PUCO

To whom it may concern

PUCO

My name is Zachary Sayles and I live in Lakewood Ohio. I am a avid fisherman and I am concerned about pollution in our local water. I feel reducing dependency on coal for electricity will reduce mercury and other contamination from polluting our local water supply. Please look into case Numbers 14-1297-EL-SSO and 14-1693-EL-SSO.

Sincerely

Zachary Sayles

1313 Summit Ave  
Lakewood, OH 44107

To whom this may concern,

My family and I care about what goes on in this world, affordable and efficient utilities are one of them. We need to utilize our water sources and keep them as clean as possible, we pay for that and have been paying for a long time. Manage the funds and the people involved plus increasing utility bills doesn't benefit anyone. Take the time to figure out how to get this done without asking for more money. In this day and age that is how America works!

Thank you for your time,

14-1297-EL-SSO

14-1693-EL-SSO

To Governor Kasich and the Public Utilities Commission of Ohio,

Ohio has been my home all my life and recently I have become aware of the issue of water pollution. Our dependency on coal pumps mercury and many other dangerous chemicals into our water systems. Reducing our dependence on coal would mean cleaner water for everyone and better overall health. Keeping our pollution low can help lead to less sickness and cleaner, less costly energy for Ohio. Thank you for consideration

Sincerely,

Logan

968 Continental Drive, Medina, Ohio

December 22, 2015

Public Utilities Commission of Ohio,

My family and I care about reducing toxic pollution and saving money on our electric bills. Reducing our dependence on coal for electricity reduces mercury and other contamination from polluting drinking water from Lake Erie and the Ohio River. Limiting pollution to our air and water leads to fewer deaths and sicknesses for everyone, inside and outside Ohio. Please oppose an "indefinite freeze" of our clean energy standards.

628 Lipke Ct.  
Medina, Ohio

14-1297-EL-SSO

14-1693-EL-SSO

To Governor Kasich and the Public Utilities Commission of Ohio,

Hey, just asking to reduce pollution in our air and water. Coal outputs mercury and lots of contaminants, polluting our water and making people sick, which is something that can be easily avoided. Energy with less pollution means cleaner water, better health, and a better life for everyone. If you could address these problems as quick as possible, that would really help the people of Ohio. Thank you for your time.

Sincerely,

Kelsey

---

This is a request to consider denying the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plans.

Please also consider on behalf of the citizens of Ohio moving away from our dependence on coal for electricity that will, in the end, have an impact on the amount of mercury and other contamination in our drinking water from Lake Erie.

Thank you for your Consideration,

Case Reference:

14-1297-EL-SSO

14-1693-EL-SSO

Dear Public Utilities Commission of Ohio

It is important for our communities in Ohio to be focusing on renewable energy, clean water, and clean air. Our clean energy standards need to exceed and lead in the fight against pollution and harmful energy waste. Please deny the rate increase to lock consumers into buying power from the old and dirty coal plants. In addition please oppose an indefinite freeze of our clean energy standards. Our communities need the information and access to alternative energy options that will aid us in reducing our dependency on coal for electricity. The reduction in coal dependency will reduce mercury contamination Ohio's most valuable and important resource, the fresh waters of Lake Erie and the Ohio River. My family and community want clean air and water and we need to work together to make Ohio the state every other state follows regarding energy standards. Thank you for your time.

Warm regards,

A handwritten signature in cursive script, appearing to read 'Lauren Stepek', written in black ink.

Medina, OH 44256

Public Utilities Commission of Ohio  
180 E. Broad St.  
Columbus, OH 43215

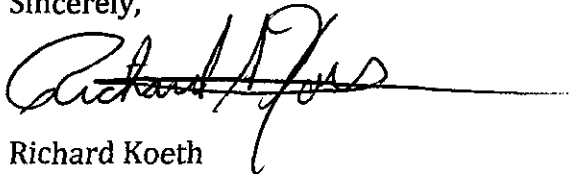

Dear Members of PUCO,

I write to urge you to deny the proposals filed by Duke Energy, AEP and First Energy to raise consumer rates in order to cover the costs of certain outdated and inefficient coal plants.

A bailout of old, polluting technology benefits no one except utility shareholders and keeps our region from investing in more efficient, renewable means of energy. It is much more important to my family to reduce pollution and save on our utility bills.

Also, reducing our dependence on coal for electricity would reduce mercury and other contaminants from polluting drinking water from Lake Erie and the Ohio River.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Koeth", with a horizontal line extending to the right.

To Whom It May Concern,

My family and I feel that steps must be taken to reduce our dependence on coal by taking the following actions (in reference to case numbers 14-1297-EL-SSO and 14-1693-EL-SSO):

- Deny rate increases that force Ohioans to purchase power from the oldest and dirtiest coal fired plants.
- Institute clean energy standards and oppose any action that might delay their implementation.
- Oppose bailouts of old, polluting technologies. Continued use of these technologies delays investment in more efficient renewable energy sources.
- Pollution from the use of outdated technology poses serious health hazards. Instituting clean, renewable sources of energy, such as wind and solar power, will reduce illness and death inside and outside the state of Ohio.
- Reducing dependence on coal for the generation of electricity will result in a reduction of the amount of mercury and other toxic substances that are now being released into our water supplies, especially Lake Erie and the Ohio River.

Thank you for your consideration in this matter.

Sincerely,

Dear Sirs,  
Limiting air and water pollution leads  
to fewer deaths and illnesses for Ohioans and  
our surrounding states. We have five grandchildren  
that we want to be able to grow up in a  
world that is a clean and non toxic as we humans  
can make it.

The use of coal and fossil fuels continue to  
foul our water and air. We need an energy plan  
that reduces the use of coal burning plants and  
uses renewable energy such as the sun and wind.

Please continue to mandate further  
reductions in our electric generation plants so that  
all of us can have healthier lives.

Sincerely  
Jay Galesky

Dear Members of the PUCO,

I am deeply concerned that the power utilities in Ohio still continue to use coal plants as a primary energy source. I have lived and grown up near the Stratton, Ohio power plant and have seen first hand the blight on the land and sky caused by the coal burning process. Adding insult to this problem is the idea that we should accept a rate increase to fund this mess.

The proposal by your administration that we should accept a "freeze" of clean energy standards to let power companies off the hook is a further insult. I care about the environment far more than the profit that these companies will receive if these proposals are passed. You should be more concerned with your constituents health and assisting them with saving money on their electric bills.

14-1693-EL-550

4033 Ashbury Dr  
Nolmstead, OH 44070

To Whom it may Concern, DUCC

Please deny the rate  
increase to lock consumers into buying power from  
Ohio's oldest, dirtiest coal plant. Cleaner, less  
pollution derived energy is more beneficial to  
everyone.

Sincerely,  
Crystal Matilyn

1632 Orchard Grove Dr.

Gentlemen,

I have raised a large family in Lakewood.  
We all come about to depend on your water  
and saving money on our electric bills.

Reducing our dependency on Coal for  
fuel reduces mercury and other  
contaminants from polluting our  
drinking water.

Thank you for your time.

Dear PUCO:

Why continue to be so  
old fashioned? Get rid of  
dirty coal & pollution and  
get going with a clean,  
renewable energy source!

also, I want you to oppose  
"indefinite freeze" of clean  
energy standards.

Thank You,

Rose Conjak RW-BC

Dear PUCO members....

14-1297-EL-SSO  
14-1293-EL-SSO

Please deny the rate increase to make consumers buy power from Old, Dirty coal plants.

I want new investment in efficient and renewable energy.

I don't want toxic pollution.

Save our drinking water in Ohio River and Lake Erie!!!

Limit pollution to air and water!!!

Thank you!

Linda L. Jurek

14-1693-EL-550

Public Utilities Commission of Ohio,  
Re: FirstEnergy 14-1297-EL-SSO

It is time to clean up the state of Ohio along the shores of Lake Erie. That is our drinking water supply. The technology is out there and we need to support cleaner methods of producing energy.

Please deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants.

My family cares deeply about reducing toxic pollution! We can no longer support these old, out of date, out of compliance plants, that poison our resources and in turn our bodies.

The time is NOW to stand together and make changes to make our energy source renewable and non-toxic
