RE: Case # OH3225005703C

I would like to contest the above citation which was received by a driver of one of our trucks. We received the citation due to "Failing to secure cargo" properly.

In the citation, it states that the machine weighs 20,000 pounds. I have enclosed a picture of the label for the ROLL BAR, which states the roll bar is safe for a 20,000 pound machine to roll over. **This is not the weight of the machine.** I have also enclosed the cover page from the machine which we were hauling and the page which states the operating weights for the machine is only 17,545 pounds, not the 20,000 pounds that we were charged with. This machine was tied down properly for a machine UNDER 20,000 pounds. There was some confusion as to what was seen on the tag and what the machine actually weighs.

Please consider this appeal and dismiss the case. If you have any questions, please do not hesitate to call me.

Sincerely,

Robert J. Kirila
Vice President
