Subject: Please use some common sense and ignore the utility companies' scare tactics!

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Subject: Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Luther a new

Subject: Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Paul M. Pittmann

Subject: Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Danial J. Atzemis

Subject: Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Subject: Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Lisa Humrighouse

Subject: Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Mary Carr

Dear Chairman Porter,

I live on Social Security and utility increases could force me to not be able to afford my medication, health insurance, or basic living expenses. If I should expire because I can't afford my medication, medical insurance, or any other costs it takes to stay alive, then there will be one less person to pay any type of utility bill.

Subject: Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Bill Carney

Dear Commissioner Johnson,

I live on Social Security and utility increases could force me to not be able to afford my medication, health insurance, or basic living expenses. If I should expire because I can't afford my medication, medical insurance, or any other costs it takes to stay alive, then there will be one less person to pay any type of utility bill.

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

A prime example of First Energy's irresponsible business tactics is passing the cost of repair/replacement for their electrical supply equipment on to homeowners by soliciting electrical equipment maintenance insurance to their customers. Why should homeowners carry the burden of these equipment costs? Equipment originally provided by First Energy that has become outdated and they are no longer responsible all of a sudden. How surprising is that?? This is just what consumers have come to endure because of the monopoly and scare tactics of public utilities. Homeowners and taxpayers must fight back & say no more to "hidden" utility costs because of poor business management! P

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

Subject: Ignore utility companies' scare tactics

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts annd "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Michael H Billett

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

A prime example of First Energy's irresponsible business tactics is passing the cost of repair/replacement for their electrical supply equipment on to homeowners by soliciting electrical equipment maintenance insurance to their customers. Why should homeowners carry the burden of these equipment costs? Equipment originally provided by First Energy that has become outdated and they are no longer responsible all of a sudden. How surprising is that?? This is just what consumers have come to endure because of the monopoly and scare tactics of public utilities. Homeowners and taxpayers must fight back & say no more to "hidden" utility costs because of poor business management! P

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Please tell the PUCO to say "no" to the utility handouts. We don't need to reward bad management at First Energy and prop up its stock price at a cost to customers. Customers are promised an "if/come" by First Energy's management. We wouldn't be dealing with this if their management had correctly planned ahead. They haven't been a proactive bunch over the yrs. They simply ask for handouts once their policies don't live up to projections. I can't speak against AEP but I don't want to subsidize bad management at First Energy. Ohioans already pay a rate for electricity that is in the upper half of the 50 state range.

Subject: Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Robert Pelasky

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Please tell the PUCO to say "no" to the utility handouts. We don't need to reward bad management at First Energy and prop up its stock price at a cost to customers. Customers are promised an "if/come" by First Energy's management. We wouldn't be dealing with this if their management had correctly planned ahead. They haven't been a proactive bunch over the yrs. They simply ask for handouts once their policies don't live up to projections. I can't speak against AEP but I don't want to subsidize bad management at First Energy. Ohioans already pay a rate for electricity that is in the upper half of the 50 state range.

Subject: Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Brandon owada

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694 It's a shame with freedom of choice in so many utility's that over the 16 year's I have had to put up AEP lack luster performance all the while my neighbors 1/4 mile away have hardly ever had outages unlike us. We have put up with 15 outages in 3 months time when we first moved into there service area and when we complained there personel actually told us we should purchase a standby generator. We did which has saved us a lot of money over the years in not losing food products or freezing in the winter. When our power go's out it is almost always a minimum 4 hour outage and up to 3 day's. As stated before our neighbors on Co-Op rarely have any problems or extended outage. When we inquired with Co-Op about getting hooked up to there service 1/4 mile away and pay for the cost to do so they said because of PUCO area's they could not run the line to us or several of our other neighbors who are also tired of AEP crappy service. So what good is the PUCO they are obviously in AEP pocket. I guess if you cave into this bunch of BS then that will certainly be the proof.

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Subject: Protect Ohioans from Utility Power Plays

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Jean Fisher

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

If you allow this action to take place, then tell us how this is any different than a plastics company (for example) wanting tax payers in their district to pay for upgraded equipment in their plants. It should not be our problem that the energy companies, due to their corporate greed, did not invest their profits into maintaining and updating their equipment; this is what every other business must do.

Dear Commissioner Johnson,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

John Weingart

Subject: Protect Ohioans from Utility Power Plays

Dear Commissioner Johnson,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Brown's Stadium Name-Wastefull

Dear Commissioner Johnson,

The average home owner can't keep supporting large businesses and conversion from coal to gas or retrofits to make coal burn cleaner are business choices. They are expensive choices. They are good for the environment. I support the choices. BUT, these burdens should be made by their well paid shareholders. this is a sheltered monopoly and PUCO has an obligation to protect the public not First Energy's profits.

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Subject: Protect Ohioans from Utility Power Plays

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Joyce Bedrosian

Subject: Protect Ohioans from Utility Power Plays

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Joseph Neal

Subject: Protect Ohioans from Utility Power Plays

Dear Chairman Porter,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Dear Commissioner Johnson,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Dear Commissioner Johnson,

AEP and FirstEnergy are trying to hijack Ohioans' electric bills and demand billions of dollars in ransom from Ohio consumers to prop up their old power plants that they claim are losing money. I shouldn't have to pay extra charges to subsidize utility companies when I get no benefit in return.

Please protect hard-working Ohioans, seniors on fixed incomes, and small business owners from ridiculous and totally unnecessary rate hikes. Please tell the PUCO to put a stop to this corporate welfare.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Suzette A. Leininger

Dear Chairman Porter,

I earn honest paychecks working 2 jobs, without tax breaks and no assistance, I buy my own groceries, have my own Health insurance, and support my family, again without assistance. This is MY money! I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Mable Mullens

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Mrs. Virginia Martin

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

We have a gas furnace, gas dryer, and gas water heater and use mostly all highly efficient compact fluorescent and LED lighting. Despite all of our efforts to conserve energy our electricity bill is still nearly \$100 every month. We can't afford an electricity bill that exceeds \$100 per month.

The nuclear power plants are not run very cost effectively. There is very high turn over of workers due to difficult working conditions. Unplanned shutdowns are prevalent due to many single failure conditions. These shutdowns necessitate work shift changes that involve 12-hour nights and weekends in an attempt to address conditions caused by outdated plant control equipment. Continuous training that became mandated after nuclear industry plant accidents is so excessive it has become costly in terms of workers time and the overall cost of running the plant. Qualification of new workers can take up to two years of intensive training. This money would be better spent on updating and modernizing plant control equipment. An example of predictive maintenance that could be implemented is the use of accelerometers to monitor and detect changes in vibration due to wear of the bearings of large fans, motors and pumps. Senior workers that have been employed at the site for many years resist the implementation of new technology. However, this technology would increase the safety of, and reduce radiation exposure of workers who manually monitor moving machinery in an attempt to preclude future catastrophic failures.

Natural gas driven power plants only require about about 5% of the personnel compared to that required to operate a nuclear plant because of reduced overhead. Additionally, with natural gas fired plants there is no spent fuel to deal with that is costly to store and monitor on site. Yucca Mountain is no longer accepting spent fuel for storage. First Energy mentions investing in alternate clean energy but doesn't seem to commit very strongly to wind and solar energy. Coal fired plants are being shutdown, and hydroelectric power plants are being sold off. Despite the plentiful supply of natural gas, there doesn't appear to be any commitment to building of these modern, cost effective power generating plants.

Davis Besse is an example of a nuclear plant that was run with the extreme priority of staying online despite critical problems that existed with the reactor head. Management that was given bonuses to keep this plant online was not amenable to correcting issues and unsafe conditions cited by their workers.

Simply providing additional funding that would ultimately cost the consumer in terms of higher energy bills is neither an ethical nor an effective solution. First Energy should be required to implement a wide array of methods of power generation that include natural gas and renewable types such as wind, solar, and hydroelectric. Some consideration should be given to evaluating the extremely stringent EPA emission requirements of coal fired plants so that these plants can be operated in a reasonable and cost effective manner. In order for our electrical energy to be highly reliable especially during times of high demand such as the hot summer months, there must be a variety of means to generate power.

Sincerely,

Ronald Gliebe

Subject: Pull the Plug on Utility Handouts

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Valarie Sabatino

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

We have a gas furnace, gas dryer, and gas water heater and use mostly all highly efficient compact fluorescent and LED lighting. Despite all of our efforts to conserve energy our electricity bill is still nearly \$100 every month. We can't afford an electricity bill that exceeds \$100 per month.

The nuclear power plants are not run very cost effectively. There is very high turn over of workers due to difficult working conditions. Unplanned shutdowns are prevalent due to many single failure conditions. These shutdowns necessitate work shift changes that involve 12-hour nights and weekends in an attempt to address conditions caused by outdated plant control equipment. Continuous training that became mandated after nuclear industry plant accidents is so excessive it has become costly in terms of workers time and the overall cost of running the plant. Qualification of new workers can take up to two years of intensive training. This money would be better spent on updating and modernizing plant control equipment. An example of predictive maintenance that could be implemented is the use of accelerometers to monitor and detect changes in vibration due to wear of the bearings of large fans, motors and pumps. Senior workers that have been employed at the site for many years resist the implementation of new technology. However, this technology would increase the safety of, and reduce radiation exposure of workers who manually monitor moving machinery in an attempt to preclude future catastrophic failures.

Natural gas driven power plants only require about about 5% of the personnel compared to that required to operate a nuclear plant because of reduced overhead. Additionally, with natural gas fired plants there is no spent fuel to deal with that is costly to store and monitor on site. Yucca Mountain is no longer accepting spent fuel for storage. First Energy mentions investing in alternate clean energy but doesn't seem to commit very strongly to wind and solar energy. Coal fired plants are being shutdown, and hydroelectric power plants are being sold off. Despite the plentiful supply of natural gas, there doesn't appear to be any commitment to building of these modern, cost effective power generating plants.

Davis Besse is an example of a nuclear plant that was run with the extreme priority of staying online despite critical problems that existed with the reactor head. Management that was given bonuses to keep this plant online was not amenable to correcting issues and unsafe conditions cited by their workers.

Simply providing additional funding that would ultimately cost the consumer in terms of higher energy bills is neither an ethical nor an effective solution. First Energy should be required to implement a wide array of methods of power generation that include natural gas and renewable types such as wind, solar, and hydroelectric. Some consideration should be given to evaluating the extremely stringent EPA emission requirements of coal fired plants so that these plants can be operated in a reasonable and cost effective manner. In order for our electrical energy to be highly reliable especially during times of high demand such as the hot summer months, there must be a variety of means to generate power.

Sincerely,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Subject: Pull the Plug on Utility Handouts

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Mary Hartsock

Subject: Pull the Plug on Utility Handouts

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Danielle Everett

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Subject: Pull the Plug on Utility Handouts

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Jim Plemen

Subject: Pull the Plug on Utility Handouts

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Ray Blevins

Dear Chairman Porter,

Public utility or not, any 'for profit' and shareholder based company in the United States should take care of their own upgrades or improvements, from their own profits, as do all other companies, private or public, that operate for profit. If they can make billions of dollars profit each year, and pay shareholders (which I am one) sizable dividends (thereby looking favorable to their shareholders), then they can afford to pay for their own capital expenditures.

I owned my own company for years, and paid for my own equipment or building improvements or expansions, from my profits being reinvested...I did not go to my customers and ask them to 'foot MY bill' for those business expenses....they would have laughed at me.

I certainly don't expect my electric bill to increase for the sole purpose of paying for AEP's and FirstEnergy's old power plants. It's not my fault that these companies made a poor decision by waiting too long to invest in cheaper and cleaner power. Now they want me to pay for their management mistakes.

These giant utilities are earning billions of dollars and paying hefty dividends to their shareholders.....investment is a risk....let the shareholders pay by reducing their dividends and properly utilizing their profits to reinvest.

You need to stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

Thank you for hopefully doing the right thing for Ohio.

Subject: Pull the Plug on Utility Handouts

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Naomi M. Gibbs

Dear Chairman Porter,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Mark Hanna

Subject: Pull the Plug on Utility Handouts

Dear Commissioner Johnson,

I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

It's outrageous that my electric bill will go up while these giant utilities are earning billions of dollars and paying hefty dividends to their shareholders. Please stand up for Ohio consumers and tell the PUCO to reject AEP's and FirstEnergy's money grab.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

AL Holland

Dear Commissioner Johnson,

I earn honest paychecks working 2 jobs, without tax breaks and no assistance, I buy my own groceries, have my own Heath insurance, and support my family, again without assistance. This is MY money! I don't want my electric bill to go up to pay for AEP's and FirstEnergy's old power plants. The utilities claim they're losing money on their aging plants, and now they're demanding that consumers cover the cost of their bad decisions not to invest in cheaper, cleaner power, like natural gas.

Subject: What Ignore utility companies' scare tactics

Dear Chairman Porter,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.
