Subject: IORY - N. College St. - Sabina (Clinton County), OH (RR# 14IORY06R/ DOT# 151935H / MP 66.19) - Increased Vertical Clearance

Please see the attached application and layout plans for the proposed warning device improvement in Sabina, OH. The plans call for new flashing lights and gates, to be controlled by the existing signal house as shown on sheet #2 of the plans. The railroad's contractor (to be determined) will install the cantilever and lights and gates, which will interfere with the existing overhead power in Quadrant A. DP&L will need to increase the vertical clearance at this location to provide 29' minimum vertical clearance from the top of rail.

Patrick Engineering serves as the Public Projects Consultant for the Genesee & Wyoming, which includes the Indiana & Ohio Railway Company (IORY). As such we will be your point of contact for this project. If you have any questions regarding this project, please feel free to contact me.

Thanks,
-Troy
