Re Case Number 14-1297-EL-SSO
(First Energy)

To Whom It May Concern,

This is to urge you to deny FirstEnergy's request for a rate increase. The energy companies involved propose to make the upkeep and operation of outdated Ohio coal plants the costly responsibility of their consumers. As you must be aware, these companies have a history of poor maintenance of their facilities not only in Ohio but in other states as well. I believe Ohio would do better to focus on investment in sustainable energy options, while moving away from dependence on financially wasteful and environmentally unhealthy coal fired plants.
