

Dear Public Utilities Commission of Ohio

A bailout of old, polluting technology only benefits utility shareholders and delays profitable investment in efficiency and renewable energy. It is not right to use the public's money for this. Also please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plant, this is unfair and unjust. My family and I care about reducing toxic pollution and saving money on our electrical bills. To benefit the generations to come. My family and I are active voters and we will be watching these issues closely. Please do the right thing for the people of Ohio. First Energy case 14-1297-EL-SSO need to be resolved for the good of Ohio and the environment. Thanks

Sincerely

Dan Morrell
