Columbus, OH 43215

Dear Sir or Madame:

I am writing to you in reference to FirstEnergy case #14-1297-EL-SSO in order to urge you to deny the rate increase which would lock consumers into buying power from Ohio's oldest, dirtiest coal plants. My spouse and I care about reducing toxic pollution such as mercury and about promoting clean energy from renewable sources such as solar and wind turbine electricity.

I care about this issue because I am a parent of six children and grandparent of three. I would like to address the expensive and toxic environmental legacy we are leaving for them to clean up.

A bailout of old, polluting technology will only benefit the utility shareholders and delay the investments they should be making in efficiency and renewable energy.

Sincerely,

Andrew M. Bramante

Dear PUCO,

Re: FirstEnergy case # 14-1297-EL-SSO

I care about this issue because I realize the old coal plants are causing pollution of mercury into our fish, & water. Please deny the rate increase locking consumers into buying energy from oldest, dirtiest coal plants. This only delays investing in efficient renewable energy.

Sincerely,

Ingrid Askenbeck

PUBLIC UTILITIES COMMISSION OF OHIO
180 EAST BROAD STREET
COLUMBUS, OH 43215

Dear Sir,

In regard to FirstEnergy 14-1297-EL-SSO, I urge you to deny the rate increase to lock consumers into buying power from these oldest and dirtiest coal plants in Ohio. Supporting these outdated, pollution-prone industries is non-productive. Please support investment in renewable energy.

SINCERELY,

A handwritten signature in cursive script that reads "Peggy Skelly".

Dear PUCO,

I am writing once again to say that you and Governor Kasich should deny the rate increase to lock consumers into buying power from the old, inefficient, and dirty coal plants in OH. (Referring to case number 14-1297-EL-SSO)

Funds should be put to use solely to finance the construction of clean and renewable energy sources. The time to finance non-renewable and high pollution energy is past. Please make your decisions with our present and, more importantly, future generations in mind.

Sincerely,

Roger Lampe

To Whom it may Concern-

Regarding case# 14-297-EL-558.

Please deny the rate increase ~~and~~ on power from old, & inefficient coal plants. A bail out for outdated technology denies a future of cleaner energy sources. ~~TH~~ Changes in technology for generating power will also create safer environments for workers and residents.

Dear Sir / Madam:

I am very tired of the "same old / same old" in our beautiful state. We have nearly the highest air + water pollution in the country and you are part of the reason.

I had to reinvent myself when I lost my job in my mid-50's. If I can do it, you certainly can too. Renewable is the way to go — stop being a dinosaur and thinking you will be preserved + protected!

Thanks,
Anne Holde
