Columbus, Ohio 43215
February, 26th 2016

I'm writing to as you to deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants and PLEASE, if you have ANY ethical grounding (which I sincerely doubt) oppose the indefinite freeze of our clean energy standards. Ohio is the laughing stock on the nation on so many levels when we speak of environmental concerns and this is just one more dirty deal that benefits no one but the politicians and their careers.

My family and I and many of our friends CARE about the environment and want to preserve it for our children. The fracking mess allowed to take place in this state is abhorrent and is Ohio's record on so many political and social issues that affect Ohio's children and most in need.

But I'm off track aren't I, this letter is meant to support case numbers 14-1297-EL-SSO and 14-1693-EL-SS

In hope that Ohioans will survive your political career,

-Nanette Yannuzzi

Dear Governor Kasich,

My family & I care about reducing toxic pollution & saving money on our electric bills. By reducing our dependence on coal for electricity reduces mercury & other contamination from polluting drinking water from Lake Erie & the Ohio River. Please oppose an "indefinite freeze" of our clean energy standards. Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

Thank You,

Case number

14-1297-EL-SSO

14-1493-EL-SSO

Dear Public Utilities Commission of Ohio,

I am writing to ask you to deny the rate increase to lock consumers into buying power from Ohio's oldest, least efficient coal plants. My family and I care about reducing our dependence on coal for electricity. A bailout of old, polluting, inefficient and nonrenewable technology only benefits utility shareholders and delays investment in efficiency and renewable energy. Reducing our dependence on coal for electricity reduces mercury and other toxic contaminants from polluting drinking water from Lake Erie & the Ohio River.

Please deny the rate increase to lock consumers into buying power from coal plants.

Sincerely yours,
Melissa Zwick
