COMPLAINT DESCRIPTION:

Duke Energy sold off the power plants in Ohio for a large sum of money. Those headlines where shared with Duke Energy purchasing power plants in other states such as Florida and North Carolina. All of these funds should have been put into new facilities inside Ohio. Duke Energy is not alone, AEP and First Energy are doing the same. Why is the PUCO not actively trying to get these utilities to funnel these funds into Ohio? Along with the funds would come jobs for Ohio workers. This complaint is about the PUCO itself and the slow death that is coming with high energy cost because Ohio will have to import all it's power from other states. This sale of power plants for Duke Energy is a big win for the Carolinas and Florida!
