittal. The Project consists of the replacement of an existing natural gas pipeline through an agricultural field within a Duke Energy easement.

The Project consists of constructing and installing a buried 12-inch natural gas pipeline having a length of approximately 1.3 miles adjacent to Duke Energy's existing natural gas pipeline (which will be decommissioned). The Project is located in Miami Township, Hamilton County, Ohio. The general Project location is shown on the accompanying map of the area. The purpose is to provide an increased supply of gas to the Miami-Fort Generating Station for routine start-up operations for its boilers, which are being converted from fuel oil to natural gas as fuel source for start-up only.

The following public officials and agencies have been served with copies of the Application as required by Ohio Power Siting Board regulations: Mr. Greg Hartman, Hamilton County Commissioner, Mr. Chris Menzel, Hamilton County Commissioner, Mr. Todd Portune, Hamilton County Commissioner, Mr. Todd Kinskey, Hamilton County Planning & Development Director, Mr. Paul Beck, Miami Township Trustee, Mr. Dan Blanton, Miami Township Trustee, Mr. Jack Ringer, Miami Township Trustee. A copy of the application is available for public inspection at the offices of the Ohio Power Siting Board, c/o Public Utilities Commission of Ohio, 180 East Broad Street, 12th Floor, Columbus, Ohio 43215-3793, www.opsb.ohio.gov. A copy of the application has been sent to the following libraries: Miami Township Public library, 8 North Miami Street, Cleves, Ohio 45002. A Letter of Notice Application for a certificate to construct, operate, and maintain the above named gas transmission line is now pending before the Board. The Letter of Notification application for a certificate to construct, operate, and maintain the pipeline has been assigned Docket No. 15-94-GA-BLN and the docket number should be referenced in all communications about this proceeding. The board shall not grant a certificate for the construction, operation, and maintenance of a major utility facility, either as proposed or as modified by the board, unless it finds and determines all of the following:

- (1) The basis of the need for the facility if the facility is an electric transmission line or gas pipeline;
- (2) The nature of the probable environmental impact;
- (3) That the facility represents the minimum adverse environmental impact, considering the state of available technology and the nature and economics of the various alternatives, and other pertinent considerations;
- (4) In the case of an electric transmission line or generating facility, that the facility is consistent with regional plans for expansion of the electric power grid of the electric systems serving this state and interconnected utility systems and that the facility will serve the interests of electric system economy and reliability;

- (5) That the facility will comply with Chapters 3704., 3734., and 6111. of the Revised Code and all rules and standards adopted under those chapters and under sections 1501.33, 1501.34, and 4561.32 of the Revised Code. In determining whether the facility will comply with all rules and standards adopted under section 4561.32 of the Revised Code, the board shall consult with the office of aviation of the division of multi-modal planning and programs of the department of transportation under section 4561.341 of the Revised Code.
- (6) That the facility will serve the public interest, convenience, and necessity;
- (7) In addition to the provisions contained in divisions (A)(i) to (6) of this section and rules adopted under those divisions, what its impact will be on the viability as agricultural land of any land in an existing agricultural district established under Chapter 929. of the Revised Code that is located within the site and alternative site of the proposed major utility facility. Rules adopted to evaluate impact under division (A)(7) of this section shall not require the compilation, creation, submission, or production of any information, document, or other data pertaining to land not located within the site and alternative site.
- (8) That the facility incorporates maximum feasible water conservation practices as determined by the board, considering available technology and the nature and economics of the various alternatives.

Section 4906.07 Public Hearing on Application

(A) Upon the receipt of an application complying with section 4906.06 of the Revised Code, the power siting board shall promptly fix a date for a public hearing thereon, not less than sixty nor more than ninety days after such receipt, and shall conclude the proceeding as expeditiously as practicable.

(B) On an application for an amendment of a certificate, the board shall hold a hearing in the same manner as a hearing is held on an application for a certificate if the proposed change in the facility would result in any material increase in any environmental impact of the facility or a substantial change in the location of all or a portion of such facility other than as provided in the alternates set forth in the application.

(C) The chairperson of the power siting board shall cause each application filed with the board to be investigated and shall, not less than fifteen days prior to the date any application is set for hearing submit a written report to the board and to the applicant. A copy of such report shall be made available to any person upon request. Such report shall set forth the nature of the investigation, and shall contain recommended findings with regard to division

(A) of section 4906.10 of the Revised Code and shall become part of the record and served upon all parties to the proceeding.

Section 4906.08 Parties, testimony

(C) The board shall accept written or oral testimony from any person at the public hearing, but the right to call and examine witnesses shall be reserved for parties. However, the board may adopt rules to exclude repetitive, immaterial, or irrelevant testimony.

Intervention

Motions to intervene and/or comments must be filed with the Board within 10 days of the date of publication of this notice. They should be addressed to the Ohio Power Siting Board, Docketing Division, 180 East Broad Street, Columbus, Ohio 43215-3793 and should cite the above-listed case number.
