To whom It may concern

I am writing you today in regards to case #14-1297-EL-SSO for First Energy. My Family and I care about reducing the toxic pollution and saving money on our electric bill. I have children that are young and I don't want to destroy this planet for them. My husband and I have raised our children on respect, responsibility and giving to others. It is our responsibility to make this place better than what we found it and having power plants that our outdated and inefficient coal plants is not making it any better. Please deny the rate increase that locks in for me and my family to buy power from these insufficient plants. We have a responsibility to change the world for the better....do you ???

Sincerely,  
Tina Reynolds

RE: Case Number 14-1297-EL-SSO

Public Utilities Commission of Ohio

180 East Broad St.

Columbus, Ohio 43215

To Whom It May Concern:

This letter is to please implore that you deny rate increases that lock consumers into buying power from Ohio's decaying coal plants. We are on the cusp of a new frontier in energy acquisition and instead of bailing out outdated technology that only benefits the dinosaurs of the industry give us the option for cleaner safer renewable energy. Thank you for your time and consideration.

Sincerely,

Kimberly K. Peterka

Vice President, Akretep Inc.

Subj: Case # FirstEnergy 14-1297-EL-SSO

STOP THE FIRSTENERGY BAILOUT

Please deny THE FIRSTENERGY related rate increase that locks us into buying power from Ohio's oldest & dirtiest coal plants. We have selected providers of non-fossil-fueled energy for our residence; but FIRSTENERGY switched us to their source without our permission. Threatening to call PUCO got them to switch us back at their expense - and we were given a check for \$50. for our troubles.

Stop the bailout of old & dirty which benefits the HAVES at the expense of the HAVE NOTS!

Re: First Energy case 14-1297-EL-SSO

Dear Sirs,

Please deny the rate increase to First Energy. We wish to prevent consumers being locked into buying power from obsolete, polluting and inefficient coal-burning plants.

The rate bailout would only benefit First Energy shareholders, and not the families who desire less expensive, clean power via modern power plant technology, which would inevitably be delayed by the current rate increase.

Sincerely,

David and Christine Leachman

Columbus, Ohio 43215

- Please Deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.
- My Family and I care about reducing toxic pollution and saving money on our electric bills.
- I care about this issue because higher rates are a financial burden and the air quality in Cincinnati, as well as the entire state, is very poor. During the summer we are constantly under a smog alert. Due to pollution and allergens we rarely open our windows during the cooler days of Spring, Summer and Autumn.
- A Bailout of old, polluting technology only benefits the utility shareholders and delays inevitable investment in efficiency and renewable, sustainable energy.
- Case Number for First Energy 14-1297-EL-SSO

Sincerely,  
Robin Brenner

Columbus, OH 43215

Dear Commission:

I wish to express my interest in denying the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. It is not in the interest of the consumers or the environment to allow this to occur. The Case Number for First Energy is 14-1297-EL-SSO.

As a citizen I would like to see Ohio improve in their ranking for cleaner air. I feel it is possible to reduce toxic pollution, as other states have done, to improve air quality.

I care about this issue because I care about taking care of the world we live in. A bailout of old, polluting technology only delays investments in real solutions.

Sincerely,

  
Carla Daasch

Dear members of the PUCO,

I am writing to you today regarding FirstEnergy's application for a bailout to cover costs of outdated coal plants (case # 14-1297-EL-SSO), and to ask you to deny the rate increase. Raising rates to operate outdated plants will add a burden to ratepayers, particularly to the poor, for whom energy is a disproportionate share of spending. It will also hurt the environment by delaying investment in efficient power and renewable energy.

Thank you for your time,

Dear Members of the PUCO,

This letter is in reference to the PUCO Case 14-1297-EL-SSO. Please do not allow the energy companies of Duke Energy, AEP, and FirstEnergy to raise our rates in order to fund their outdated, inefficient, and polluting power plants. Please stay strong and act on behalf of all of the citizens of Ohio. We need to have the energy companies, specifically FirstEnergy at this time, work toward more efficient use of their current infrastructure, utilize innovative methods for how to provide clean and efficient power, and responsibly implement renewable energy generation. I implore you to continue to push Ohio forward into new frontiers and hold the energy companies accountable to the customers they serve. Please support the cause of the people to insist that our energy companies can do better and should do better and be fiscally and environmentally responsible.

Thank you for considering this matter and for your time in reading this letter.

Respectfully,

Melissa M. Metzger

To Whom It May Concern:

Please deny the rate increase  
to lock consumers into buying  
power from Ohio's oldest, dirtiest,  
coal plants.

Dear Pucc,

I live in Cincinnati and have recently heard about the proposed FirstEnergy bailout request.

That is quite shocking, to say the least.

I care about this issue because it's not

right to pass the costs of the technology upgrades

to taxpayers!

First Energy needs to step up to the plate

& replace their old & outdated equipment within

their own budget.

I look forward to your support on this

very important topic.

Regards, Mike Miley

Re: FirstEnergy 14-1297-EL-SSO

10/08/2015  
Oxford, OH

To Whom It May Concern:

I am a citizen of Ohio, a university professor and a mother concerned about the air quality in our state and about the future economy of Ohio.

Ohio is on the losing side of the race for renewable energy and present political decisions can impact the health of its economic system in the decades to come, as well as the health of its inhabitants. Its rates of lung cancer in non-smokers are the highest in the nation.

Please deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants. These plants cannot compete environmentally or economically. Supporting them is simply artificially supporting a system of energy production that is obsolete, relies on a fast-waning resource, and which is very polluting. A bailout of old technology only benefits utility shareholders and delays the inevitable investment in efficiency and renewable energy.

My family and I lived for the past year in Northern Germany and witnessed firsthand the amazing economic and environmental success of this country's turn towards solar and wind as sources of power. And if a Northern country like Germany can successfully secure a significant part of its energy from sun despite the average of 1500 hours of sunshine across the country, Ohio should be able to do at least as much, with its 2500 annual hours of sunshine. Investing in renewable energy is a long-term investment in the health of the environment and of Ohio's economy.

I care about this issue because I believe we all have a duty to think about long-term goals for our state – both in terms of the health of the environment and of the economy. PUCO has the moral duty but also the power to do something about both. Do not allow Duke Energy, AEP and First Energy to shift the cost of their outdated coal plants to us, the consumers.

Sincerely,

Public Utilities Commission of Ohio

Please do not ask for, or accept a bailout. Coal fired plants are an outdated and environmentally Short Sided. Instead of being a polluting industry, maybe you can invest in other sources of producing electricity.

Personally, I would be willing to pay more for electricity if it came from alternate sources.

Thanks for your time.

October 7, 2015

To the Public Utilities Commission of Ohio and To Whom it May Concern,

I am writing in support of Ohio Citizen Action's work on FirstEnergy 14-1297-EL-SSO. In particular, I write as a citizen concerned about both reducing pollution harmful to my family. Those who would favor granting financial assistance to older technologies do so only in the interest of shareholders, but do not act in the interests of those citizens whom you represent that would hope for an Ohio that invests in and leads the nation in efficient and renewable energy sources.

As a parent, I hope to see my child raised in a world where antiquated sources of energy, such as coal-fired power, are historic relics. It seems a shame to me that legislators would support rate increases that incentivize citizens to consume power from such sources. This is especially the case since renewable and more efficient energy sources are available that not only are cleaner and support a healthier future for Ohio, but also will ease the cost of electric bills and keep money in the pockets of hard-working Ohio families. That should seem a win-win to any legislator.

I appreciate your consideration.

Sincerely,

A handwritten signature in black ink, appearing to be 'Nathan S. French', written over a horizontal line.

Nathan S. French

Dear Gov. Kasich & PUCO

As a energy consumer, I am concerned about the rationale of the First Energy Bailout. Please consider using money to fund renewable energy initiatives and re-training coal workers rather than dumping money into outdated systems. ~~After~~ Unfortunately, new build may be more effective than costly repairs & renovations.

Let's use our bright minds to come up w/ a more promising energy plan than fixing a "leaking bucket" w/ a temp. patch. Please also keep in mind the future of our air quality & ~~our~~ personal economic state to make energy healthy & affordable.

Sincerely,  
Megan Sparks

Oxford, OH 45056

October 6, 2015

Dear PUCO ,

This letter is written to you by concerned citizens of the State of Ohio. It is in regards to Ohio's coal plants. These outdated and dirty coal plants have led to toxic pollution all over the state. Ohio is number 3 in the country, when it comes to toxic air quality and this is embarrassing. Instead, of allowing Duke Energy, AEP, and First Energy to raise their rates for consumers; so that they can continue to operate these outdated, inefficient coal plants, the state needs to look into renewable energy resources.

Being parents of three children, we worry about the long term effects of the toxic pollution on our family, from these coal plants. Please consider not supporting the bailout of these energy 'dinosaurs'. Investing in efficient and renewable energy should be the focus for the future. Keep Ohio beautiful!

Respectfully,

To: Public Utilities Commission of Ohio 10/5/15

The only thing that is truly free on this planet is the "air" we breathe, unlike the water we drink that needs to be purified do to all of the pollution that put in it. What we need are clean and efficient renewable energy systems so that we may live long healthy lives. Therefore I am asking the board to reject the increase rate from First Energy.

Thank you,  
Eric Barnes

Case # 14-1297-EL-550

60433 Hollyhird Dr.  
West Chester, OH 45069

Public Utilities Commission of Ohio

180 East Broad Street

Columbus, OH 432115

To whom it may Concern,

I am strongly opposed to the rate increases that lock consumers' such as I into buying power from Ohio's aging coal plants. My family and I care about reducing toxic pollution as well as reducing money on our electric bills. IN order to prevent this from happening I do not want you to support bailing out companies that utilize the old and polluting technology that only benefit the people with a direct invested interest in the company and not the general public. The support of the bailout also delays the necessary investments in efficiency and renewable energy.

Reference case # 14-1297-EL-SSO

Gentle People,

I am informed by Ohio Citizen Action of Ohio that First Energy has requested a bailout in the form of a rate increase. Please deny this request. The United States (and the world for that matter) must very quickly switch from fossil fuels to renewables, along with much conservation.

I'm serious enough about global warming that a year ago I had eleven solar panels installed on the roof of my home. At age 86, I know that I shall not live long enough to recover much of my cost. I'm just committed that much to the present and future health of the environment.

I'd like to see some commitment from industry. Please don't compromise with polluters.

Sincerely,

A handwritten signature in cursive script that reads "Joseph H. Wessling". The ink is dark and the handwriting is fluid, with a large initial 'J' and a long, sweeping underline.

Dear members of PUCO and Governor Kasich:

In regard to the FirstEnergy case number 14-1297-EL-SSO:

We write not just for ourselves, but on behalf of our two granddaughters, ages one and two, and their parents—our son and our daughter.

These four descendants of ours—and all their contemporaries—will be the future of Ohio and the United States of America. They deserve an Ohio that has rejected toxic pollution from outdated coal plants, an Ohio that is surging toward clean and renewable energy from wind, solar, and other clean-energy sources.

Please, please deny the proposals by Duke Energy, AEP, and First Energy to raise their consumer rates for Ohio coal plants. CONSUMERS WILL BE LOCKED INTO THESE LARGER AND NONBYPASSABLE RATES, EVEN IF (LIKE US) THEY HAVE CHOSEN RENEWABLE ENERGY PROVIDERS SUCH AS ETHICAL ENERGY (WIND AND SOLAR). Let us have progress! Coal is not the energy of the future. The unfortunate coal plant workers should be redirected and supported toward jobs in wind and solar energy, for which there is an increasing demand.

Investments in efficiency and renewable energy should not be held back by costly efforts to keep out-of-date coal plants working. No! That just further pollutes our atmosphere and costs Ohio more money! This issue, applicable to many states, belongs in the ongoing Presidential debates, and we will work to make that happen.

Please think of all our children and all our grandchildren, who have no choice but to live in the future that you are shaping.

Passionately,

Mariann and Richard Regan

RE: 14-1297-E2-SSO

10/1/15

Ohio PUC -

I am writing to you today to ask you to disallow rate increases to energy consumers as proposed, which will lock us into outdated and unclean (not to mention inefficient!) energy sources. They are terrible to the environment here in Ohio. I recently moved here from Portland, Oregon where I was employed for 6 years for a mid-american held utility. In fact, I worked as a regulatory analyst - building power cost production models + drafting testimony in 3 of our 6-state service area for rate cases + deferral mechanisms. I know, first hand, the challenges faced by energy producers + suppliers but I also know that allowing the current state to continue is not the answer. Please challenge the suppliers and producers here in Ohio to find a healthy mix of alternatives before requirements force them to go greener, as old facilities will only be more expensive.

Sincerely,  
Sarah Reed

Columbus, OH 43215

Dear PUCO,

I am writing today to ask you to deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. I am currently 9 months pregnant and I care about this issue because I want my child to have cleaner air and a cleaner environment in which to grow up. I was dismayed to hear how poorly Ohio was ranked in terms of air pollution! Denial of these bailouts of old, polluting technology is one step towards improving the situation. A bailout delays inevitable investments in efficiency and renewable energy. These investments can have long term benefits not only on our health and the health of our surroundings but also on our economy and future growth of our state.

Please deny the increase request from First Energy in case number 14-1297-EL-SSO.

Sincerely,

Jennifer McFarland

Public Utilities Commission of Ohio  
I'm writing you this letter with the  
Intent of getting your Assistance in  
helping Reduce the toxic pollutions in  
the Air, and helping us to Save money  
on our Electric Bill. This Increase that  
locks us into buying power from the  
dirtiest coal plants only benefits  
utility Share holders. This technology is  
polluting and delays the Inevitable Investment  
in efficiency and Renewable energy.  
Please help us to have more efficient  
energy sources and STOP the Pollution.  
So our children can sustain better quality  
of life through good health and can  
afford to pay our bills

Thank you

Sincerely A concerned Citizen

Vance Berger

To The Public Commission of Ohio -  
Please deny the rate increase  
to lock consumers as myself into  
buying my power from Ohio's  
oldest and fittest coal plants I  
deeply care about this issue  
so the community can breathe  
fresh air and save money on  
our electric bills.

Thank you,  
Rebecca Groves

Case # 14-1297-EL-SSD

Public Utilities Commission of Ohio  
180 East Broad Street  
Columbus, OH 43215

14-1297-EL-SSO  
PUCO:

I hope you'll take some time to listen to an Ohio citizen concerning an Ohio issue.

My family and I care about reducing toxic pollution while saving money on our electric bills. I personally have rates chosen from the lowest-priced suppliers, and I would not like to see my rates increase to keep outmoded coal plants open. I locked in rates, and have a contract/agreement with one of these companies, and it is an unfair practice to allow them to subvert this agreement by putting additional charges on my bill.

Would they allow me to reduce my payment because I had an outdated car or furnace? I hardly think so. So, I feel sure I speak for all Ohioans when I say: Deny the rate increase to consumers, and deny the bailout or "WELFARE" to utility shareholders.

It is rate increases like this that kill Ohio jobs. Small businesses would have to pay those increases, and homeowners would have to, and both would flee the state in droves as a result of this increase.

Thank you,

Bob Sullivan

A handwritten signature in black ink, appearing to read 'Bob Sullivan', with a long horizontal flourish extending to the right.

Regarding Case# 14-1297-EL-550

To the Public Utilities Commission of Ohio

Please deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants.

In these trying times, saving money anywhere in our budgets can be beneficial. Saving money on electric bills would not only help our pockets, but also the environment.

Thank You,

Richard M. Elton
