To: Johnson, Thomas
Subject: Governor Kisch

Dear Commissioner Johnson,

New, clean, natural gas plants are providing alternatives to old, inefficient plants that AEP and FirstEnergy want consumers to subsidize with rate increases. The utility companies have threatened plant shut-downs and warned that consumers and businesses will no longer have a reliable power supply, if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Don't fall for utility scare tactics! Please Tell the PUCO to say "no" to the utility handouts and "yes" to cheaper natural gas to fuel Ohio's future.

PUCO Case #s: 14-1297-EL-SSO; 14-1693; 14-1694

Sincerely,

Patricia J. Uyek

**RE: Opposition Comment to PPA Cases 14-1693-EL-RDR;
14-1297-EL-SSO**

Dear PUCO:

I am writing to urge you to act to reject the negotiated settlements of FirstEnergy and AEP (and a small group of others who have negotiated certain benefits) that will enable the utilities to implement costly Power Purchase Agreement (PPA) riders and other cost-driving provisions.

Should the PUCO approve the deals, both utilities will be able to collect costs (via non-bypassable PPA riders) from all of their customers to subsidize their uneconomical generation assets, thus protecting the utilities from cost risk and guaranteeing their profits and cost recovery. And put it all on the backs of their customers for an eight-year term.

Ohio's Consumers' Counsel has estimated that the FirstEnergy settlement could cost consumers \$3.9 billion over the eight-year duration of the PPA, and the AEP settlement could cost consumers \$2 billion.

Our company consumes approximately 16,381,149 kWh/year with AEP and 50,223,474 kWh/year with FirstEnergy. We estimate the additional costs of this new rider to be \$734,301 with AEP and \$2,504,645 with FirstEnergy over the eight year term of the case. That is real money that could be used on more productive purposes. For example, it would fund the opening of 10 new Sherwin-Williams paint stores in Ohio, which translates to about 60 new jobs.

If approved by the full PUCO, these deals will put an unnecessary and anti-competitive layer of costs on consumers with no commensurate benefits, constrain competition, and dampen technological innovation in Ohio. In addition, both settlements contain other provisions that will increase costs to consumers.

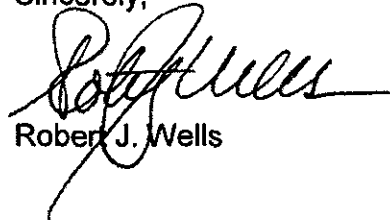

SHERWIN-WILLIAMS.

Public Utilities Commission of Ohio
February 22, 2016
Page 2

The markets for electricity in Ohio are working to the benefit of consumers. These deals are a massive setback to the consumer-friendly efficiency of those markets.

Please protect Ohio manufacturers and all consumers in FirstEnergy and AEP territories, the lion's share of the state in terms of utilities, from this substantial bailout/giveaway.

Sincerely,

Robert J. Wells

Aug 24, 2015

Commissioner Lynn Slaby

Dear Commissioner Slaby,

I urge you to reject First Energy's proposal to keep several old, dirty and uncompetitive power plants open. Their plan will not only burden customers with increased electric bills, but the plan is anti-competitive and will harm human health. Ratepayers should not have to pay for these old power plants just because these plants cannot compete with newer technologies like wind or solar power.

These coal power plants are pumping out thousands of tons of soot, carbon and mercury pollution every day, harming me and many other Ohioans in the process. Newer technologies like wind and solar do not cause the kind of damage these old power plants will.

Please do not approve FirstEnergy's plan to bail out First Energy's old, dirty power plants. Supporting FirstEnergy's plan will hurt Ohio in its path to build an energy future powered by clean energy.

Sincerely,

Ms. christine bruce
