Columbus, OH 43215

To Whom It May Concern:

Case number – 14-1297-EL-SSO

My family and I would appreciate if you deny the rate increase to lock consumers into buying power from Ohio's coal plants. It is no secret that coal is the dirtiest and most outdated form of energy we currently use. Lets invest in efficiency and renewable energy. As a parent of two, environmental issues are very important to me.

Sincerely,

Petra Paspalovski

Dear PUCO members,

I am writing to you because I am concerned about our environment and the causes of pollution in our beautiful state of Ohio.

This concerns the bailout of First Energy. (Case # 14-1297-EP-550) The bailout of companies with old, outdated, polluting technology benefits no one but the shareholders at the expense of investing in more efficient and renewable energy. What will we be leaving our children and grand children?

Please help in this matter.
Thank you for your time.

Sincerely,
Andrew M. Hassell

Public Utilities of Ohio:

Please do the right thing and listen to what FirstEnergy 14-297-EL-550 has to say about it will help Everyone not just the Risk. We old Seniors would like to finish up with that today's pollution all cleaned up. Thank You

Dear Public Utilities Commission of Ohio,

My name is Kristina Anderson, and I'm a 10th grader at Solon High School. I'm writing to you about the recent proposal by Duke Energy, AEP, and First Energy to get permission to raise consumer rates and use the profits to cover the costs of their outdated and inefficient coal plants; which you approved. Needless to say, I'm against these actions. I care about this issue because these plants are well beyond their prime, and they cannot compete economically or environmentally. A bailout of this old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy. My family and I care deeply about reducing toxic pollution and saving money on our electric bills; and with these coal plants that will not be happening. Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. Thank you for taking the time to read my letter, and please think about what I said.

Sincerely,
Kristina Anderson

Dear Sir,

Please deny any bailout for First Energy (case number 14-1297-EL-SSO) Because these coal burning plants are outdated and are polluting the state of Ohio. A bailout for these old and worn out coal plants will only burden the local citizens and business with higher utility rates which will drive out new and existing jobs. First Energy already has ratepayers paying for unfinished nuclear power plants and are making more money now than ever before.

Thank you

TO WHOM IT MAY CONCERN,

I am very against the RATE
INCREASE TO LOCK CONSUMERS INTO buying
Power from Ohio's oldest, DIRTIEST COAL
PLANTS.

A BAILOUT OF THESE PLANTS DOES
NOT BENEFIT ANYONE EXCEPT UTILITY SHAREHOLDERS
IT MEANS less money + more delays in
investing in efficient, renewable energy.

Please do not let these toxic plants
continue to operate at tax payer's expense
when our money could be invested in
renewable energy.

Sincerely,

PAROL Tackett

Dear Public Utilities Commission of Ohio,

Please do not allow these rate increases. There needs to be something done about the toxic pollution in Ohio and across the U.S.. Being in the top 3 states of extensive toxic pollution is unacceptable. We need to fix this without continually raising consumer rates.

Thank you.
