Subject: Reject FirstEnergy's proposal to keep old coal plants running

Dec 20, 2015

Chairman Andre Porter

Dear Chairman Porter,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

These coal power plants are pumping out thousands of tons of soot, carbon and mercury pollution every day, harming me and many other Ohioans in the process. Newer technologies like wind and solar do not cause the kind of damage these old power plants will.

Please do not approve FirstEnergy's plan to bail out First Energy's old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio in its path to build an energy future powered by clean energy.

Sincerely,

Mr. Joseph Ebanks

Dear Commissioner Slaby,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

I resent the fact that rate payers are being asked ONCE AGAIN to pay for the bad business decisions made by First Energy. This company spent MILLIONS of dollars to force the repeal of Clean Energy laws. Now they want us to shoulder the burden of this stupid move away from new technology. I do not want to pay for their old dirty plants that harm my health and that of my family by pumping out thousands of tons of soot, carbon and mercury pollution every day,

Please do not approve FirstEnergy's plan to bail out First Energy's old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio in its path to build an energy future powered by clean energy.

Commissioner Beth Trombold

Dear Commissioner Trombold,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

These coal power plants are pumping out thousands of tons of soot, carbon and mercury pollution every day, harming me and many other Ohioans in the process. Newer technologies like wind and solar do not cause the kind of damage these old power plants will.

Will we not stop learning about the health dangers in Coal. Over and over again starting at the mine level people die breathing emissions from coal, hot or cold.

Please, no more killing machines

Please do not approve FirstEnergy's plan to bail out First Energy's old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio in its path to build an energy future powered by clean energy.

Sincerely,

Mr. John McEvoy

Dear Commissioner Trombold,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

Now's the perfect time to use financial resources to build NEW and BETTER energy sources. As a consumer, I'd rather pay more every month towards building wind and solar resources than to save coal plants for the next 12 years. If not now, WHEN?

These coal power plants are pumping out thousands of tons of soot, carbon and mercury pollution every day, harming me and many other Ohioans in the process. Newer technologies like wind and solar do not cause the kind of damage these old power plants will.

Please do not approve FirstEnergy's plan to bail out First Energy's old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio in its path to build an energy future powered by clean energy.

Sincerely,

Dec 21, 2015

Commissioner Thomas Johnson

Dear Commissioner Johnson,

I'm writing today to ask you to say no to FirstEnergy's request for the PUCO to authorize substantial, customer-funded subsidies to bail out its uneconomic power plants.

With the new settlement, FirstEnergy's proposal went from bad to worse. Please safeguard market competition and reject FirstEnergy's proposal, so that a utility can no longer cross-subsidize or favor its affiliate companies in order to block competition. Approving the deal would send a clear message to Ohio's businesses, entrepreneurs, investors, and residents: We favor reigning power players and political clout over innovation and competition. Utility profits should not be placed ahead of Ohioans' best interests, and especially not at their personal expense.

If you believe Ohio should have electricity that is clean, reliable, and affordable, please reject FirstEnergy's request.

Thank you,

Ms. Julia DiBaggio

Subject: Reject FirstEnergy's proposal to keep old coal plants running

Dec 20, 2015

Chairman Andre Porter

Dear Chairman Porter,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

These coal power plants are pumping out thousands of tons of soot, carbon and mercury pollution every day, harming me and many other Ohioans in the process. Newer technologies like wind and solar do not cause the kind of damage these old power plants will.

Please do not approve FirstEnergy's plan to bail out First Energy's old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio in its path to build an energy future powered by clean energy.

Sincerely,

Mr. Joseph Ebanks

Please safeguard market competition and reject FirstEnergy's proposal, so that a utility can no longer cross-subsidize or favor its affiliate companies in order to block competition. Approving the deal would send a clear message to Ohio's businesses, entrepreneurs, investors, and residents: We favor reigning power players and political clout over innovation and competition. Utility profits should not be placed ahead of Ohioans' best interests, and especially not at their personal expense.

If you believe Ohio should have electricity that is clean, reliable, and affordable, please reject FirstEnergy's request.

Thank you,

Commissioner Thomas Johnson

Dear Commissioner Johnson,

This is serious!

I'm writing today to ask you to say no to FirstEnergy's request for the PUCO to authorize substantial, customer-funded subsidies to bail out its uneconomic power plants.

With the new settlement, FirstEnergy's proposal went from bad to worse. Please safeguard market competition and reject FirstEnergy's proposal, so that a utility can no longer cross-subsidize or favor its affiliate companies in order to block competition. Approving the deal would send a clear message to Ohio's businesses, entrepreneurs, investors, and residents: We favor reigning power players and political clout over innovation and competition. Utility profits should not be placed ahead of Ohioans' best interests, and especially not at their personal expense.

If you believe Ohio should have electricity that is clean, reliable, and affordable, please reject FirstEnergy's request.

Dear Commissioner Johnson,

I'm writing today to ask you to say no to FirstEnergy's request for the PUCO to authorize substantial, customer-funded subsidies to bail out its uneconomic power plants.

The time is NOW to shift from fossil fuels to renewables. We cannot wait for a gradual shift - the cost is too high. Global warming and environmental pollution are reaching a critical tipping point.

With the new settlement, FirstEnergy's proposal went from bad to worse. Approving the deal would send a clear message to Ohio's businesses, entrepreneurs, investors, and residents: We favor reigning power players and political clout over innovation and competition. Utility profits should not be placed ahead of Ohioans' best interests, and especially not at their personal expense.

If you believe Ohio should have electricity that is clean, reliable, renewable, and affordable, please reject FirstEnergy's request.

Commissioner Thomas Johnson

Dear Commissioner Johnson,

I'm writing today to ask you to say no to FirstEnergy's request for the PUCO to authorize substantial, customer-funded subsidies to bail out its uneconomic power plants.

With the new settlement, FirstEnergy's proposal went from bad to worse.

Please safeguard market competition and reject FirstEnergy's proposal, so that a utility can no longer cross-subsidize or favor its affiliate companies in order to block competition. Approving the deal would send a clear message to Ohio's businesses, entrepreneurs, investors, and residents: We favor reigning power players and political clout over innovation and competition. Utility profits should not be placed ahead of Ohioans' best interests, and especially not at their personal expense.

If you believe Ohio should have electricity that is clean, reliable, and affordable, please reject FirstEnergy's request.

Thank you,

Dr. peter kibbe

North Royalton, OH 44133

Docketing Case No.:14-1297

Notes:

This caller states she received an email update from AARP advising her to call PUCO recording to leave a message that she was protesting the FE bailout case. She says the email notice says each customer's bill would increase by \$10.50 per month. She is on a fixed income and that would cause a hardship. She is opposed to this proceeding.

Please docket these comments in the case number above.
