PUCO

I am writing to state my complaint regarding FirstEnergy case 14-1297-EL-SSO. The issue I have is that I do not want to be forced to pay an extra charge to support FirstEnergy's old coal plants when I am buying my electricity from another provider. I do not mind paying FirstEnergy to distribute power to my house.

I thought that all companies build a reserve into their rates to provide for future costs to maintain their plants and keep them operating efficiently. If other companies can operate more efficiently or build more efficient plants, and offer better rates for their power, what has FirstEnergy been doing with its reserves that are part of the existing rates? I do not want to pay them extra to make up for their inefficiency and lack of financial planning, especially when I do not even get my power from them.

Respectively,

William Cronin

Ladies/Gentlemen:

This letter concerns Duke Energy, First Energy and AEP's efforts to force their customers to buy the electricity from their obsolete power plants at rates higher than the open market. They are trying to get the Public Utilities Commission of Ohio to let them stick it to their customers so that they won't have to upgrade their power plants. I am living on Social Security and am struggling to keep my head above water. What little savings I have are eroding away. I cannot afford a rate hike.

The case number for First Energy is 14-1297-EL-SSO. Please reject their request.

Sincerely,

A handwritten signature in cursive script that reads "Gary L. Plummer".

To the Public Utilities Commission of Ohio

I am writing to you to ask that you deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plant. We need clean renewable energy not pollution.

Janet Garrett

Hello!

I'm writing concerning the extra
raise for First Energy. My electric
supplier is Ohio Edison.

I am a widow living on a fixed
income and I don't feel that the
utility companies - namely First Energy
should get any more of our (other persons)
money.

I'm sure they are not hurting
the way it is.

Thank you,
Mrs Helen Mock

To whom it may concern:

We are a family of concerned citizens who care about the issue of renewable energy. Please deny the rare increase to prevent the consumers from buying power from Ohio's oldest, dirtiest coal plants. Ohio should be on the forefront of doing everything possible to save our planet. This little bit would go a long way.

Thanks

Dear Public Utilities Commission of Ohio
:

Please deny the rate increase to lock consumers into buying power plants from Ohio's oldest, dirtiest coal plants.

My family and I care about reducing toxic pollution and saving money on our electric bills.

I care about this issue because a bailout of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficiency and renewable energy.

Sincerely,

Columbus, OH 43215

Dear Commission Members,

As a new citizen of Ohio, I am concerned about reducing our dependency on coal as a source for electricity because using coal contributes to global warming and poisons drinking water from Lake Erie and the Ohio River.

I am also opposed to the indefinite freeze on Clean energy standards voted on in 2014 by Ohio lawmakers. These standards are important in improving the health of all Ohio citizens, which saves money in health care costs and missed work days for those with respiratory illnesses.

Please invest in renewable energy! Doing so creates jobs in healthy ways for all. Cases 14-1297-EL-550 and 14-1693-EL-550 are important and deserve your immediate attention.

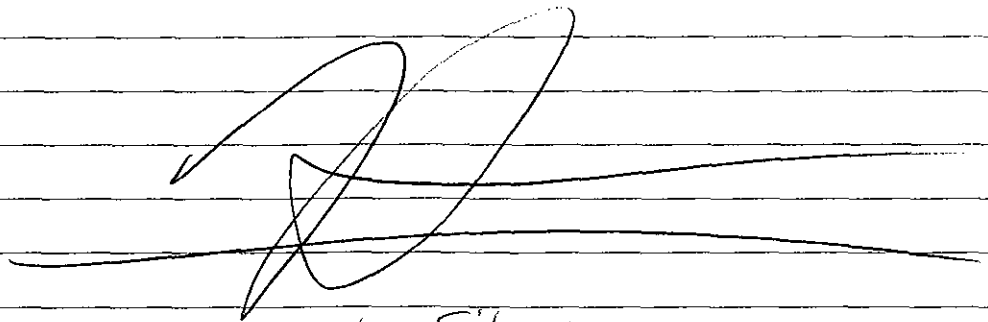

Sincerely,

Ron Fidham

Please deny the rate increase
to take consumers into
buying power from Ohio's
oldest, dirtiest coal
plants.

Joseph Siders

To Whom It Concerns:

I am writing this letter to let you know I strongly object to the raising of my W.P. & L. bill. When I first moved up here from Marietta Ohio I felt the bill was high compared to what I was paying there. They had all these extra charges such as riders, and I don't know what other charges that we never had there. I just can't believe my sons and daughters W.P. & L. bills. Sometimes they range \$600. That is terrible for these kids to have to pay such a high utility bill and ~~not~~ my 90 year old retired in-laws that are on a set income. Now many people out there are going to be effected by all these high utility bills.

Thank You
