Dear Sirs:

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

My family and I care about reducing toxic pollution and saving money on our electric bills.

I care about this issue because it is critical to the preservation of our environment for all future generations.

A halting of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy.

Sincerely,

Thyllie J. Gelhoff

Dear Sirs:

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

My family and I care about reducing toxic pollution and saving money on our electric bills.

I care about this issue because the preservation of our environment is the responsibility of all citizens and is crucial for all future generations.

A handful of old, polluting technology only benefits utility shareholders and delays inevitable investments in efficiency and renewable energy.

Sincerely,

Jan C. Egelhoff
