PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

AEP wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.50 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because AEP is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. I was one of the many people that LOST our reduced rate that was granted to us when we built our ALL ELECTRIC home and increased my rates by a lot. They now want to increase my rates even more. I am tired of the rates always increasing. WHAT HAS HAPPENED TO THE CHEAP POWER WE WERE GOING TO GET WHEN THEY BUILT THE NUCLEAR POWER PLANTS. The power companies are flat out ripping us off and it needs to be stopped.

As a constituent and a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. GEORGE PETROFF

MAILING ADDRESS:

- (NO CITY?) , Ohio (NO ZIP??)
- USA

PHONE INFORMATION:

- Home: 419-483-42901075 West
- Alternative: *(no alternative phone provided?)*
- Fax: *(no fax number provided?)*

E-MAIL: miller1075@aol.com

INDUSTRY:Electric

ACCOUNT INFORMATION:

- Company: Ohio Edison/First Energy
- *(no account name provided?)*
- *(no service address provided?)*
- *(no service phone number provided?)*
- *(no account number provided?)*

COMPLAINT DESCRIPTION:

This is to register my strongest opposition to the rate increases requested by First Energy. This utility spent unwarranted millions of dollars for stadium naming rights (a monopoly!, not a competitive industry), while they failed to upgrade their operational capacity; they refuse to invest in new advances and technology upgrades to make their production more efficient; they continue to push dirty coal; they fight wind and solar programs, instead of working with the clean energy sector to form partnerships; they invested in worthless light bulb programs to foist on their customers at inflated prices; and the list goes on. People in rural areas who heat their homes with electricity were PROMISED that their electric heating rates would be affordable for the long haul. Retro-fitting many of these homes would cost thousands of dollars, sometimes beyond the value of the home; and contribute to the housing woes that Ohio is still experiencing. Raising electric rates to unaffordable levels would also lead to more abandoned homes to drive down housing values, neighborhood safety, and economic development. Please, please, please... do NOT allow First Energy to get away with this!

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Let them either make good on their threat or shut up. I say, let the free market do its thing. Either DP&L will be competitive or another option will present itself for consumers. Consumers must not be held liable for utility companies' failure to practice sound business principles. Nor should the consumer be forced to bankroll extortion in the form of exorbitant infrastructure upgrades of the power grid. Had such improvements been made regularly, the costs of bringing the grid and infrastructure up to modern standards would have been less expensive than the "emergency" we now face.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. P Bryslan

COMMENT DESCRIPTION:

Case docket 15-1830-EL-AIR I am writing this in regards to DP&L wanting yet another rate increase. Let DP&L stop WASTING money on advertising, I know who supplies my electric I do not need to see it on TV!! What a HUGE waste of money. My last bill almost 1/2 the bill was Delivery total. Please DO NOT allow yet another rate increase when DP&L is not spending money wisely. Again I do not need to see an ad on TV to tell me who supplies my electric , I get a bill every month to remind me.

Recipients •Commissioner Asim Haque •Commissioner Thomas Johnson •PUCO Chairman Andre Porter •Commissioner Lynn Slaby •Commissioner Beth Trombold Message Reject the FirstEnergy Bailout Dear PUCO Commissioners, * Personalize your message I'm writing today to ask you to say no to FirstEnergy's request for the PUCO to authorize substantial, customer-funded subsidies to bail out its uneconomic and dirty power plants. More and more parties -- such as the Ohio Manufacturers Association, Ohio Consumers' Counsel, and AARP -- are now opposing the bailout, but the utility giant and its expensive lawyers and lobbyists are pressuring Ohio regulators in these final days before a decision. Please safeguard market competition and reject FirstEnergy's proposal, so that a utility can no

longer cross-subsidize or favor its affiliate companies in order to block competition. Approving the deal would send a clear message to Ohio's businesses, entrepreneurs, investors, and residents: We favor reigning power players and political clout over innovation and competition. Utility profits should not be placed ahead of Ohioans' best interests, and especially not at their personal expense. If you believe Ohio should have electricity that is clean, reliable, and affordable, please reject FirstEnergy's request. Thank you,

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. William Nusbaum

No increases. On a fixed income and no COLA adjustments this year. Where are we suppose to get extra money? Groceries going up every day and you get less for your money. Can't keep up with inflation.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Its time to cut the fat. If this power company can't complete with the amount of excess power we have in our state then don't provided any subsidy for them. Lets get our electric supply from the lowest cost provider available & get rid of these inefficient power plants.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. Its a national grid that we are on, lets use the lowest cost provider.

Thanks,

Pete Robertson

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

Utility companies are threatening plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. Absolutely NOT! This has got to stop. I am tired of common folks not getting their bailouts and benefits, too. It is the time that we turn this around and make sure that people get lower rates and better service, not handouts where CEO's make hundreds of thousands of dollars and keep all this money for themselves so they can have elegant and lavish vacation homes, etc. Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future and there is no need for a bailout. Since when has corporate welfare been acceptable for the people who already have everything and people like us in the middle can hardly make it from day to day. If the government hands them this welfare, I will completely drop out of participating in this scam of a government and refuse to pay any more taxes. I will not accept my tax dollars going to any more corporations until the middle class has returned to a level playing field; this is another example of a rigged system and that is precisely what they are doing and it is disgusting. This goes for DP&L or any utility company making this demand.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO
Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

As a retired teacher, I am on limited income. I live modestly and substitute teach to make ends meet. I cannot afford an increased fee for DPL bills.

Why should I have to turn off a/c in summer and limit use of my heat in the winter when I have given my life's service to teaching Ohio's children and continue to do so?

Please limit handouts to Ohio's utilities.

Sincerely,

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. bryan gilbert

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

Gentlemen and Ladies,

I cannot afford more \$\$\$\$. I already keep my heat very far down in the winter as well as wear many layers of clothes; and keep my AC at least 10 degrees below the outside temperature during hot days.

In the winter my windows and some doors are covered with plastic, have added more insulation to the attic, keep drapery closed. I put a sun screener over south windows for summer heat and use fans to keep more air moving. What more can one do?

. More adjustments on either side of cold or heat will be detrimental to my health.

I urge you to do what you need to do to keep prices in line. Surely someone within the company can bring together the minds to fix your difficulties without taking down your customers. Sincerely,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

Although PUCO has historically favored energy providers over Ohio citizens, I hope that someday PUCO will turn around and start doing its job.

Who knows? Maybe today is the day.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mr. Wayne Weber

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

PUCO has permitted DP&L to continuously add recovery fees to our electric bill to cover expenses for storms and other issues.

It has reached a point where almost 30% of my electric bill is additional costs not associated with that month's electric usage. In winter months, this additional charge has exceeded \$120 by itself!

In addition, DP&L changed their itemized bill to a simpler format this past year "for the customer". All this did was further hide how much of our bill is recovery fees.

A few years ago I attempted to find out exactly what recovery fees I was being charged and how they were calculated. After three months, no one at PUCO or DP&L could find the answer.

PUCO was not created to service the utility companies, but to also protect the consumer. However, in all my dealings with PUCO, the definite impression is PUCO is heavily biased in favor of the utility companies.

I recommend that DP&L be required to cut their stock dividends before the public consumer is forced to cover this charge.

As a consumer I feel it is time to take action. Please stand with Ohio

consumers and say "no" to the utility bailouts regarding PUCO
Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

I am retired. I live on a fixed income. It's time that the utility companies learn to operate within their own means and stop looking to the gov't to bail them out. The gov't doesn't help me! I have to live within my means and do not have a penny to spare to bail out a company who cannot live within theirs.

Enough! No more bailouts!

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

PUCO Chairman Andre Porter
OH

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future. Why are we rewarding bad behavior?

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Mrs. Gayle Sampson

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

The costs increase every year, and every year, I have to adjust the thermostat more to make up for the increased cost. This winter was so painful with my arthritis that I had to live in the bedroom of my house to be warm enough to make it bearable. I did not receive a cost of living increase yet everything I have to pay for is increasing. Utilities should NOT be able to pass everything on to the customer.

Now I also heard that utilities want additional charges to protect from stock market changes as well. I am against this as well.

Also, I have a surcharge on my monthly bill for all of this recovery stuff yet no one, you or the company, can give me a breakdown of what is in that charge. If they can't figure it out, how do we know they are charging correctly? As consumers, we have a right to transparency. It is the law.

I will be lobbying with Governor Kasich and our congressmen as well because it doesn't appear your agency follows the Consumer Protection laws.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

Sincerely,

Ms. Barb DuPont

Dear PUCO Chairman Porter,

Dayton Power and Light (DPL) wants me to subsidize inefficient power plants with rate increases that can cost consumers \$10.00 a month and thousands over the life of the deal. Older Ohioans, especially those with fixed incomes and no Cost Of Living Adjustment (COLA) this year, should not be stuck with the bill because DPL is not competitive, nor should we bail them out on our backs.

The utility companies have threatened plant shut-downs and have warned that consumers and businesses will no longer have a reliable power supply if they don't get handouts paid for by consumers. But Ohio's power grid operator and multiple experts have said that Ohio has plenty of power generation for the future.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.

dp& I should use the money they spend on air shows, quit sending men and equipment all over the country to help other states.

As a consumer I feel it is time to take action. Please stand with Ohio consumers and say "no" to the utility bailouts regarding PUCO Case Numbers: 14-1297-EL-SSO; 14-1693; and 14-1694.
