Subject: RE: Gable Substation 14-1280-EL-BSB

Thank you for contacting the Ohio Power Siting Board (OPSB). Your correspondence regarding the proposed Gable Substation Project will be docketed in the public comments for case number 14-1280-EL-BSB.

The adjudicatory hearing in this case was held earlier today, April 23, 2015, in Columbus. During the adjudicatory hearing, AEP Ohio Transmission Company and OPSB staff offered expert testimony supporting their positions before an administrative law judge. At a later date, The Board will schedule the project for a decision during a public Board meeting.

The OPSB website at www.OPSB.ohio.gov provides the latest information regarding this and other power siting cases. Should you have additional questions or comments, please feel free to contact me directly at (866) 270-6772.

Respectfully,

Matt Butler

Subject: Gable Substation 14-1280-EL-BSB

Im am writing regarding Gable Substation 14-1280-EL-BSB on County Road 15 in Jefferson County OH.

I ask that you stop progressing on the primary site and move to the secondary site only a short distance down the road.

Please put yourself in the situation of the residents in the immediate area. They have grown there with beautiful country views and the quiet of the Rural America. This is a choice that some families make as it is their chosen lifestyle and source of peace.

No amount of trees will cover the ugliness of a Substation nor will they hide the noise. Would you want that to be built right next to the place you call home.

The secondary site eliminates this concern and will allow these good people to live their lives as they have chosen.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.
