Dear PECO Appointed Member,

CASE# 14-1297-EL-SSA

I do not agree with any type of bailout for First Energy or any of the other energy companies. If they need to update outdated & inefficient plants, they need to use their current savings and not look to the public to pay for their profits of updating equip. etc. →

Increasing customer's bills is unfair and it depletes hard earned income for the average worker. The quality of air is important to me and my family. The energy companies are able to pay for their own upgrades. This is

America - be creative and stop adding undue funds onto us!!
Thank you,
Connie Hodson
