**Subject:** Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Subject: Pull the Plug on Utility Handouts

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

**Sent:** Thursday, February 04, 2016 2:48 PM  
**To:** Johnson, Thomas  
**Subject:** Protect Ohioans from Utility Power Plays

Dear Commissioner Johnson,

First off, John K for president! Believe in his values and ability to look at the big picture.

Secondly, Senator Uecker what is your stance? You have seen a large power generator leave your area in D14 recently and the remainder will feel the burden of these PPA's, along with others.

Born, grew-up, and now raising my family in Ohio I have worked in Ohio (coal) power plants for 15+ years now as a part of a diversified company. I have directly been a part of investment strategies at 2 plants to keep them viable environmentally and financially and also at a large coal plant that has been retired as a piece of that strategy. As someone quasi- in tune with the power markets, and deeply affected by the proposals, I can say that the PPA proposals are a core undercut of the decisions made years ago to deregulate the state. The proposals in re-regulating some of the generators do not justify the impacts it is going to cost Ohioans and the remainder of the (Ohio) power industry that has found a way to compete. Competition is working; this is deregulation and progress to bring Ohio up to par!

1. AEP/FE new of these issues years ago and should have made investment strategies to keep their plants viable, not passing the bill to the rest of us. They made their own decisions on investment strategies and are merely working scare tactics and throwing around their weight.
2. Will some generators retire or struggle impacting jobs? With grid loading in Ohio flat due to efficiency and lack of industrial load, the fact is too that the generator must invest wisely and change with the times. What is fact is that some of the generation is owned by multiple parties whom have voiced no plans to retire them. Other jobs across the state will be impacted on the flip side of a PPA approval.
3. Grid reliability is not an issue according to the folks actually responsible for that. Judging by recent power price declines and competition, much driven by weather and gas prices granted, but power is available.
4. Subsidizing will stunt growth in not allowing new Ohio generators to be built; it will just hold us back if new generation is actually warranted.
5. Please further examine the market projections generated by AEP/FE they seem very outdate v. the dynamics that have occurred in the past 2 years. The proposed rates seem very inflated.
6. If the state is truly concerned about investment in Ohio and jobs, have Dynegy put the \$\$\$ where the offer is and build new gas generators. Their pricing proposal seems well rounded at half the cost of the FE/AEP... that should very frankly show how the state is being taken advantage of by big (regulated) businesses.

The State must act to protect the consumer, not big business. This is the charge that was made years ago with deregulation and we are either regulated or not, it is just that easy. Just recall some of the best performing plants in the state are not tied to a Company with mechanisms to obtain a PPA, and do not have a way to compete further with plants getting PPAs. You are possibly signing away the plants that have done what the state wanted us to do which was

to compete... that goes against science and natural selection, so who are you going to pick to be on your team? How about this... Hey Broncos, because Peyton Manning is older than Cam... you can have an extra player on the offense this weeked, nobody will mind.

**Subject:** Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

William Rost Jr.

**Subject:** Protect Ohioans from Utility Power Plays

Dear Commissioner Johnson,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Fred Grace

In a competitive market, with reliability controlled by PJM, AEP and First Energy are receiving additional compensation from consumers that they should not be allowed to pass along. This is not a regulated power market.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

**Subject:** Pull the Plug on Utility Handouts

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Joseph Ramsak
