Columbus, OH 43215-6117

RE: First Energy Case # 14-1297-EL-SSO

Dear Governor Kasich,

Please deny First Energy's proposed rate increase, referenced above.

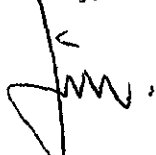

Ohio needs to do everything we can to encourage the inevitable investment in efficiency and renewable energy.

In the Cincinnati area, we are especially vulnerable to EPA violations in the summer months, in no small part because of the natural topography that puts a thermal layer on top of the Ohio Valley.

My wife and I are concerned about reducing toxic pollution and also reducing the number of days kids and the elderly are forced to stay inside due to bad air.

I appreciate your thoughtful consideration on this issue.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jim Callaway', with a stylized flourish at the end.

Jim Callaway
9555 Southgate Drive

PUCO

2015 MAY 14 AM 11:11

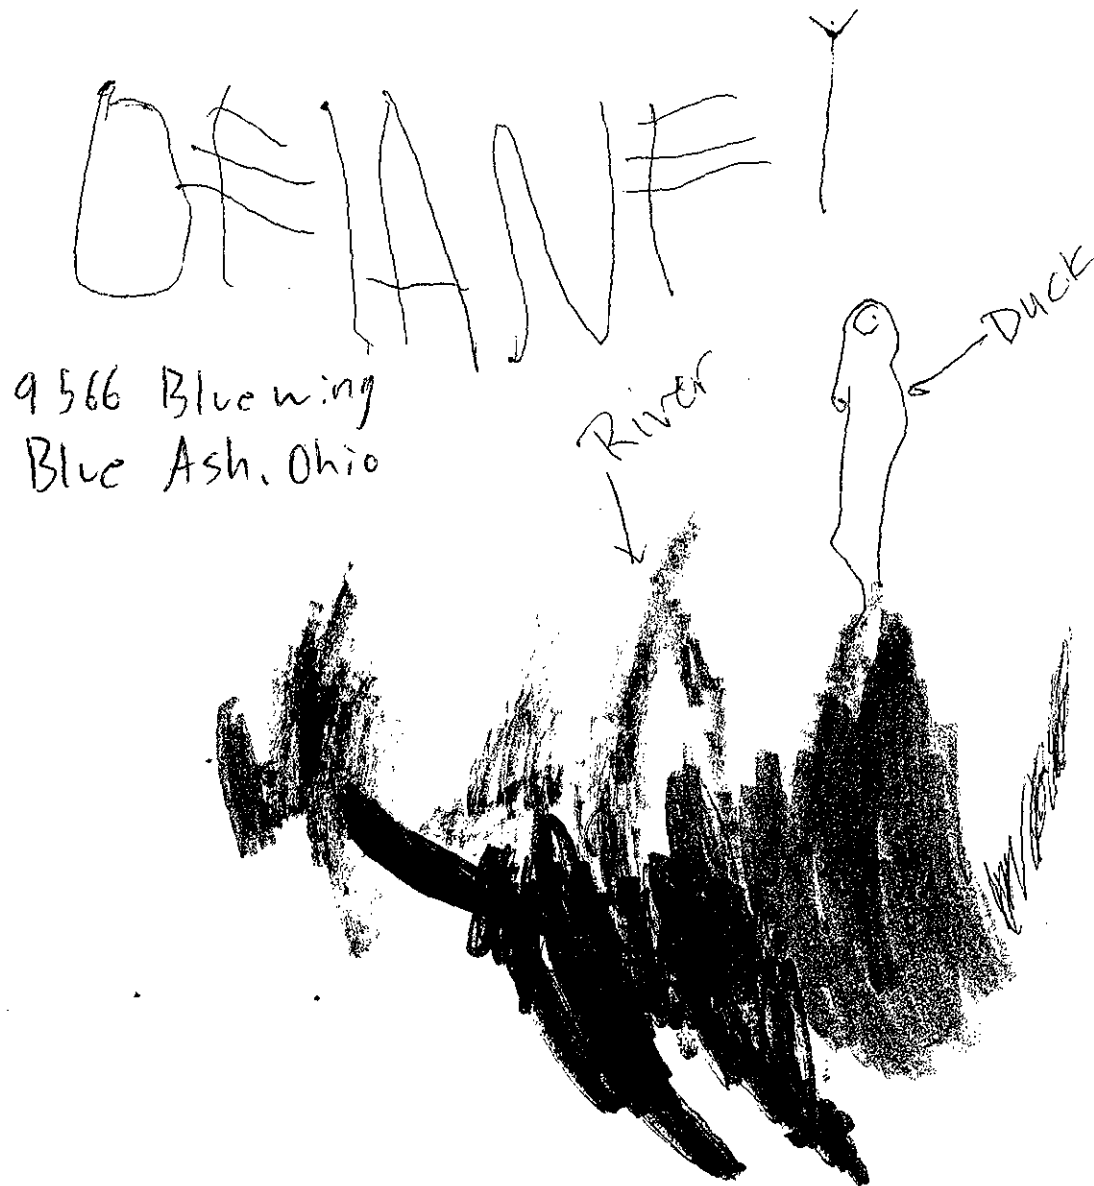

RECEIVED-DOCKETING DIV

Governor Kasich,

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. My family and I care about reducing toxic pollution and saving money on our electric bills. I care about this issue because it hurts the environment. A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy.

Case number: 14-1297-EL-SSO

Delaney Schneider

PUBLIC UTILITIES COMMISSION OF OHIO
180 EAST BROAD STREET
COLUMBUS, OH 43215

DEAR COMMISSIONER,

PLEASE DENY THE RATE INCREASE TO LOCK
CONSUMERS INTO BUYING POWER FROM OHIO'S
OLDEST, DIRTIEST COAL PLANTS.

I care about this issue because my
family & I care about reducing toxic
pollution, my Grandson has asthma
which is aggravated by pollution, This is
in support of case #14-1297-EL-SSO.

Sincerely,

Nancy Stover

Columbus, OH 43215

Dear PUCO,

Please deny FirstEnergy's request for a coal plant bailout (Case # 14-1297-EL-SSO). The plants they intend to bail out are outdated, inefficient and are a leading cause of toxic air pollution in Ohio. The money spent on these bailouts would be better spent as an investment in research on more efficient and renewable energy sources.

Sincerely,

Re: PUCO – Duke Energy/First Energy Case No. 14-1297-EL-SSO

Dear Governor Kasich, Gentlemen and Ladies:

This letter is to encourage that requests to provide bailout funds (see above reference) be denied to energy companies which use old, polluting technology who have refused to fund proper cleanup and/or closure and/or updating of their dirty facilities.

Rate increases will lock consumers into buying power from these old, extremely dirty coal plants. Any bailout will only benefit utility shareholders and will delay investment in clean, efficient, renewable energy.

We believe that Ohio's status as one of the top ten polluting states is nothing to be proud of. We urge you to work toward new energy policies which will provide a cleaner, healthier environment for Ohio citizens and will contribute much needed jobs to our state. It's past time that Ohio's government accepts that most of the world's scientific community believe that dangerous climate changes are already happening and that human endeavors contribute to dangerous climate events.

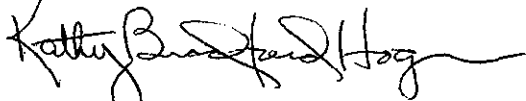

Ohio's citizens and future citizens deserve nothing less.

Thank you.

Sincerely,

Robert B. Hogan

Governor John Kasich
Public Utilities Commission of Ohio

I have recently been briefed on the action by PUCO. A couple of key points from my vantage point:

1. I would ask that you continue to deny the rate increase that will lock consumers into buying power from Ohio's dirtiest coal plants.
2. My family and I are concerned about the environmental aspects of current toxic pollution.
3. We should be working together to REDUCE electric and overall energy costs.
4. We need to be focused on future investments that create more efficient and renewable energies....not antiquated, turn of the century Coal factories.

Thank you for listening.

Richard L. Postler

Case Number: First Energy 14-1297-EL-SSO

Please forgive any typos, working from my iPad. Thanks for understanding.

I care about this issue because I have cancer and want a cleaner environment for myself and my children. Let's not be behind in investing in clean energy. We will have to do it at some point. Let's do it while we still have a chance to reverse the outcome.

Sincerely,

Margot Hood

PUCO,

The time has come to put the environment ahead of profits. Allow for job creation through renewable energy, and at the very least make the changes necessary to improve our current energy situation in regards to the environment.

Sincerely,

Tony Martinez
3523 Kroger Ave.
Cincy, OH 45226

April 20, 2015

Dear PUCO,

I am a ratepayer of Duke Energy. I care about the issue allowing bailouts to state's outdated coal plants. I care about this issue because allowing these bailouts for these old polluting plants would be causing an unneeded increase in our state's air pollution. Plants who are outdated and cannot compete with economically or environmentally should be forced to retire. This can allow for a growth in new plants which can improve our air and overall quality of life throughout Ohio.

Thank you,
Tricia Nieser

Re: PUCO First Energy rate case 14-1297-EL-SSO

We write to support denial of the proposed rate increase by First Energy that will serve to subsidize older inefficient plants. We agree with the Office of the Ohio Consumer's Council (OCC) that this request should be denied.

These deregulated plants (Davis-Besse, Sammis, Kyger Creek and Clifty Creek) should not be subsidized by the government, taxpayers, and other ratepayers. Rather, resources and State of Ohio policies should be directed at encouragement of renewable and low pollution electric energy sources.

Re: Power company bailouts
First Energy case number 14-1297-EL-SSO

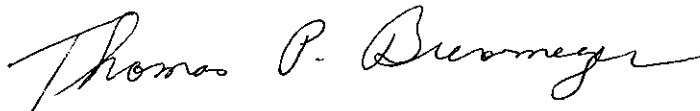

Dear Madame or Sir:

In order to work to stop the terrible pollution, I request that you do all you can to deny any financial bailout funding and rate increases to Ohio power companies who, with old technology coal burning generators, are polluting air and water of both Ohio and nearby states.

I believe this is both a moral and health issue that deserves the control that can be exercised only by the public through our state government.

Practicable renewable energy sources along with using Ohio coal in cleaner ways will go a long way in solving this important problem.

Thank you for your consideration.

To Whom It May Concern,

I am writing you to express my concerns about clean energy here in our great state of Ohio. I currently live with my parents, whom are both retired and both over the age of 70. They, as well as I, are concerned about reducing toxic pollution as well as saving money on our electric bill. We all care a great deal about our environment, and are well aware of lobbyists in Washington D.C. who seek only profitable gain in the guise of actually making an improvement to our air and water qualities. A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency, and most importantly, renewable energy. I have watched with sadness the devastation of practices like this wreak environmental havoc on our neighboring state of West Virginia, and I want to do everything in my power to assure circumstances like those won't happen here in Ohio. I ask you to please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants, and PLEASE invest our taxpayer money and government grants into clean, renewable energy. I thank you for your time and consideration.

Sincerely,
Sarah C. McTaggart

Centerville, Ohio 45458

Case # 14-1297-EL-550

To the Public Utilities Commission of Ohio,

I am a physician in Centerville, OH. I have four children and we try to live as sustainably as reasonable. We compost, recycle, turn off lights, donate all outgrown clothes and toys, use the public library and remarkably have more toilets in our house than televisions. Clearly we care about the environment.

Just because I am a physician that does not mean that I don't watch our money and how it is spent. I pay my electric bill to Dayton Power and Light. Of course I am not in favor of rate hikes, but I am a proponent of paying for appropriate value. Our family and might I say generational values are to reduce toxic pollution. Bailing out the energy companies rather than investing in more environmentally friendly technologies is a band-aid for a gushing wound.

Nothing is an easy decision or it would have already been made. Yes, there are arguments to not retire old plants that supply "energy" and jobs. Do you not stand for long term economic future of Ohio and beyond? Then foresight is the answer and not the pressures of the large energy companies wearing suits.

Please deny the rate increase and have the suits propose several other plans to change their energy sources away from Ohio's oldest, dirtiest coal plants.

Subject: First Energy 14-1297-EL-SSO.
Dear Sir / Madam,

I am writing in support of providing clean energy by reducing the numbers of coal plants in Ohio. A bailout of old, polluting technology only benefits utility companies and delay future investment on clean energy.

Top 5 countries that use the most renewable energy :

1. Denmark
2. Iceland
3. Portugal
4. Spain
5. Germany

Why is US not in Top 5?

Sincerely,

K. N. Gunawan.

To Whom It May Concern,

My family & I are about 2 concerned about this issue. This rate increase is designed to benefit shareholders & denies the public of much needed renewable energy.

Use your heads; burn dirty coal, "frack" & poison the water table. CR!!! Use the huge variety of NATURAL renewable resources (sun, wind) to advance into the future.

Do some research & learn the facts. Don't bowing to the corporations.

MAKE A DIFFERENCE

Attention PUCO,

My family and I care about reducing toxic pollution and saving money on our electric bills. Even though I pay DP&L for energy delivery, this issue affects all Ohioans.

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. This is the 21st century; with all of the technological advances and emphasis on "green" energy, I know that we can do better!

Bailing out old, polluting technology only benefits utility shareholders, not the average Ohio citizen. By doing this, investments in renewable energy and efficiency will be delayed. We can't afford to wait.

I pray that we would not end up like China, where citizens must wear protective face masks because their air is so polluted that it is hazardous to their health! That could be a possible future for Ohioans. Please do everything in your power to prevent it.

Thank you,

Christina Fillinger,

Re: CASE NO.: 14-1297-EL-SSO

I am a registered voter in Ohio. My family and I care about the environment and oppose First Energy's request to raise its rates in order to pay for the cost of operating its inefficient and outdated coal plants.

First Energy's plants are outdated. They need to be shut down or updated to minimize pollution. Asking consumers to bear the burden of the expenses associated with the operation of First Energy's coal plants is unfair.

Any increase in a rate should be tied to investment in efficient and renewable energy, not continued operation of First Energy's coal plants.

Very truly yours,
Elizabeth Conklin
3414 BURCH, CINTA, OH 45208

Public Utilities Commission of Ohio

My family and I care about reducing toxic pollution and saving money on our electric bills.

RE: Case Number 14-1297-EL-SSO

Dear Governor Kasich:

Please use your position to become a force for clean, renewable energy in Ohio, and **oppose First Energy's bailout request.**

A study by the Department of Energy's National Renewable Energy Laboratory (NREL) has shown that the U.S. can generate 80% of its electricity from renewable energy by 2050. Instead of sinking money into old, polluting technology, wouldn't it be smarter to plan to make Ohio a leader in renewable technologies, including wind, solar, and geothermal?

As a mother, I want to reduce air pollution, and I find it very offensive to have to pay higher electric bills so that First Energy can update aging and polluting coal plants. We have an alternative. Invest instead in efficient, renewable, clean energy.

Make us proud to live in Ohio, by opposing First Energy's effort to use our hard-earned dollars to bailout dirty energy plants!

Sincerely,

Grace Severyn

To whom it may concern,

I think it is foolish to subsidize fossil fuel power to any degree. Fossil fuels are finite resources and as such, are an extremely short-sighted strategy to energy generation. Fossil fuels' main benefit is their low initial cost so they already have an advantage and need no more. Their downsides, mostly pollution, are much more expensive to fix and end up falling on the taxpayer anyway. Rate increases to subsidize existing fossil fuel plants make no sense in the long term. Please do not approve 14-1297-EL-SSO.

Thank you for your consideration,

Ben Goris

rate increases

Case #: 14-1297-EL-SSO

6651 Millard Rd, Blue Ash, OH 45215

To Governor John Kasich & Public Utilities Commissions of
Ohio

Hello I care about this issue because its raising our prices of our electric bills and raising the amount of toxic pollution which is harming lots of americans. We need to get rid of old harmful coal plants and get new, safer, and cheaper ways to get energy. Also Coal is eventually going to run out but if we used other sources of energy (wind, water, Solar) and get rid of coal plants it would be safer for the environment, and add up to save us money. So this is why we need to get rid of Coal Plants.

9727 Conklin Rd

Columbus, OH 43215

Dear Public Utilities Commission,

My family and I care about the air quality in our state of Ohio. We have heard that our state ranks 3rd in the country for worst air pollution. I care about this issue because my father grew up in Youngstown, OH, during the peak of the steel mill era and the burning of coal has caused him to have the most awful case of C.O.P.D. that I've ever seen. You would think that he had been a smoker for years, though he has never touched cigarettes.

If you use your power as governor to bailout these old antiquated coal burning companies, you are simply delaying the inevitable investment that must happen if we are to have cleaner air for our children and their children. You need to invest our tax dollars into renewable energy even if it means raising our taxes. We all need to sacrifice if we want these changes to take place. We want you to speak out against First Energy's request for a bailout (case number 14-1297-EL-SSO). Thanks for listening.

Sincerely,

A handwritten signature in black ink that reads "Jane K. Krumpe". The signature is written in a cursive, flowing style.

Columbus, Ohio 43215

Dear Public Utilities Commission of Ohio,

I hope this letter finds you well. I would like to write to you today about the inefficient coal plants that are being utilized in our home state of Ohio.

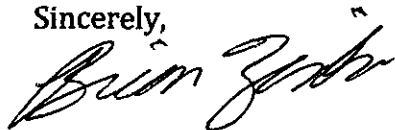

It has come to my attention that Duke Energy is currently utilizing outdated and inefficient coal plants, for whose high costs they expect the consumers to pay. Evidently, their request to you - the Public Utilities Commission of Ohio - for a "Purchase Power Agreement" would leave consumers no choice but to pay an increased rate to Duke Energy, regardless of their provider. This is an extremely unjust move, as I will be charged an additional fee for no additional service, and as a result will inadvertently be supporting the use of outdated and toxic energy sources. As a strong supporter of environmental causes, I hope that you may understand that Duke is proposing to partake in unethical practices.

It is very important to my family and I to do everything in our power to work towards cleaner air through a reduction in toxic pollution. In addition to our passion for environmental causes is our need for economically fair services. Since my wife and I are young and newly married, saving money on our utilities allows us to better provide for our growing family.

I truly hope that you can understand the perspective of those who are opposed to Duke Energy's tactics and join us in the fight for cleaner air and just business practices by denying this proposal.

Thank you so much for taking the time to read my letter and consider my point of view.

Sincerely,

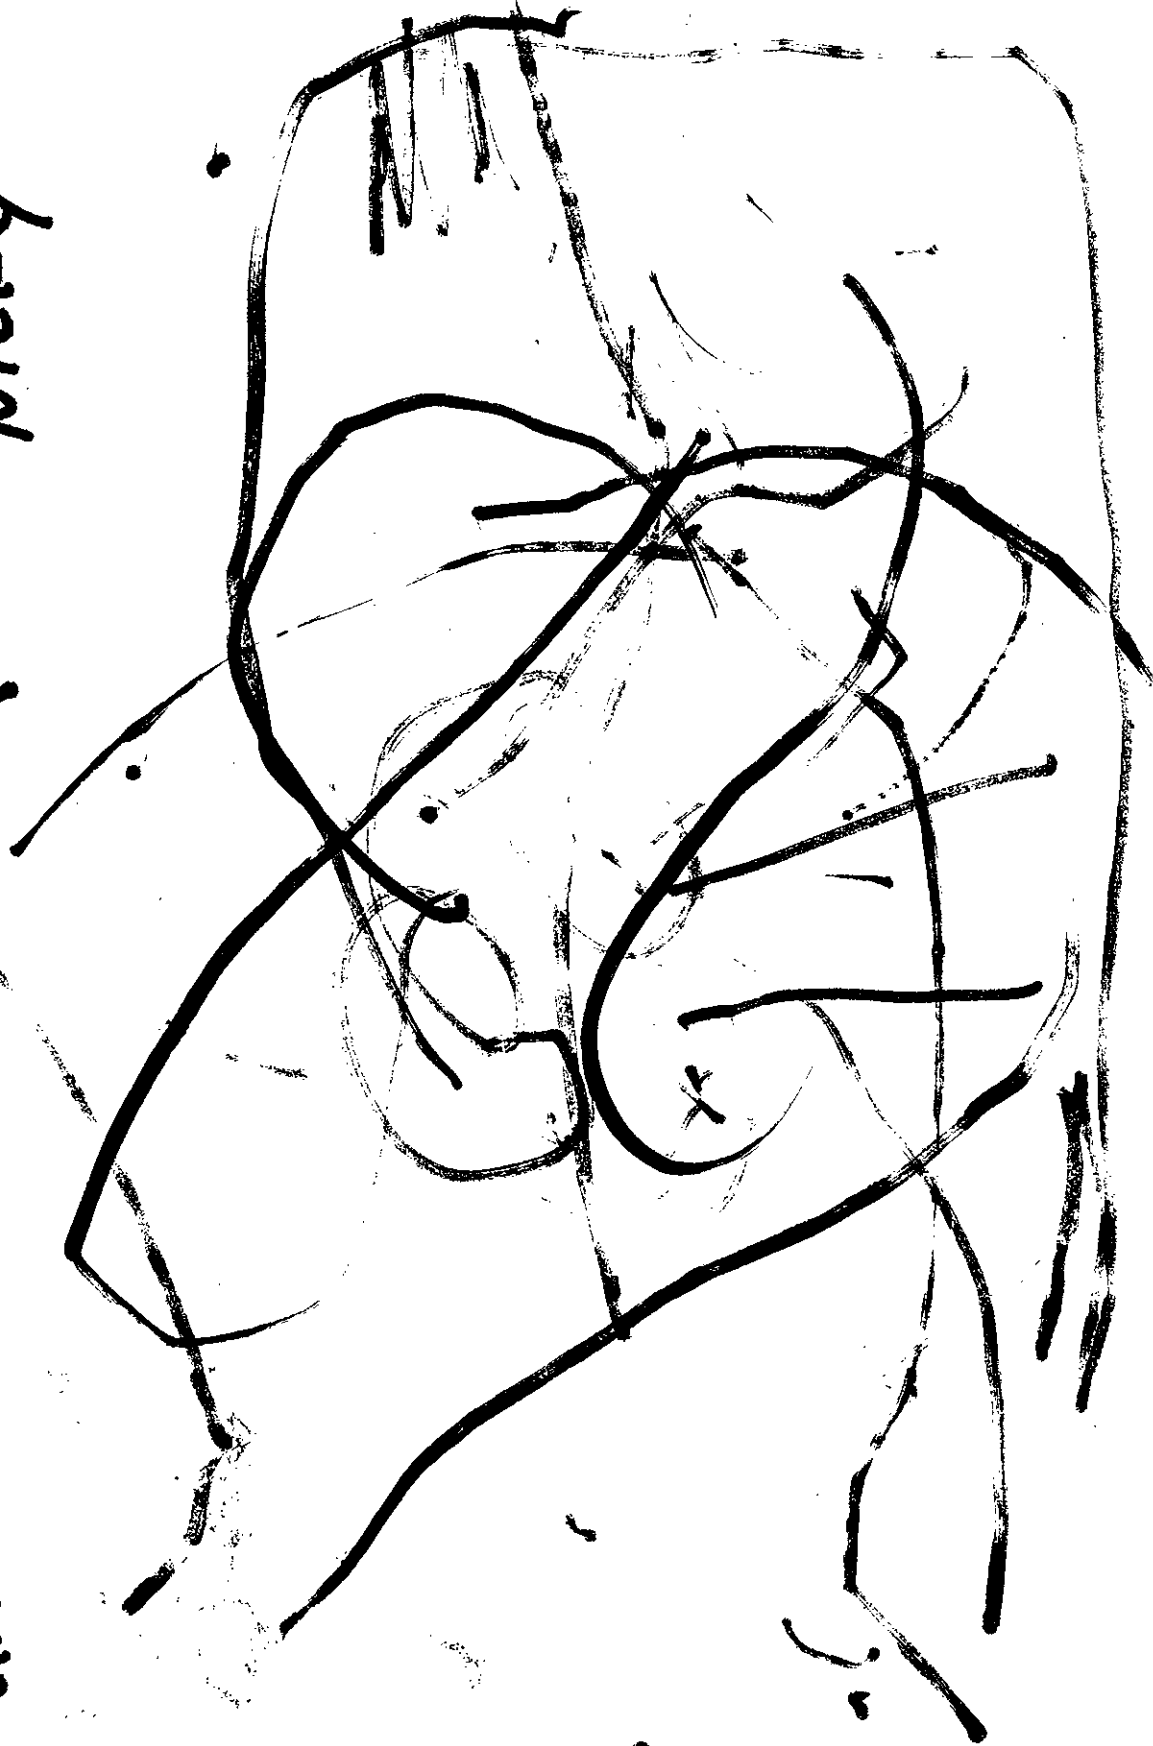

A handwritten signature in black ink, appearing to read "Brian Zinkan". The signature is fluid and cursive, with a large initial "B" and a stylized "Z".

happening. I care about my family,

my energy bill, and the environment.

Too much carbon is released into
the air.

14297 EL SSO

Public Utilities Commission of Ohio
180 East Broad Street
Columbus OH, 43215

Dear Public Utilities Commission of Ohio,

Coal, oil and fossil fuels in general are not only dirty and toxic, but not practical for the future of this state and nation. A bailout for FirstEnergy (case number 14-1297EL-SSO) would mean greater expenses for me and my family as well as more polluted air for all of Ohio. Our state needs to be investing in renewable, clean energy. By supporting FirstEnergy's bailout only helps utility shareholders at the expense of fellow Ohioans. Please vote NO!!!

Thank you for your time,

Michael Gibbons & Joe Lopez

609 Main St
Oxford, OH 45056

Dear Commissioners,

Please do not increase energy bills to fund
Ohio's outdated coal plants. It pollutes
the air with toxic smoke from factories,
which increases some people's risk of cancer.

My family and I care about reducing toxic
pollution because we want to keep people from
getting cancer. We also want to save money
on our energy bills.

Please invest in renewable energy instead of giving
money to Ohio's oldest and dirtiest coal
plants. It will help keep the air cleaner,
which is healthier for everyone.

From,

Sheridan Hennessy age 9.

RE: PUCO-FirstEnergy case no. 14-1297-EL-SSO

If, as I've been given to understand, this case involves allowing FirstEnergy to increase rates to help fund the maintaining of power plants that would better be replaced with more efficient and less toxic energy plants, and would therefore delay transition to such plants and further delay the improvement of Ohio's record in terms of related environmental issues, myself, and my household, are against it.

If allowing such increases were necessary to help redirect the companies efforts toward newer, more sustainable and renewable energy utilization IN STEAD, we would almost certainly support it and encourage others to do so. Wouldn't you?

CASE NUMBER 14-1297-EL-SSO

Please deny the rate increase to lock consumers into buying power from Ohio's coal firing plants which are outdated and past their economic and environmental usefulness. It is disappointing that Ohio ranks nearly last among states with it's air quality and even more disappointing that my tax dollars support the continual operation of antiquated, non-green technology.

Stipends, stimulus, and bailouts for these plants are counter productive. I propose instead that tax payer dollars fund new power plants with advanced reuse cycles using efficient turbo machinery. An investment in clean burning plants will not only reduce pollution but decrease long term costs on the tax payer.

Focus on renewable energies are also much more cost effective and pollution free for longer term investment in the great state of Ohio's future.

This is a common sense solution.

A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment into renewable and more green power generating plants.

Respectfully,
Eric Oswald

I respectfully ask that you deny the rate increase for First Energy—case number 14-2297-EL-SSO.

This rate increase would lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

Why would Ohioans want to strengthen these plants, when Ohio should be reducing toxic pollution and saving money on our electric bills?

A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy.

Sincerely,

A handwritten signature in cursive script that reads "Prudence Z. Dana". The signature is fluid and stylized, with the first and last names being more prominent than the middle initial.

Public Utilities Commission of Ohio,

Good evening,

My name is Brand'n Byrd. My wife and I are writing you about the FirstEnergy bailout, case number 14-1297-EL-SSO. We would like for you to deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. My wife and I care about this issue because a bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficient and renewable energy. My wife and I have been together for ten years, we just celebrated our first child's first birthday, seeking both of our master's degree using the GI Bill benefits I recieved from serving eight years in the Army with a tour in Iraq. We are extremely interested in reducing toxic pollution and saving money on our electric bills.

Sincerely,

The image shows two handwritten signatures in black ink. The top signature is more fluid and cursive, while the bottom signature is more stylized and includes a long horizontal line extending to the right.

To whom it may concern -

As the payor of a significant amount of taxes in Ohio - I beseech you to NOT support the bail out of old, polluting electricity generation technology - Please invest in a cleaner future. I don't want to pay more for worse air quality!

Please deny the rate increase to lock consumers into buying power from Ohio's oldest dirtiest plants! We have one of the worst, highest rates of coal generated power in the nation -

With hope for a cleaner future,

Jisa Ellen

re: First Energy Case Number 14-1297-EL-SSO

Dear Mr. Kasich

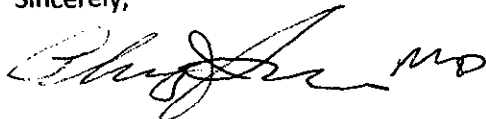

My wife and I try very hard to conserve energy in our home and our energy expenditures in our budget. Duke Energy sends us letters every month stating that we use less energy than the "efficient" home and that we used less energy this year than last. We've invested in LED lighting and in fluorescent lighting, and insulation. We sweat in the summer and wear sweaters in the winter.

It is distressing to see that Duke Energy is not asked to conserve energy but is being allowed to consider charging consumers more money in order to continue using inefficient and outdated power plants, particularly coal fired plants.

Currently Duke Energy appears to be requesting a rate increase (see case number above) that would allow Duke to continue to profit from outdated and inefficient plants.

I expect our government to expect the same effort from the utility companies that it expects from its citizens. Please deny this request for a rate increase.

Sincerely,

A handwritten signature in black ink, appearing to read "Philip J. Schmitt MD", with a stylized flourish at the end.

May 5, 2015

To the Public Utilities Commission of Ohio

It has recently come to my attention Ohio has some of the most out of date and inefficient coal power plants in the Country. In addition, these power plants are greatly contributing to the over use of fossil fuels and their harmful by-products, which our Country has pledged to reduce.

For these reasons, and many others, I must ask you to please consider our future generations, your family, and the place we call home, and to please deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants. Also, my family and I care about reducing toxic pollution and saving money on my electric bill.

Sincerely,
Chris Carey

514 Tusculum Ave.
Cincinnati OH 45226

PUCO,
please do not raise our
bills in order for the
company to pay for outdated
and inefficient plants. Consider
not only the environment as well
but the citizens.

Dear PUCO

5/5/2015

The proposed bailout of First Energy and its old, polluting technology is not a solution that makes sense at a time when we should be seeking greener alternatives. Ohio already ranks too high on the list of polluting states. Prepping up old companies also does not have a history of resulting in long term health of the company.

I urge you to invest in more forward thinking, affordable, green technology for our energy needs.

14-1297-EL-550

Respectfully yours,
Miseo

To whom it concerns
