Re: Carroll County Energy LLC
Case No.: 13-1752-EL-BGN
Blasting Plan – Stipulation Condition 11

Dear Mr. O'Dell:

The Ohio Power Siting Board's April 28, 2014 Certificate of Environmental Compatibility and Public Need issued in Case No. 13-1752-EL-BGN incorporated the Notice of Filing List of Commitments docketed on February 5, 2014 and the Joint Stipulation and Recommendation filed on March 10, 2014, both of which established conditions that are to be completed prior to certain construction activities.

If "site-specific conditions warrant blasting," Condition 11 of the Joint Stipulation and Recommendation requires that Carroll County Energy "shall submit a blasting plan, at least 30 days prior to blasting, to Staff for review and confirmation that it complies with this condition. The Applicant shall submit the following information as part of its blasting plan: (a) The name, address, and telephone number of the drilling and blasting company. (b) A detailed blasting plan for dry and/or wet holes for a typical shot. The blasting plan shall address blasting times, blasting signs, warnings, access control, control of adverse effects, and blast records. (c) A plan for liability protection and complaint resolution."

Carroll County Energy has not determined if blasting will be required. However, to avoid any scheduling issues in the event blasting occurs, Carroll County Energy is submitting the enclosed detailed blasting plan with a map of the potential area where blasting will take place and a listing of structures to be monitored. The complaint resolution process currently in place for the project will be used as the complaint resolution process for the blasting. That complaint resolution process was previously submitted to Staff on February 20, 2015.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.
