#### QUESTION DESCRIPTION:

Hello I am writing in regards to the potential fee increase DPL wants to charge for line maintenance. Before I ask my question let me state I have also written the governors office in protest of this fee increase. As a person reading this who is most likely also middle class person who's budget is being continuously squeezed. I am sure you are Also annoyed that over half your electric bill is fees. DPL has abused customers for years before we were able to choose other energy providers and now that I can save a little money by choosing my electric provider DPL is trying to recoup there loses by requesting an additional fee. I am sure DPL has had increased costs because they are finally doing the maintenance they have neglected for years. Our service became so unreliable for many years that I had to install a very expensive backup system. The middle class is squeezed tight and has had to learn to live on reduced margins I suggest you tell DPL the same. Now to my question. I read that DPL has not had a fee increase in 20-25 years I beleive this is false in past research I have done. I believe that DPL was granted a fee increase no matter what name you want to put on it in just the past 5 years. Question. Has DPL been granted any fee increase or changes of any name, type, that could be even imagined by a customer in the past 10 years? The middle class is pleading that you do not allow DPL to nickel and dime us an further.

Please docket the attached in the case number above.
