Commissioner Lynn Slaby

Dear Commissioner Slaby,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

These coal power plants are pumping out thousands of tons of soot, carbon and mercury pollution every day, harming me and many other Ohioans in the process. Newer technologies like wind and solar do not cause the kind of damage these old power plants will.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.
Technician SM Date Processed AUG 21 2015

Please do not approve FirstEnergy's plan to bail out First Energy's old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio in its path to build an energy future powered by clean energy.

Sincerely,

Ms. Gail Dunlap

Commissioner Lynn Slaby

Dear Commissioner Slaby,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

These coal power plants are pumping out thousands of tons of soot, carbon and mercury pollution every day, harming me and many other Ohioans in the process. Newer technologies like wind and solar do not cause the kind of damage these old power plants will.

Sustainable energy is the way to go. I do not think that we need to
two power plants to be fixed to "carry us over" to when
sustainable energy will be put into practice.

Please do not approve FirstEnergy's plan to bail out First Energy's
old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio
in its path to build an energy future powered by clean energy.

Sincerely,

Ms. Joan Lang

COMMENT DESCRIPTION:

Below is a copy of a partial Letter-to0the-Editor published in the Plain Dealer. It basically says it all in how I believe. "FirstEnergy wants Ohio to end deregulation, return to state-controlled rates," we learn FirstEnergy's new CEO Chuck Jones is picking up right where his predecessor Tony Alexander left off. Specifically, FirstEnergy continues to seek changes in Ohio's rules that would overcharge households for old, inefficient power plants. The company itself announced two of its facilities, Davis-Besse nuclear plant and W.H. Sammis coal plant, are not price-competitive on the open market. I ask that you deny First Energy's request. Thank you.
