Subject: Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Paul Riestenberg

Subject: Do the Right Thing for Consumers

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

Subject: Don't grant rate increases to AEP and First Energy

Dear Chairman Porter,

I do not want the cost of my electric bill to go up to pay for AEP's and FirstEnergy's aging power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas. Davis-Bessie is almost 40 years old and at the end of its safe operation. It needs to close down. It is an accident waiting to happen. Given that First Energy has poorly maintained this power station (and paid millions of dollars in fines related to its violation of safety regulations), it is time for Davis-Bessie to be put out of service. The W. H. Sammis Power Plant as of 2008 is one of the largest sources of air pollution in the nation. First Energy agreed to 1.1 billion dollars of upgrades to address air pollution violations after they lost at trial.

This is just corporate welfare at its worst! I should not pay for First Energy's poor management. It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars in profits already and paying large dividends to their shareholders. I don't want to bail them out. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Dear Chairman Porter,

This explains why FirstEnergy charged me \$300 for "misc charges" and then when I call to ask what the charges are for, the woman admits that they charged me money just because they wanted to charge me money, and I wasn't allowed to make payments on it, it had to be paid in full. Enough is enough!! FirstEnergy's CEO makes enough money, seek him out to pay my bill instead of attacking the disabled and laid off workers of America.

Subject: Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.
