

BEFORE

THE PUBLIC UTILITIES COMMISSION OF OHIO

In the Matter of the Alternative Energy)
Portfolio Status Report for 2013 of) Case No. 14-647-EL-ACP
Reliant Energy Northeast LLC.)

FINDING AND ORDER

The Commission finds:

- (1) Reliant Energy Northeast LLC (Reliant) is an electric services company as defined in R.C. 4928.01(A)(9) and, as such, is subject to the jurisdiction of this Commission.
- (2) R.C. 4928.64(B)(2) establishes benchmarks for electric services companies to acquire a portion of their electricity supply for retail customers in Ohio from renewable energy resources. Half of the renewable benchmark must be met with resources located within Ohio (in-state renewable benchmark), including a portion from solar energy resources (solar benchmark), half of which must be met with resources located within Ohio (in-state solar benchmark).¹ The specific renewable compliance obligations for 2013 are 2.00 percent (which includes the solar requirement) and 0.09 percent for solar. R.C. 4928.645 (formerly R.C. 4928.65 prior to the enactment of 2014 Sub.S.B. No. 310), provides that an electric utility or electric services company may use renewable energy credits (RECs) and solar energy credits (SRECs) to meet its respective renewable energy and solar benchmarks. Ohio Adm.Code 4901:1-40-01(BB) defines a REC as the environmental attributes associated with one megawatt hour (MWh) of electricity generated by a renewable energy resource, except for electricity generated by facilities as described in Ohio Adm.Code 4901:1-40-04(E).

¹ The Commission notes that, for future reports, Sub.S.B. No. 310 of the 130th General Assembly, which became effective September 12, 2014, has amended R.C. 4928.64 and 4928.65 to, inter alia, eliminate the in-state renewable benchmarks and advanced energy component, freeze renewable energy benchmarks for 2015 and 2016, and allow an alternative sales baseline calculation for determining compliance.

- (3) Ohio Adm.Code 4901:1-40-05(A) requires each electric services company to annually file by April 15 an annual alternative energy portfolio status report (AEPS report), unless otherwise ordered by the Commission. The AEPS report must analyze all activities the company undertook in the previous year in order to demonstrate how pertinent alternative energy portfolio benchmarks have been met. Staff then conducts an annual compliance review with regard to the benchmarks. Ohio Adm.Code 4901:1-40-02(A) provides that any entity that does not serve Ohio retail electric customers shall not be required to comply with the AEPS rules.
- (4) On April 15, 2014, Reliant filed its 2013 AEPS report. Reliant indicates no retail electric sales prior to 2013. Accordingly, Reliant proposes to use its 2013 actual retail electric sales of 40,027 MWh as its baseline.
- (5) On November 5, 2014, Staff filed its review and recommendations for Reliant's AEPS report. Staff reports that Reliant is an electric services company in Ohio and that the baseline proposed by Reliant is reasonable. Staff also determined that Reliant has satisfied its total solar and non-solar obligation, satisfied its specific minimum in-state non-solar requirement, and exceeded the specific minimum in-state solar requirement for 2013. Finally, Staff states that Reliant has transferred RECs and SRECs, which were sourced from generating facilities certified by the Commission and appropriately associated with electricity generated between August 1, 2008, and December 31, 2013, to its Generation Attribute Tracking System (GATS) reserve subaccount for Ohio compliance purposes.
- (6) Upon review of Reliant's AEPS report, as well as Staff's findings and recommendations, the Commission finds that Reliant's AEPS compliance obligations for 2013 be based upon its 2013 actual retail sales, and that Reliant has met its compliance obligations for 2013. The Commission also directs that, for any future compliance years, Reliant should initiate the transfer of the appropriate RECs and SRECs to its GATS reserve subaccount between March 1 and April 15, consistent with Staff's recommendations.

It is, therefore,

ORDERED, That Reliant's 2013 actual retail sales 40,027 MWh be accepted as its 2013 baseline sales. It is, further,

ORDERED, That Reliant's AEPS report for 2013 be accepted as filed. It is, further,

ORDERED, That Reliant is found to have satisfied its 2013 AEPS compliance obligations. It is, further,

ORDERED, That Reliant abide by the adopted Staff recommendations. It is, further,

ORDERED, That a copy of this Finding and Order be served upon all parties of record.
