Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH 43215

Dear Commissioners,

Please stop FirstEnergy's bailout request, case number 14-1297-EL-SSO.

Please deny the utility rate increase, and locking consumers into buying power from Ohio's oldest and dirtiest coal plants. Reducing toxic pollution and saving money on my electric bill are both important to me.

I care about this issue because I want to breathe clean air. A bailout of old, polluting technology only benefits utility shareholders, not citizens. A bailout will only delay the inevitable investment in efficiency and renewable energy, which we really need!

Sincerely,

Della Reams

PUCO

Please deny the rate increase
to bailout First Energy. Those
old coal-fired plants are
yesterday's technology and
we need to modernize -
not replace. The case # is 14-1297-
EL-550.

Mary Winn

PUCO

Please deny the rate increase
to bailout first Energy - case
#14-1297-EL-SSO. I thank
that we, in Ohio, need to
move to more modern
approaches to generate
electricity and abandon
coal.

Members of The Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH 43215

Dear Members of The Public Utilities Commission of Ohio:

Per case number: **14-1297-EL-SSO**.

As a former employee of The Babcock & Wilcox Company in Barberton, OH, I am very well aware of the intricacies and costs of manufacturing and maintaining equipment for the power generation industry. It is the responsibility of First Energy, as a business, however, to effectively and optimally generate power for its customers, which includes incurring and planning for the costs to maintain or effectively decommission outdated facilities. My wife and I urge you to push for the denial of the rate increase locking customers into buying power from Ohio's oldest and inefficient coal plants, which effectively delays the onus First Energy, and all power companies have of finding "better ways" to generate power yet again.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason E. Roberts" and "Dr. Amy P. Roberts" joined together.

RE: Rate Increases Requested by Duke Energy

To the Commission:

I am both a tax paying citizen of the State of Ohio and a rate paying customer of Duke Energy. As both citizen and customer, I write to ask you to use the influence and powers of your office to deny the rate increase requested by Duke Energy. My reason is simple: Duke needs to phase out its inefficient coal plant(s) as soon as possible. The increase being requested will only delay the inevitable and much needed modernization of their energy generating capacity. For the benefit of present and future Ohioans, let us not take the easy way out and grant this increase.

With best regards,

A handwritten signature in black ink, appearing to read "Warren L. Mason", written over the typed name.
