Case number 14-1297-EL-SSO

RECEIVED-DOCKETING DIV

March 23, 2015

2015 APR -3 PM 2:42

PUCO

Dear Governor John Kasich,

I'm disappointed to hear that the government is considering bailing out coal burning power plants. We should be investing our tax dollars into clean energy sources, not creating more pollution. A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficient and renewable energy. Ohio should be better than this. Your taxpayers expect you to do the right thing.

Eden Matteson

Re: Case No. 14-1297-EL-SSO

To Whom It May Concern:

I am writing to urge the Public Utilities Commission to deny Duke Energy, AEP, and First Energy's proposals to raise consumer rates and use the profits to cover the costs of their outdated and inefficient coal plants. A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy. I care about reducing toxic pollution and saving money on our electric bills.

Thank you for your consideration.

Sincerely,

Andrew Lyden
440 Suncrest Drive
Yellow Springs, OH 45387

3/25/15

PUC of Ohio -

I just heard about applications by Duke Energy, First Energy & AEP to raise their rates. Please don't let them do this! We should invest in more efficient & renewable energy, not in old, polluting & unhealthy coal plants.

Thank you -

Kimberly Rohmann

Dear Public Utilities Commission of Ohio:

180 East Broad St
Columbus, OH 43215

I am a retired teacher and greatly concerned about our environment.

Currently I would urge you to deny a rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants. I currently pay my electric bill to the Village of Yellow Springs. They have a contract with a company for the next fifty years and its gets its energy from a variety of sources.

I care about reducing toxic pollution and saving money on our electric bills.

A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investments in efficient and renewable energy sources.

The case number for First energy is 14-1297-EL-SSO.

Please find it within your conscience to vote for legislation that is clean and supports clean air and water with our State.

Columbus, OH 43215-6177

Public Utilities Commission of Ohio
180 East Broad St.
Columbus, OH 43215

Dear Governor and Members of the PUCO,

Regarding Case #14-1297-EL-SSO, I implore you to act on behalf of the best interest of the citizens of the state of Ohio.

Please deny the rate increase that would lock consumers like me into buying power from Ohio's oldest, dirtiest coal plants. My family and I want to reduce toxic pollution, save money on our electric bills and protect our environment for generations to come.

We must move forward on renewable energy and invest in our state and our nation's future with efficient and sustainable energy sources and systems. Bailing out old, inefficient technological systems only benefits utility shareholders and delays future investments, improvements, not to mention jobs!

As our representatives, I implore you to move forward with the interest of your constituents and the future of our state's future. This is not a political matter; it is a matter of fact, science and ultimately success and survival.

Sincerely,

RE: First Energy Case Number 14-1297-EL-SS0

Dear PUCO Members,

I am writing to request that you please deny the rate increase that would lock consumers like me into buying power from Ohio's oldest and dirtiest coal plants.

My family and I care about reducing toxic pollution and we take measures to do so at a household level and we would appreciate your commitment to do so at the state level.

Sincerely,

Jason Morgan

To whom it may concern:

Please deny the rate increase which would lock customers into purchasing power from the oldest, dirtiest coal plants. This ensures that our Ohio air stays dirty and causes many health concerns for our citizens old & young alike.

I care about improving and cleaning up our environment as well as saving money on my electric bills. We must clean up our technology not support dirty plants.

Thank you for being supportive of Ohio's consumers and our earth.

Sincerely,

Beth Knepper

To Whom It May Concern:

With reference to case number
14-1297-EL-SSO, I would like to
urge you to stop the bailout of old
energy like coal and put more emphasis
on new, renewable energy.

My family and I care about reducing
pollution and making progress toward
renewable technology, which we will
have to address sooner or later,
hopefully sooner.

Sincerely,

Ronald Tower (Ronald Tower)
240 King St
Yellow Springs, OH 45387

24 March 2015
Case #: 14.1297.EL.SSO

TO: Public Utilities Commission of Ohio

As a voting citizen of the state of Ohio, I strongly urge you to consider updating your energy policy to something better, and cleaner than our out-dated, and dirty coal plants. I ask you to deny the rate increase which forces Ohio consumers to buy power from these archaic and detrimental power plants. Not only is this an economic (we can't afford higher bills), but we have two children who we hope will want to stay in Ohio upon graduating college and not have to leave due to Ohio's lack of adapting to Ohio's needs. We would like you to invest in new technology - technology that will ensure Ohio's future and will see that renewable energy IS our future - for jobs, for our gorgeous state and for our future.

Thank you for your time.

Respectfully,

Alice Young-Basora
335 Kingsfield CT
Yellow Springs, OH 45387

Public Utilities Commission of Ohio.

Re: Case # 14-1297-EL-850

I care about renewable energy. As a resident of Ohio, I would gladly pay an increased rate for clean, renewable energy. Allowing out-dated, dirty coal plants to remain in operation and forcing an increased rate to Ohio families is wrong, not to mention taking giant steps backward. A bailout of this old technology only benefits utility shareholders and delays sustainability. This was a huge mistake made in the auto industry bailouts. Business-as-usual with no advances in technology may keep jobs, but it certainly doesn't create jobs and it most certainly hurts the environment and the Ohio consumer.

Please deny the rate increase to lock consumers into buying power from old, dirty coal plants. If I am going to have to pay more I would like a better, cleaner, sustainable product. Marie Espinosa
Yellow Springs, OH

I Sheila Johnson deny the
rate increase to lock consumers
into buying power from Ohio's
single, dirtiest coal plants.

I pay my bill to Johnson and Village
of yellow springs utility office and
I care about this issue because
if these utilities were able to
sell this generation capacity at
profit on the open market, they
wouldn't be asking for customers
to buy these facilities. Over
millions of Ohio consumers paid
billions of dollars to these
same utilities for their transi-
tion to deregulated power plants
under a 1998 Ohio law. My family
and I care about reducing toxic
pollution and saving money on
our electric bills. A patchwork
of old polluting technology
and outdated utility shareholders
and delays inevitable investment
in efficiency and renewable
energy.

Sheila Johnson

Columbus, Ohio 43215

Case Number: 14-1297-EL-SSO

To Whom it May Concern,

I'm writing to you today to urge you to fight against Duke Energy, AEP, and First Energy's plan to file permission with PUCO to raise consumer rates in order to pay for their outdated and environmentally troublesome plants. Being required to pick up the bill from these energy companies, that have no regard for the pollutants that they have been responsible for producing, is not something that myself or my neighbors are prepared to do. It is unfair and something that I personally do not believe in.

My family and I care about reducing toxic pollution and saving money on our electric bills, not continuing to pollute our environment at the taxpaying, consumers expense. I urge you to please deny the rate increase to lock consumers into buying from Ohio's oldest, dirtiest coal plants.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Wes McKeever', with a stylized, flowing script.

To Whom It May Concern:

I am completely opposed to the bailout of old, polluting coal plants, requested by FirstEnergy, Duke Energy, and AEP in case number 14-1297-EL-SSO. Personally and through my community, I am working to support efficient and renewable energy sources. This action only benefits utility shareholders, while supporting outdated energy plants that cannot compete on the open market. This would be an outrageous use of taxpayer dollars. Please deny this request.

Sincerely,

A handwritten signature in cursive script that reads "Lindie Keaton".
