re: 14-1297-EL-SSO, 14-1693-EL-SSO

re: clean renewable energy

To Whom It May Concern,

I am writing today requesting that you deny the above referenced proposals as these limit Ohio's ability to benefit from newer, cleaner renewable sources. Allowing these companies to continue to produce energy in this manner is costly to consumers, harmful to the environment, and does not give home owners choice in their energy suppliers.

Please do not allow the indefinite freeze on clean energy standards.

Sincerely,

Michael Stevens

First Energy # 14-1297-EL-550

Public Utilities Commission of Ohio,

Dear Sirs,

I care about reducing toxic pollution, and definately want to save money on my electric bill. I live on retirement benefits and the bailouts would financially hurt all of us.

Please Stop The bailouts and end The Greeye.

Susan M. Duncan  
1105 Garnea Dr.  
Cincinnati, Ohio 45231

To the Public Utilities Commission of  
Ohio;

This letter is regarding case # 14-1297-EL-SSO and 14-1693-EL-SSO.

We as voting citizens request that you stop the bailouts and end the freeze. Please oppose an "indefinite freeze" of our clean energy standards. Please deny the rate increase to lock consumers into buying power from Ohio's oldest dirtiest plants.

My family and I care about reducing toxic pollution and saving money on our energy bills. Limiting pollution to our water and our air leads to fewer deaths. On that note, please do not allow "fracking" in or around the state of Ohio. It causes much more pollution than is safe. I don't want the environment comprised for the sake of someone's profit margin.

Sincerely,

Sylvia B Roth  
3160 Boudinot Ave  
Cincinnati OH 45211

Feb. 17, 2016

A handwritten signature in black ink, appearing to read 'Holly A Riffe', is written over the word 'Sincerely,'.

Holly A Riffe

1541 Teakwood Ave  
Cincinnati OH 45211

Public Utilities Commission of Ohio,

Regarding case number 14-1693-EL-SSO:

My family and I care about reducing toxic pollution and saving money on our electric bills. Reducing our dependence on coal for electricity reduces mercury and other contamination from polluting drinking water from Lake Erie and the Ohio River. Limiting pollution to our air and water leads to fewer deaths and sicknesses for everyone, inside and outside Ohio. A bailout of old polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy. Please oppose and "indefinite freeze" of our clean energy standards, and please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

Sincerely,  
Dorothee Bouquet

A handwritten signature in black ink that reads "Dorothee BOUQUET". The signature is written in a cursive style, with the first name "Dorothee" in a more fluid script and the last name "BOUQUET" in a slightly more upright, blocky cursive.

Dear Governor Kasich,

Regarding case number 14-1297-EL-SSO:

My family and I care about reducing toxic pollution and saving money on our electric bills. Reducing our dependence on coal for electricity reduces mercury and other contamination from polluting drinking water from Lake Erie and the Ohio River. Limiting pollution to our air and water leads to fewer deaths and sicknesses for everyone, inside and outside Ohio. A bailout of old polluting technology only benefits utility shareholders and delays investment in efficiency and renewable energy. Please oppose and "indefinite freeze" of our clean energy standards, and please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

Sincerely,  
Sammy Saber

A handwritten signature in black ink, appearing to read "Sammy Saber", with a stylized, flowing script.

Dr. Ashley Lackovich-Van Gorp  
Dirk Lackovich-Van Gorp  
215 Whitehall Dr.  
Yellow Springs, OH 45387

Dear Public Utilities Commission of Ohio,

This letter is to express our concerns over environmental degradation in Ohio. Specifically, we are concerned by the freeze of clean energy standards and the bailout of polluting technology that delays investment in clean and renewable energy. We would like to ask you to deny the rate increase to lock consumers into buying power from Ohio's coal plants. As citizens of this state with two young daughters we express our support of investing into efficient, renewable and cleaner sources of energy.

With thanks,

A handwritten signature in black ink, appearing to read "Dr. Ashley Lackovich-Van Gorp". The signature is fluid and cursive, with the first name "Ashley" being particularly prominent.

Dr. Ashley Lackovich-Van Gorp

Public Utilities Commission of Ohio

Columbus, OH 43215

February 23, 2016

Dear Commissioners,

I briefly read the 8 page filing of the PUCO Case No. 14-1297-EL-SSO and wanted to express my concern over both the security of electric service in Ohio and potential subsidies/monopolies for the oldest, dirtiest coal fired power plants in the state. We need a utility rate plan that is kinder and gentler to the poor that encourages utility companies to stop polluting the air with mercury, sulfur and other contaminants that take a toll on the health of people in our state.

Let's look at the big picture and work toward cleaner, renewable energy that will enable the future prosperity, health, and overall success of all Ohioans. Granting favors to the shareholders and executives of utility companies is a bad political move. Act to force them to operate more efficiently and upgrade their outdated plants without doing it on the backs of Ohio citizens.

Sincerely,

A handwritten signature in black ink that reads "David Graham". The signature is fluid and cursive, with the first name "David" and last name "Graham" clearly distinguishable.

David Graham

Dr. Board,

I am writing you to protest the current energy plans for Ohio. I do not believe that the general public should be forced to buy energy from inefficient, out dated power sources such as First Energy's aging coal plants. I believe that the free market should drive future energy suppliers not forced government regulation. Thank you for considering my point of view before you vote on the Purchase Power Agreement with First Energy, Case # 14-1297-EL-SSO.

Kind Regards,

A handwritten signature in black ink, appearing to read "Beng Essl", written in a cursive style.

REF: First Energy Case Number: **14-1297-EL-SSO**

Dear Governor Kasich and PUCO,

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

I care about reducing toxic pollution and saving money on our electric bills.

I'm interested in this issue because, in my opinion, approving this rate increase is tantamount to a bailout of old, polluting technology that only benefits utility shareholders and serves to delay inevitable investment in efficiency and renewable energy.

Warm regards,

  
Terry C. Wuske

Stop the

First Energy bailout !!!

A Citizen !

2/23/16

Public Utilities Commission of Ohio,

My family + I care about reducing  
toxic pollution and saving money on  
our electric bills.

It is not safe or economical to use  
coal plants that are old + dirty, +  
can't compete.

It's not right to put the cost on the  
consumer; by increasing our rates, to cover  
the costs of using inefficient plants.

Consider This!

Time Sedgwick

Re:

14-1297-EL-550

My family & I have spent thousands  
of dollars & many more in medical bills.  
We have about the same amount of  
support as a family of 4. We are poor and need help.

Please Don't allow a privately held  
polluting technology. Remembrance of  
investment is when it is made. We  
should be investing! We should be  
further along. Like other States/Cities  
we have made advancements in the  
abstract. Can't wait for big businesses  
polluting with coal, trucks and other  
disruptive practices. We don't even know the  
prolonged damages we have done to  
our water, air, soil & selves.

Dear PUCO Commissioners

I am writing about the following case numbers: 14-1297-EL-SSO and 14-1693-EL-SSO. I urge you to please deny the rate increase that would lock us into buying power from Ohio's oldest and most ancient coal fired power plants. We have to be concerned about the health of our citizens and our environment here in Ohio, one of the most polluted states in the union. Why would you indefinitely freeze our clean energy standards? Why aren't we pursuing clean energy sources that are more efficient and less detrimental? We need to protect our precious water supplies including Lake Erie, the mighty Ohio River and all the other scenic rivers and streams in Ohio.

This is an important moment and these will be issues that surface time and again. I urge the commissioners to please act for the future of Ohio's people and environment. Why would we want to be forced to purchase energy from filthy mercury creating coal-fired plants? Why should coal company shareholders who have done nothing to move their plants into the future by making them less polluting get a payout when we need to be leading the energy producers into safer, less polluting directions?

Are you going to be in the forefront of the future or stuck in Ohio's acid rain past? My neighbors and I will be watching and waiting for your decision. We hope you will do the right thing and support the health of the residents and the environment of all Ohioans

Sincerely,

*Anne F. Bohlen-Watson*

Anne Bohlen-Watson

2/17/16

Dear D.U.C.O.,

I grew up in Cleveland Ohio when Lake Erie was polluted. I would hate to see this happen again!

I have enjoyed visiting the Ohio River as a symbol of underground railroad activity through the time of the Civil War. I would hate to see this symbolic landmark become polluted!

A cleaner Ohio is vital to keeping the present population safe and providing a place for our future population. This means that coal must be replaced by cleaner energy sources as soon as is possible.

Sincerely,

Aue J. Parker

2/17/16

Public Utilities Commission  
180 East Broad Street  
Columbus, Ohio 43215

To Whom It May Concern:

I am writing to ask that you stop the bailouts to coal companies and end the freeze. I am referring to case #'s 14-1297-EL-SSO and 14-1693-EL-SSO. Reducing our dependence on coal is crucial to improving our air and water quality in Ohio (our pollution record is nothing to be proud of) and it is important in addressing climate change. We also need at this critical time to be doing all we possibly can to invest in renewable energy. The threats which climate change makes to all of our lives means that we should not be putting a freeze on our clean energy standards - quite the reverse. I hope you care enough about the health of Ohio's citizens and about our future to take these steps.

Sincerely,

Dimi Reber  
180 Park Meadows Drive  
Yellow Springs, Ohio 45387

Please oppose an "indefinite freeze" of our clean energy standards, and deny a rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

Polly Miller

DEAR PUCO

I AM UPSET AT SOME OF THE DECISIONS BEING MADE ABOUT MY STATES ENERGY PLAN. THE RATES ARE UNSATISFACTORY FOR ENERGY THESE DAYS AND INSTEAD OF INVESTING IN MORE OLD FASHION COAL COMPANIES, HOW ABOUT YOU DO THE RIGHT THING AND BEGIN MASS INVESTING IN RENEWABLE ENERGY. THE SAILOUT IS ONLY BENEFITTING THE POCKETS OF THE ENERGY INVESTORS, DESTROYING OUR PLANET. PLEASE DENY THE RATE INCREASE TO LOCK CONSUMERS INTO BUYING THE RATES ~~FROM~~ <sup>FROM</sup> POWER COMPANIES RUN BY OLD TECHNOLOGY. LETS STEP INTO THE NEXT STAGE AND BECOME MORE ENVIRONMENTALLY RESPONSIBLE, SAFETY AND HEALTH IS MOST IMPORTANT AND IT IS BEING COMPROMISED. REDUCE DEPENDANCY ON COAL AND ELIMINATE CONTAMINATES IN OUR AIR & WATER. MAKE OHIO BETTER.

THANKS KINDLY

Rico Borker

Dear People,

**In re: case # 14-1297-EL-SSO and case # 14-1693-EL-SSO**

As mother of four and grandmother of five, I am very conscious of the necessity of cleaning up of the planet. Clean air is vital for all of us.

I have specific concerns:

1. Deny the rate increase which will lock us as consumers into buying power from out of date dirty coal plants.
2. Clean energy standards are essential. Support them.
3. Support investment in efficiency and renewable energy; don't keep putting money into out of date and inefficient technology.
4. Reduce toxic pollution and help us save money on our electric bills. Many of us are on limited incomes.
5. Reducing our dependence on coal for electricity reduces mercury and other contaminants in drinking water from Lake Erie and the Ohio River.
6. Pay attention to the fact that pollution in our air leads to costly and preventable illness and death in our citizens. Pollution in Ohio is carried beyond our borders. That is unconscionable.

Yours in community,

  
Laura Dreamspinner

**Re: Case Numbers: 14-1297-EL-SSO and 14-1693-EL-SSO**

Dear Commission,

I am very concerned about contamination to our water and air. I shudder to think what the future holds for the next generation if the pollution is not put and kept under control. It is way too high now and keeps getting worse. Our health is paramount.

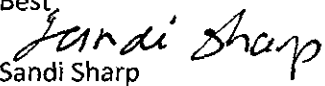

We as a state have a responsibility to create and maintain a healthy environment for ourselves AND to states around us.

Please, do not allow the rate increase that makes us buy power from coal plants.

And please, keep moving Ohio forward in regard to our clean water and air. An indefinite freeze would not benefit the citizens of our state.

Thank you for your time,

Best,

  
Sandi Sharp

Re: *Embracing Ohio's Technology Future*

Dear PUCO Commissioners:

Ohio is beginning to emerge from the nearsighted strategy that clung to flat-lined and sunset industries at the expense of our future. Policies that freeze clean energy standards, encourage continued dependence on coal that leads to polluted drinking water, inhibit the state's progress. They prevent our businesses and citizens from reaching their full potential.

Please support policies, such as rate increases and subsidies that relegate us to 19<sup>th</sup> and 20<sup>th</sup> century productivity.

Sincerely,

14-1297-EL-SSO

14-1693-EL-SSO

2.18.16

Dear Public Utilities Commission of Ohio,

Please Stop the High Energy Bailout,

Thank you,

Columbus, OH 43215

Dear Commission,

Your proposal to <sup>also</sup> increase to  
look consumers ~~up~~ <sup>up</sup> during peak from Ohio's oldest,  
dirtiest coal plants. We will oppose an "indefinite  
freeze" of our clean energy standards. Your bailout  
of old polluting technology will only benefit  
utility shareholders and delays investment in  
efficiency and renewable energy.

My family and I care about reducing toxic  
pollution and saving money on our electric bills.  
Reducing our dependence on coal for electricity reduces  
mercury and other contamination from polluting drinking  
water from Lake Erie and the Ohio River. We will  
have fewer ~~be~~ deaths and sicknesses for everyone now  
and future Ohio if you limit pollution to our air  
and water. Kindly reconsider your proposal.

Consumer Advocate  
Leone A. Carter

PUBLIC UTILITIES COMMISSION OF OHIO,

PLEASE DENY THE RATE INCREASE TO  
LOCK CONSUMERS INTO BUYING POWER  
FROM OHIO'S OLDEST, DIRTIEST COAL PLANTS.

IT IS VERY IMPORTANT TO ME AS A  
HOMEOWNER IN THE CITY OF CINCINNATI  
OF CINCINNATI, THAT MY ENERGY IS  
SOURCED RESPONSIBLY! I DO MY PART  
IN REDUCING TOXIC POLLUTION, BUT  
WHEN I AM LOCKED INTO "DIRTY ENERGY"  
MY CARBON FOOTPRINT IS JUST TOO  
LARGE! PLEASE CONSIDER.

SAVE THE CLEAN  
AIR THAT IS LEFT  
IN OHIO!

Re: Status - Energy Rate Increases  
Case # 14-1297-EL-SSD  
First Energy

Dear P.U.C.O.

As I have written to Governor Kasich, I write to the Commission regarding energy providers petitioning P.U.C.O. for the ability, by law, to pass rate increases to energy ~~users~~ users so the energy providers can support themselves in maintaining a profit while using their old outdated facilities. As a consumer, I have no one to protect my interests, but you. This rate increase is not justified especially considering all the many other rate increases you have provided to the energy companies.

Please deny this request. Encourage the utilities to rather invest in clean energy production, which will lead to a more profitable future for all in this great state of Ohio.

Thank you,

Bunny Horton

I am very concerned about the toxic pollution here in Ohio.

I was certainly not aware of this problem when I moved here just over a year ago. I would also like to save money on my electric bill.

A bailout of old, polluting technology only benefits utility share holders and delays enevitable investment in efficiency and renewable energy.

It seem like a simple decision to invest in new clean technology rather than sticking with something we know is toxic to us and our children when there is something new and clean available to us already.

Sincerely

From: The Campbell Family

As technology advances, we discover better means of providing energy. It forcing us, the citizens of Ohio, to buy more expensive means of energy when there are safer and cheaper ways to produce it, then it is simply for the sake of profits. Making money is a necessary action, but not if it is taking extra money from everyone in the state. Along with making money, saving money is just as important, especially for a middle-class family of six, like us. And seeing as Ohio only had a few weeks of winter this season as opposed to 4 months of it, I would say that global warming is a problem, and our environment is only going to get worse. The least we can do is help slow it. At the end of the day, we are going to have to buy these new, efficient, and renewable energies anyway. Delaying it will only cost more in the long run.

Re: FirstEnergy  
14-1297-EL-SSO

Dear Public Utilities Commission of Ohio:

Hello. As a citizen of this great state, I am writing you to express my concern regarding potential rate increases that are being presented to the PUCO. These rate increases are being requested to help older coal burner power plants to update their facilities.

Please deny these rate increases. These will lock consumers into buying power from Ohio's older, dirtiest coal plants. My family and I care about reducing toxic pollution and saving money on our electric bills.

I care about this issue because the outdated plants are the responsibility of the energy companies. Making effective capital improvements is part of the cost of being productive and efficient, and these costs should not always be passed on to the consumer. As a consumer I rely on the utility companies to make business decisions that make the best use of their assets.

A bailout of old, polluting technology only benefits utility shareholders and delays the inevitable investment in efficient renewable energy.

Please consider our future and the efficient use of the resources this earth provides.

Thanks you your consideration.

Sincerely,

  
Gregory J. Schneider

Dear Public Utilities Commission  
of Ohio,

Please deny the rate increase  
to lock consumers into buying  
power from Ohio's oldest, dirtiest  
coal plants. It's been fifteen years  
something should be done. The power  
plant workers should not lose their  
jobs because the plants become closed.  
Thank you for your time in considering  
this difficult decision.

Sincerely,

Case no

"  
Public Utilities Commissions of Ohio  
"

Dear Sirs:

Please, deny the rate increase to lock consumers into buying power from Ohio's oldest and dirtiest coal plants. This bail out would only benefit the utility companies and shareholders. Duke, AEP + First Energy should have been investing some of their profits in upgrades, instead of asking consumers to bail them out.

Respectfully Yours

A.T. Wood 3

PUCO,

Please deny the rate increase  
to lock consumers into buying  
power from Ohio's oldest, dirtiest  
coal plants.

Help us

To whom it may concern,

2/25/16

The subsidy proposal amounts to FirstEnergy's concession that the affected plants can't compete in the state's energy market. That failure shouldn't be borne by ratepayers or employers who may be forced to choose between keeping jobs and paying higher energy bills....While President Obama's new Clean Power Plan focuses on renewable energy and enhanced efficiency nationwide, Ohio continues to move in the opposite direction and maintain its over-reliance on fossil fuels. The FirstEnergy proposal, if approved, would widen that gap.

**STOP THE FIRSTENERGY BAILOUT!**

Thank you,

Feb 25, 2016

Dear Sir

I am writing with concerns with all the information going around about how we, as consumers, are about to absorb the price for outdated power plants , as increases to our already escalating power bills

I am already struggling to pay all the current bills, let alone be weighed down with the updating required and needed to help with our environment and the continued toxic pollution attributed to out dated coal burning facilities

As a tax payer in the state of Ohio, I would like to see our government officials step up and be our advocates in this and other similar actions

thank you

RE: Case Number 14-1297-EL-SSO

To Whom It May Concern:

I am writing this letter to request your assistance to ensure that any Ohio energy providers that are relying on older, coal-based electricity generation and are requesting "bailouts" to remain competitive are denied the ability to mandate all of their customers pay to make these older facilities competitive with more modern facilities which generate less pollution.

While I do support all forms of electrical generation, I do not believe any forms should be subsidized or "bailed out". And while some basic regulation is necessary to protect the health of our citizens and environment, I also object to over-regulation that picks "winners and losers".

I ask your help to ensure a level playing-field for all forms of electrical generation, reduce over-regulation, and stop any bailouts or subsidies that interfere with a competitive free-market for cleaner, efficient electrical generation, as this will provide the best long-term benefits for both consumers' pocketbooks and the environment.

Sincerely,

Concerning case number: 14-1297-EL-SSO

Public Utilities Commission of Ohio,

As a person grows in years they begin considering their legacy. What are they leaving behind for their kids? What are they leaving behind for their community? What are they leaving behind for the world? That is why we are writing to you today.

As active participants of republicanism, we realize that it is the people's responsibility to elect representatives to consider these questions. It is a daunting job, and our respect and admiration for those that can earnestly perform their duties in office and reflect the will of the people is without equal.

The people are speaking, sir, and they are saying, "we need a clean Ohio." While coal production has been a strong tradition in our state, the lasting effects of its pollution cannot be ignored. There are viable alternatives such as wind and solar energy, which are more reality than science fiction.

I understand that this is not a black and white issue. Many jobs are dependent on coal production and coal is the lifeblood of many communities. We are empathetic to this life, but it does not have to be a constant. This is 2016, and dependency on fossil fuel production can be altered if not completely eradicated.

We are writing to share our opinions as American citizens and reflect what we consider the greatest principle of the Constitution: popular sovereignty. Ohio MUST not bailout energy companies who continue to produce energy in a fashion that is destroying our land and legacy. One letter might not mean much, but please do not ignore the multitude of letters you receive on this issue.

Thank you for your time reading this letter and for your public service.

Sincerely,  
Nick and Kaylee Vose

February 16, 2016

Members of the Public Utilities Commission of Ohio,

It is infuriating to watch the government continue to place special interests & big businesses over the health & well-being of the people they've been elected to serve.

My family deserves a world that is going to last through the life time of my children; Ruby, aged 4½ & Tillie, aged 3. Instead, the continuing allowance of coal big business to dictate what regulations they adhere to, has placed us on a path of environmental ruin.

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants. Please oppose an "indefinite freeze" of our clean energy standards.

For MLK day at my daughter's preschool they have to complete an "I have a dream..." statement. Hers was: "I have a dream that the

Members of PNCO, my plea is that you  
choose legislative options that make her  
dream have any chance. Invest in the  
clean energy options & reduce toxic pollution.  
Those options have already been discovered &  
could be commonplace with your support.

Don't force my family to pay more for  
energy that is destroying our earth!

In direct reference to cases =

14-1693-EL-SSO

Thank you.

Tess Warner  
5114 Stewart Ave  
Cincinnati, OH 45227

Dear P.U.C.O.

In regards to Case # 14-1297-EL-550  
First Energy / Duke Energy request for a bailout  
From this point on First Energy & Duke Energy  
will be referred to as Duke.

Duke has had ample time to upgrade  
their facilities since 1999. Giving them  
a bailout will do nothing, but take more  
of Ohioans hard earned money. Most  
Ohioans I know work pay check to  
pay check. A rate increase would be  
detrimental to there already stretched  
and fragile budget.

Duke then basically ~~then~~ threatens  
to retire (close down) these facilities  
if you do not comply with there  
demands. This will result in Ohioans  
being out of work

In the past 16 years Duke has  
done little / nothing to improve the  
situation with these facilities. We  
the consumers have received a

rate increases on a yearly basis.

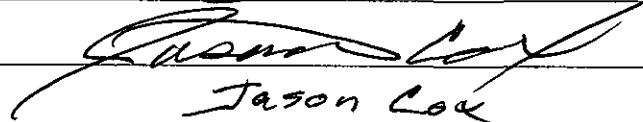

So before we let them increase our Energy bill, let them show us a bit of good faith, by taking "some" of their profits and actually build a new modern renewable energy facility

I have a 13 year old son and this issue really hit home it is up to us to make this world a better one for all ohioans sons & daughters.

In conclusion Please deny ' Case # 14-1297-EL-SSO, Ohioans Can not afford more rate increases & and pollution in our air & waterways and frankly neither can our Ecosystem

So slam the back door and make them take care of their responsibilities and stop making it ohioans problem

Thank you for your Time

ENJOY  
the little  
THINGS

PUCO,

Did the small, blue paper  
get your attention? Coal  
will run out. The sun will  
shine for billions of years.  
The wind will keep blowing  
Why don't we catch up with  
our European neighbors, and  
switch to renewable sources?

Stop prioritizing coal, and  
embrace the future! Make  
it easier, and cheaper, to  
choose renewable energy!

John Zinke

Dear Commissioners,

Let's all  
work together  
to stop burning  
fossil fuels  
& use more  
renewables.

Thanks,

Broed Parker

Case #14-1297-EL-SSO

129 W. Davis St

Yellow Springs OH

45387

Dear Public Utilities Commission of Ohio,

I Dave Johnson as a citizen agree with OCA. I have two young children and care about their future. The worst air pollution gets in Ohio. The harder its going to be on there health and mine. I live in a large house in Madisonville and would love any methods in getting my energy bill lowered.

Case # 14-1297-EL-SSO

My family & I Care  
about reducing toxic  
pollution and saving  
money on our electric  
bill.

You must deny the  
rate increase to lock

consumers into buying power  
from Ohio's oldest,  
dirtiest coal plants

PLEASE

14-1297-EZ-550

Ron Ferh

Puco —

STOP THE BAILOUTS AND  
END THE FREEZE

CINCINNATI, OH 45227

Wanted to write to ask that  
you please deny the rate increase  
to lock consumers into buying  
inefficient, polluting coal energy. Do not  
Bail them out! Think futuristically  
about having other cleaner energy options.  
Do not Bail out the case # 14-1297-EL:SSO  
First Energy needs to pay - not us.

Thanks!

Molly Lenke

To Whom it may concern,

I care about this issue because  
a bailout of old, polluting technology  
only benefits utility shareholders and  
delays inevitable investment in efficiency  
and renewable energy.

Thank you  
A concerned citizen of Ohio

PUCO:

Stop the 1st  
Energy Bailout

---

Case # 14-1297-EL-SSO

Please deny the rate increase to lock consumers into buying power from Ohio's oldest, dirtiest coal plants.

I care about this issue because I don't want to be locked into anything, and I am concerned about pollution and clean air and the environment.

Sincerely

Kristen Meere
