Notarized Statement:

See attached Affidavit of Jonathan Winslow,  
Officer, South Field Energy LLC

On October 19, 2015, South Field Energy sought two waivers from the Ohio Power Siting Board's then current rules. By Entry dated December 1, 2015, the Administrative Law Judge granted both waivers. The waivers included: (1) a waiver from former Rule 4906-5-04(A) which required an applicant to provide fully developed information on an alternate route for a proposed approximately three and one-half mile transmission line and (2) a waiver from that former rule's requirement that the alternate route share no more than 20% of the preferred route. Note, the Board's rules have since been amended and these requirements are now found in new Rule 4906-3-05.

South Field Energy stated in its October 5, 2015 pre-application letter that it would also be requesting a waiver for submission of maps of final grades after construction required under former Rule 4906-15-04(B)(2)(a)(i). South Field Energy is not requesting that waiver for this application.

Very truly yours,
