Re: Case # 14-1297-EL-SSO  
Case # 14-1693-EE-SSO

Dear Sir or Madam;

I am writing to you this evening to request your assistance in ensuring cleaner air & water and more sustainable electric options that are affordable. As you know, every year people with upper respiratory difficulties suffer from smog, polluted air & infections during cold & flu season. Some ways that you can assist in ensuring improvements for our future generations are:

- Opposing the bailout of old, polluting technology which benefits utility shareholders
- Opposing the indefinite freeze of our clean energy standards
- Limiting pollution of our air & water to reduce illness & death both now & in the future.

12-3-2015

To Governor Kasich & Pucco

My family and I care more about this planet much more than saving a few dollars. We all need to stop what we're doing & reduce this toxic pollution! Not requiring ourselves to remain indifferent is key. We need to limit our dependency on coal & explore alternative clean energy. We need to do this because it's the right thing to do. Let's seek out clean options now & not have this generation leave a horrible legacy to the next.

Don't pass:  
14-1297-EL-SSO  
and 14-1693-EL-SSO  
End the freeze!

Sincerely,  
Aegean Mader

Case # 14-1297-EL-550  
14-1693-EL-550

Dear Gov. Kasich,

Merry Christmas and Thank you for serving.  
I am writing as a concerned citizen of the great  
state of Ohio.

My family cares about our environment  
and the careless way it is being treated.

We ask that you deny the rate increase that  
locks consumers into buying power from the  
oldest, dirtiest coal plants in Ohio.

Please oppose an "indefinite freeze" of our  
clean energy standards. And the continued  
"bail-out" of old technology. We need to push  
forward towards efficient & renewable energy.

Our home cares about reducing toxic  
pollutants. We do our part - please do yours!  
The Ohio River and Lake Erie are precious  
resources - please work to save them!

Columbus, OH 43215

Please stop the Bailouts and end the freeze for the utility companies for case numbers 14-1297-EL-SSO and 14-1693-EL-SSO. Ohio cannot move forward and grow if we bailout these old, polluting technologies. This only steals money from your citizens and puts it into companies that have done nothing to help our environment that all Ohioans live it and breathe in. Please, my family and I care about reducing toxic pollution and saving money on our electric bills. We believe in reducing our dependency on coal to reduce the mercury and other contamination from polluting drinking water in all of our lakes and waters. These reductions will also help with the expense of healthcare and our future.

Thank you for thinking of our health and our future as Ohioans,

Dear Madam or Sir;

Please stop providing funding to supplement outdated, polluting technology. It is a waste of dollars which would be better used to upgrade our technology to clean, renewable energy sources, such as the windmill farms of Indiana.

Please give the matter your deepest <sup>consideration,</sup> ~~consideration~~ and above all, do the math! An investment in our future is better than any supplements the government can provide.

Sincerely,

Ellie Hoffman

Case No. 14-1297-EL-SSO and Case No. 14-1693-EL-SSO

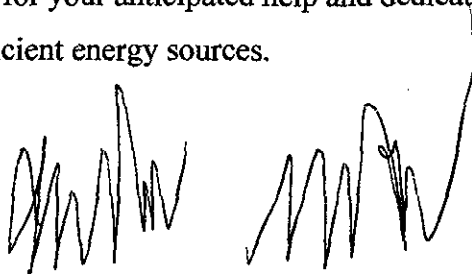

Greetings to the members of PUCO,

We are writing to ask your committed attention to the grave danger that the great state of Ohio finds itself in with pollution in our air and water. Ohio has old coal plants that emit some of the dirtiest and most polluted emissions in the nation. We would appreciate your assistance and consideration in opposing any "indefinite" freezes of clean energy standards. With the constant improvements in technology, it is necessary and possible for some of Ohio's greatest thinkers and innovators to offer new and improved standards of emissions. Climate change is a pervasive issue globally and Ohio can be a leader in preventing further pollution that increases warming and other negative effects on our environment. Investments in clean, efficient and renewable energy become one avenue to giving our children and grandchildren clean air and water. It would also be great to save some money on our constantly increasing utility bills. We would greatly appreciate everything you can do to prevent any bailouts of pollution-causing and inefficient utility companies. If we reduce our dependence on coal, we might also reduce toxic pollutants in our beautiful and fish-filled waterways, such as the Ohio River and Lake Erie. Children's allergies and other respiratory problems might also be reduced with cleaner air standards. We need to end the freeze and stop the bailouts.

Thank you in advance for your anticipated help and dedication to a clean environment, clean air, clean water, and efficient energy sources.

Sincerely,

Andrew J. Montour

RE: Case 14-1297-EL-SSO and 14-1693-EL-SSO

Dear Mr. Kasich:

Please deny the request for rate increases from Ohio's energy providers and oppose further freezes to clean energy standards.

Energy companies should invest in more efficient and clean energy production methods, encouraged by mandates from Ohio's government.

A rate hike will certainly just lead to retrofit and repair of existing coal and nuclear power production plants.

My family and I are concerned about the environment and our health to the extent that we oppose further investment in non-renewable "green" solutions to energy demands.

Kind Regards,

Re: Case # 14-1297-EL-SSO  
Case # 14-1693-EL-SSO

Dear PUCO Board Members,

I am taking time out of my day to communicate my opinion regarding our state's air and water pollution, climate change and the meeting held in Paris this very week, attended by world leaders, concerning this topic.

We have to work together to come up with a solution to decrease our dependence on coal for electricity. Freezing the state's clean energy standards does nothing but allow these big energy companies continue their assault on the environment. What good does freezing the standards do?

I was a young child in the 1970's when standards were put into place for clean water and clean air. I can only imagine that there was pushback for those standards, but in the end, they were important and what was morally right. I challenge each and every one of you to look at the big picture and do what is right for the long-term health and benefit of our state.

I can only imagine that you want the best for your children and grandchildren and a state with terrible air quality and polluted waterways doesn't cut it. Our state is geographically blessed to have the Ohio River to the south and Lake Erie to the north. Why do we want to put those natural environments at risk just to allow the big energy companies, some which aren't even headquartered in our state, make bigger profits? My family and I care about reducing toxic pollution AND saving money on our electric bills, and I think that they don't have to be mutually exclusive.

Please consider ending the freeze on Ohio's clean energy standards and setting the example for the rest of the nation to follow for a healthy environment. Let's work together to make Ohio a place where families would want to move for their children because of the environment.

Sincerely,

Kathy Szczur

Dear Public Utilities Commission of Ohio,

RE: Case Nos. 14-1297-EL-SSO & 14-1693-EL-SSO

As a life-long resident of Ohio, clean air is important to me. Clean air is important to all citizens of Ohio. Clean air is important to our combined futures. As a result, I would request that you:

- Deny the rate increase, which will lock consumers into buying power from Ohio's oldest, dirties coal plants.
- Oppose an "indefinite freeze" of our clean energy standards.
- Oppose a bailout of old, polluting technology, which will only benefit utility shareholders and will delay our investment in efficient and renewable energy.
- Reduce our dependence on coal for electricity, and in turn reduce mercury and other contamination from polluting drinking water from Lake Erie and the Ohio River.
- Limit pollution to our air so that we have fewer deaths and sickness, both inside and outside Ohio.

Thank you for taking the time to read this letter.

Warm regards,

A handwritten signature in black ink, appearing to read 'Melissa A. Mutter'.

Melissa A. Mutter

December 1, 2015

Public Utilities Commission of Ohio

To whom it may concern,

I am writing this letter due to the fact that I care about our environment now and for my children's children in the future. I am all for reducing toxic pollution and saving money on our electric bill and hope that you will deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants.

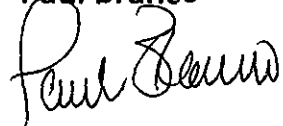

I am proud to say that I work for a company with a conscious. We were the first company to become Climate Neutral Certified, which means we emit a zero carbon impact on our environment.

I am also very health conscious, so limiting pollution to our air and water leads to fewer deaths and sicknesses for everyone inside and outside Ohio.

The case numbers to be addressed are: 14-1297-EL-SSO and 14-1693-EL-SSP

Thank you from a concerned consumer,

Paul Branco

Re: Case # 14-1297-EL-SSO  
Case # 14-1693-EL-SSO

We agree with the position taken by Governor Kasich that continuing to freeze Ohio's energy standards is an unacceptable approach.

We encourage the Ohio General Assembly to work toward a bill that will support a diverse mix of reliable, low cost energy sources.

We do not support the Energy Mandates Committee report that recommends a continued freeze on standards.

Sincerely,  
Cyril C. Lange + Roseann Lange

DEAR PUC, Ohio

RE: 14-1297-SSO  
1693

Please Examine

The Freeze Requested  
by A.E.P., Kyger,  
and Clifty Coal.

While They Stall.  
Interminable Mercury  
and toxic pollutants  
continue to be  
poured into the  
air and water.  
Please stop the freeze.  
Thank you

Frank Ricci

Governor Kasich and PUCO,

My family and I care about reducing toxic pollution and saving money on our electric bills. Please oppose an "indefinite Freeze" of our clean energy standards. Limiting pollution to our air and water leads to fewer deaths and sicknesses for everyone, inside and outside Ohio.

Please help,

Paul Fenech
