Dear Sirs,

Please deny rate increases to lock customers in to buying power from Ohio's oldest & dirtiest power plants. My family and I care about reducing toxic pollution & saving money on our electric bill. I care about this issue because I am really fed up with us passing problems on to the next generation instead of being responsible in the way we treat our environment.

A bailout of old polluting technology only benefits utility shareholders & delays the inevitable investment in efficiency & renewable energy.

Sincerely,

Mary Sorensen
