Columbus, Ohio 43215

Dear Commissioners,

For several summers while in college I worked at a coal power plant as a chemical engineer intern. This was almost 30 years ago but I remember one thing clearly. The plant in Ohio was much dirtier, environmentally, than the one in Kentucky. You could see and smell the pollution wafting across the river. This was very frustrating because I wanted to do better but the company was happy with state minimum standards. You need to improve Ohio's standards. Let clean air and water for all the state be your legacy.

Please deny the rate increases that force consumers to use the dirtiest plant. To help these failing companies will only benefit the shareholders and delay an investment in cleaner renewable energy. Stand up for my children and grandchildren and demand better solutions.

Sincerely yours,

Rebecca Robinson

Greetings,

CONCERNING FirstEnergy case number 14-1297-EL-SSO

Isn't it time our utility companies should be forced to update and modernize, just as we have required of other industries? Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. Just as every other industry has HAD to modernize and become more responsible to the environment, our utilities are no exception.

A bailout for FIRST ENERGY only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy.

Sincerely

RE: Case No. 14-1297-EL-SSO
180 E. Broad Street, 13th Floor
Columbus, Ohio

To Whom It May Concern:

I am writing to you today with regard to FirstEnergy Corp.'s request for an electric security plan to lock Ohio consumers into buying power from inefficient and expensive coal plants. This plan should be rejected. The company pushed for deregulation years ago, and now that their facilities are no longer competitive, they are pushing for policy that amounts to a bailout.

I care about reducing pollution and moving forward with more sustainable energy generation. Allowing energy companies to force consumers to pay more for outdated and dirty coal plants is a step in the wrong direction. Doing so would only benefit utility shareholders, not the consumers, even in the long run. It removes incentives to invest in clean, efficient, renewable energy sources, which is what the people of Ohio need.

Thank you,

Nick Stoller

2503 Ranchvale
Cinci, OH 45230

Whoever it concerns at the PUCO,

The only benefit from propping up decrepit power plants is to the pockets of those who own them. I'm sure the employees who work there, while appreciating keeping their jobs, don't so much appreciate the ailments they come home with at the end of the day from working with coal burning machinery designed at a time when typewriters could be said to be "newfangled contraptions". The same can be said of those who live near, and are serviced by these plants. While they may appreciate the power they are getting, they probably don't appreciate having to breathe in the fumes bellowing from the plants smoke stacks.

By giving power companies like Duke and FirstEnergy money (that they desperately *don't* need) you're only stifling development, and teaching these companies that the future of their company lies in government handouts, not (job creating) technological advancement.

Nicholas Kilgore

8/21/2015

Public Utilities Commission of Ohio
180 East Broad Street
Columbus, Ohio 43215

Dear Public Utilities Commission,

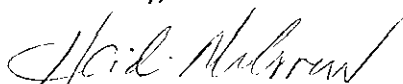

Before Governor Kasich's leaves Ohio for the White House, could you please put pressure on him to deny the rate increase to lock consumers into buying power from our state's oldest and filthiest coal plants?

With a family of four in our great state of Ohio, I care about reducing the toxic pollutants these plants are emitting into our breathable air. I am also concerned about the rising costs of our electric bills. How will our elderly citizens on fixed incomes keep up with these costs?

As you all well know, bailing out these old antiquated, air and water polluting plants only benefits the wealthiest Ohioans who have stock in energy companies. As an educator in higher education, I have used your commission as an example of how denying organizations such as Duke Energy and AEP requests for bailouts impacts all of the citizens in our community.

Delaying the investment in efficient and renewable energy is never good practice for any state. Unfortunately, Ohio's status in air and water quality continues to be one of the lowest in this country. PUCO, please don't allow our esteemed Governor to leave this state with this issue unresolved.

Sincerely,

Heidi McGrew

Voting Citizen

14-1297-EL-SSO

Sept 15, 2015

The issue of a bailout is an important one. Telling of how companies are taking advantage of consumers in order to cover their inadequate business decisions. Why must it always fall to the shoulders of hard-working people who in these hard times have enough to deal with without taking on big companies and their problems. I am appalled at our government allowing such inefficiently run companies to feel it acceptable to continue raising consumer rates to cover costs that have not been figured into the original business plans. Using insufficient means at start out of companies should later NOT be pushed upon consumers. Let the companies dig into their own pockets.

Regarding Case # 14-1297-EL-SSO

To Whom-it-may-concern,

We are an Air Force family (20+ years) with three young children. We have lived all over this nation. One of the reasons that I was happy to be stationed back here in Ohio (my home state) was to raise my kids in a less polluted area with educated environmentalists. We live here in Yellow Springs because I know that this is a town filled with environmental specialists as well as very environmentally conscious citizens.

That being said, I find it very disheartening that, in this day and age, with the vast amount of knowledge that our country has on pollution and air quality- we are still fighting this battle! Coal? Seriously?!

A bailout of antiquated polluting technology only benefits utility shareholders. How does this benefit the citizens of this state? How does this benefit my children?

In short, Pollution concerns me. Pollution concerns my entire family. I want my children to grow up breathing clean air. Ohio can do better than this.

Respectfully,

Kathleen Hamilton
345 Spring Glen Dr.

We support Ohio Citizens action

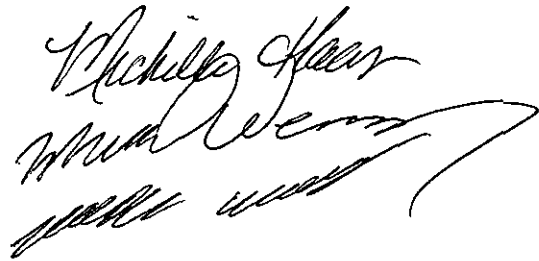

Dear Public Utilities Commission of Ohio,

Others and myself are opposed to purchasing power from Ohio's dirtiest, and need I say oldest coal mines that contaminate the air that the people, the peoples children, and ourselves breath everyday.

My family and I strongly support the need to reduce the toxic population in the air not only to save money on our electric bills that drip us dry, but to also make our skies and the air that goes into our lungs cleaner.

You should care about this problem because the people you lead every day in the great buckeye state of Ohio want a change for the better. It's sickening that colossal companies can get huge bailouts that only benefit utility shareholders which causes a delay in investment in efficiency and renewable energy.

Sincerely,
Your concerned Ohio citizen.

Public Utilities Commission of Ohio

180 East Broad Street

Columbus, OH 43215

Dear Commissioners,

This letter is written regarding Case Number for FirstEnergy 14-1297-EL-SSO

I am writing to sincerely request that the Commission denies the rate increases to bail out FirstEnergy.

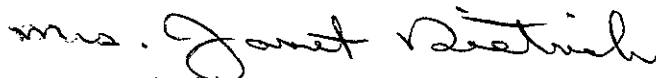

Their old and costly, dirty technology is becoming an obsolete source of energy. Ohio's citizens should never be held responsible for the problems and decisions made by these companies to continue their "dirty" energy production.

Ohioans, my family and I included, care about saving money on our electric energy bills and even more about protecting all of us from the harm that coal plants produce in the way of toxic pollution and climate changes. It has been proven that the savings in Ohio for health care would provide a bonus in this fight against dirty energy. Lung diseases, such as asthma, and many other health problems would be reduced dramatically to the benefit of Ohio's citizens' daily lives as well as the high cost of medical care.

We are far beyond the time that Ohio should be allowed to be forward looking and planning for a healthy, cost saving economy rather than dwelling in the past. We gave up buggy whip making when better technology and needs were developed. We need to do the same for dirty coal energy and pursue the efficiency and investment benefits of the many renewables that Ohio can provide.

Ohio had been a leader in the nation of renewable energy machinery production. Take us back to the lead rather than the tail end dwelling in the dirty past. Don't let utility shareholders be the only ones who benefit from old, polluting technology. Ohio citizens care!

Sincerely,

A handwritten signature in cursive script that reads "Mrs. Janet Dietrich".

Re FirstEnergy 14-1297-EL-SSO

I am in opposition to FIRSTENERGY 's bailout request. I care deeply about the urgent need to reduce toxic pollution for personal and professional reasons. I am Professor Emeritus of Pediatrics and Perinatal Neonatal Medicine at Cincinnati Children's and UC College of Medicine. Over the 40 years I have cared for thousands Newborn and Premature infants in Cincinnati , I have witnessed an increase Congenital Malformation resulting from intrauterine exposure to environmental toxins. Studies of Human Milk have shown the presence of environmental toxins in Human Milk the nutrition of choice for my little patients.

This issue is of utmost importance to the health of all of us and especially to the health and normal physical and cognitive development of our newborn infants and even more important to the tiny fragile preterm infants.

Please do every thing in your power as a matter of duty to protect our our environment and stop the FirstEnergy bailout request

Especially submitted

JEAN J. STEICHEN MD.

Public Utilities Commission of Ohio
please stop the First Energy
bailout.

Sincerely,

Kevin Habel

September 21, 2015

Dear Members of the Public Utilities Commission of Ohio,

I am writing to you to express my concern regarding the possible rate hike of my gas and electric cost.

Would this extra income be used by the utility companies for investment into Ohio's power plants to make them more efficient, or to develop new sources of renewable energy, or to lock me into buying power from old, inefficient coal plants that perhaps only benefits the utility shareholders?

Please deny the rate increase. I do care about reducing pollution and saving money AND NOT delaying investment in efficiency of our power plants. Please quit kicking the can down the road-for all Ohioans sake!!

Thank you for your consideration.

Cindy Dellinger, MD

Kettering, OH 45420

Dear Sirs,

First Energy

14-1297-EL-SSO

I am requesting that you deny the rate increase that will lock consumers into buying power from older and dirtiest coal plant.

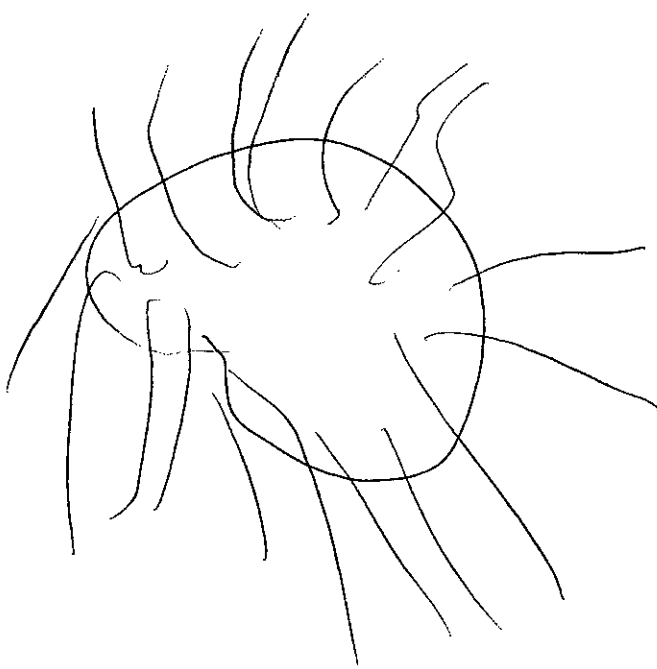

My family is concerned about reducing toxic pollution and we would like to save money on our electric bill.

I care about this issue because I do not feel responsible to bail out companies that have old and polluting technology. The shareholders have profited from ~~the~~ these companies. I feel they can use that profit to clean up the mess this technology has left us.

We should direct this investment into creating more efficient and renewable energy.

Re: First Energy Case # 14-1297-EL-SSO

To Whom It May Concern:

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy. Our children deserve for the adults in charge today, to make an educated and sustainable decision to reduce toxic pollution.

Thank you,

Dear PUCO,

My name is Neil Alexander Aldaz and I'm 11, my brother's name is Nathan Scott Aldaz and he is 14, and then my sister who is 9 years old and her name is Melanie Nicole Aldaz. We are writing this together, because we want consumers to stop buying from Ohio's oldest, dirtiest coal plants, and to bring in wind mills. My family and I care about reducing pollution and saving money for electric bills. I care about this issue because I don't like pollution and I don't want to breathe polluted air. Please consider this letter with a lot of thought, and bring in wind mills.

Sincerely,

Nathan, Neil, and Melanie Aldaz

Re: Please Stop the First Energy
bail out
14-1297-EL-SSD

As a healthcare worker of 20 yrs,
I am aware of the causative effects
of high pollutants in relation to
respiratory disease. We need cleaner
air for healthier citizens. We
are ranked in the bottom quarter
in regards to healthy Americans.
Cleaner air can be the start
of changing this.

Respectfully
Concerned Citizens

Dear PUCO

Please Deny rate increase
to lock Consumers into buying
power from Ohio's oldest, & dirtiest
Coal plants.

This is important to my
family and I because we would
like to reduce toxic pollution and
saving money on our electric bill.

Thank you

Commissioner:

This is a particularly timely issue considering the recent message of Pope Francis' concerning more responsible care of the earth. A bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy. I believe it is very important to put our environmental concerns in the forefront in order to leave a better world for my grandchildren.

Case # 14-1297-EL-SSO

First Energy

Public Utilities Commission of Ohio

We do not need a rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

The Thomas family and I care about reducing toxics pollution and saving on our electric bills.

I care about the issue because we all breathe the polluted air and of course like to save every penny we can. So a bailout might not be the answer.

Dear Commissioners:

For-profit corporations have been bailed out enough, while us middle class Americans suffer from the rising costs of utilities and necessities. That's why I ask that you deny the Duke Energy bailout, that would increase rates and without reducing pollution caused by coal. I'm asking on behalf of my children and future generations that we move forward towards renewable energy and stop bailing out very profitable corporations.

Sincerely,

Andrew Craig

FIRST ENERGY CASE NUMBER 14-1297-EL-SSO

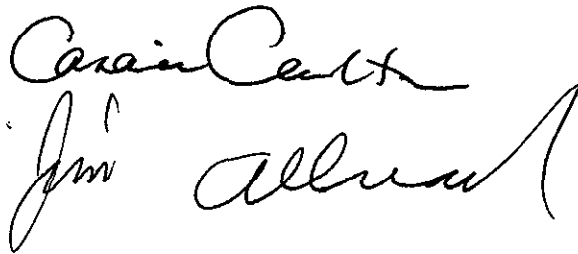

Please deny the rate increase to lock consumers into buying power from the outdated and inefficient coal plants owned by Duke Energy, AEP, and First Energy.

Forcing consumers to bail out these large corporations with rate increases, only benefits utility holders and delays inevitable investment in efficiency and renewable energy.

My husband and I are residents and registered voters in Ohio and we care about reducing toxic pollution and saving money on our electric bills.

Thank you,

Candice Charlton and Jim Allread

Dear Public Utilities Commission and Members of PUCO

I am writing you today as part of my objection for a bailout of Duke Energy, to continue to produce old, polluting technology that will only benefit members of their board of trustees.

I care too much for the future of my children and want Ohio to pursue clean methods of energy production.

Sincerely,

Tim Ludwig

Sep 27, 2015

Dear Chairman Porter,

Please say no to First Energy's request for us as consumers to pay for substantial subsidies for their uneconomic power plants.

I join others calling for First Energy to not be able to use its affiliates to block competition.

Our best interests are not utility profits. Our best interests, for the common good (so much more eloquently presented by Pope Francis) is clean, reliable, and affordable electricity.

Please reject First Energy's request. It is what is right for Ohioans and our environment. Thank you for looking into the Big Picture! Janice Flaherty
