**Black River-Johnson No.1 and No.2 138 kV
Transmission Line Extensions to Lake Avenue Substation Project
Supplemental Information
Case No. 15-0289-EL-BLN**

Dear Ms. McNeal:

This letter provides supplemental information to the Board concerning the construction of the Black River-Johnson No.1 and No.2 138 kV Transmission Line Extensions to Lake Avenue Substation Project, Case No.15-0289-EL-BLN.

As part of the final engineering analysis for the Project, it was determined that a modification of the proposed design was needed to minimize impacts while meeting the overall Project need. The proposed design modification includes the removal of three (3) additional structures and the replacement of one (1) structure. The location of the structures to be removed and the location of the structure to be replaced is shown on the attached Exhibit 2A-1. A cross-sectional view of the proposed replacement H-Frame structure is shown in the attached Exhibit 8-A.

Should the Ohio Power Siting Board desire further information or discussion of this submittal, please contact me at (330) 761-4473.

Sincerely,

Nataliya Bryksenkova
Engineer, Transmission Siting
Energy Delivery Transmission and
Substation Design
FirstEnergy Service Company
