Case #: 14-1297-EL-SSO

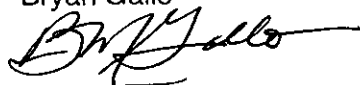

Dear Public Utilities Commission of Ohio,

Hello, My name is Bryan Gallo and I am opposed to the rate increase which would be forced upon me. I care about this issue for many reason, but the two most important are my children Connor and Kaitlyn Gallo. I don't believe that we should be forced to support buying power from Ohio's oldest and dirtiest coal plants. My family works hard for the money that we have earned and use to support ourself. Coal plants and their like had their time, but that time has ended. I teach my children to look towards the future to think about the cause and effect of their actions. If we don't reduce the toxic pollution these plants have caused and are still causing by forcing us to find other, better sources including renewable energy then we will continue the inevitable cycle of pollution. The only benefit will be to the utility share holders while the rest of us will shoulder the economic and ecological side effects.

Please kindly take my words into consideration when you consider their bailout request.

Best,
Bryan Gallo

Twinsburg, OH
