Dear Commissioner Johnson,

Explain to me why I should help pay for inefficient, outdated coal plants that can't turn a profit?

Yeah yeah I know, they'd be in better shape if it weren't for EPA rules. Who knows, maybe its even Obama's fault. But it *doesn't change the economics; the future is not coal...and consumers shouldn't be paying for old plants that need upgrades just to compete for a few more years.*

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Subject: pro-AEP? I'll never vote for you again.

Dear Commissioner Johnson,

AEP are bloodsucking roaches. A vote for them is a vote from me you'll never get again.

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

Dear Chairman Porter,

AEP and FirstEnergy rate proposal is not fair to Ohio rate payers.

They put these assets into for profit subsidiaries to compete in the unregulated markets and earn more profits. They did not compete effectively compete and now want rate payers to guarantee profits for an unregulated subsidiary.

Shareholders and management should bear the costs of the market place. Plants closed if they are not economical.

Our power rates are already to high relative to surrounding states and need to come down.

Help improve our economy and create jobs -- do not support the First Energy rate plan.
