Public Utilities Commission of Ohio

I'm writing in reference to case # 14-1297-EL-SSO. Thank you for reading my letter. I hope you will consider working toward eliminating coal as an energy producer and work toward using cleaner, renewable alternatives. Tough decisions I'm sure, but choices made today can have a positive impact on our air and water quality for generations.

Thank you,

Kelly A. Combs

Dear PUC Membership,

Thank you for your letter of March 10, 2016.

We are writing you about

First Energy's Case # 14-1297 -

EL-SSO.

It is unfair to ask

Ohio consumers to pay rate

increases because of First Energy,

Duke Energy, and AEP's failures.

DO NOT ASK CONSUMERS

These companies should

take responsibility for the costs of

updating their own industry and

bringing it into the 21st

century, helping to "green up"

America, as they have needed to do

(over)

March 18, 2016

Dear PUCO,

Please deny the rate increase to lock consumers
into buying power from Ohio's oldest, dirtiest
coal plants.

Sincerely,

Steven N. Olyshansky

1822 HANFIELD

CINCINNATI, OH 45223

Dear Sir,

I am writing to express my opposition to the rate increase requested by Duke Energy, AEP and First Energy. I don't think consumers should be locked into buying power from aging, dirty coal plants.

It is past time to use our resources to invest in efficient and renewable energy sources.

Please deny the request in case number

14 - 1297 - EL - 550.

Thank you.

Charles Brown

1058 Donaldson

Dear Gov. John Kasich,

My name is Corey Pride and I am writing in regards to case number 14-1297-EL-SSO. The need for efficient and more sustainable living is now.

2015 was one of the hottest years on record.

The amount of pollution being dispersed into the environment is absurd and unsettling.

After all it has been years since we've had enough snowfall accumulation for kids to go sledding. When it does snow it's dirty, slushy, and rainy.

The money that would be used to bailout the old out dated sources of energy and power could and should be put towards creating sources of clean, non-polluting, energy such as solar & wind power. Maybe even funding a transition to compost & recycling facilities.

People need to start adapting a more permacultural mindset if we are to start making any real change in our environment and our ability to maintain an efficient and sustainable planet for our future generations to come. As one of the most brilliant minds of the past century stated.

"We cannot solve our problems with the same thinking we used when we created them."

Re: FirstEnergy
PUCO case no. 14-1297-EL-SSO

Dear PUCO,

I am an Ohio citizen concerned about pollution in our state. Please do not support the request of FirstEnergy, Duke and AEP for a "Purchase Power Agreement". These companies need to allow customers to choose electricity from providers who do not have outdated and inefficient plants. They should not be allowed to use PUCO to force customers to choose electricity from their plants. Also, PUCO should not approve a rate increase, as Ohio consumers are already paying enough for their electricity.

Please work to deny the rate increase and request for a "Purchase Power Agreement" requested by these companies. Ohio needs cleaner, more efficient electricity production. Not more of the same.

Sincerely,

A handwritten signature in black ink, appearing to read 'Carri Schneider', with a stylized flourish at the end.

RE: FirstEnergy case # 14-1297-EL-SSO

Dear Commission Members:

I am a molecular geneticist by trade and have become alarmed by the destruction of our ecosystem caused by the increasing human-caused temperature of the globe. PUCO has rightfully denied Duke Energy's request for a bailout, as well as AEP's original request for the coal plant bailout, and I humbly request that you continue to support these decisions. Coal burning is the single greatest contributor to the greenhouse effect and we need to rapidly reduce its use in generating our energy, supplanting it with a careful transition to renewable energy sources.

Respectfully,

Public Utilities Commission of Ohio

I want to take out time to express my concern in the first energy 14-1297-el-ss0 proposal for Duke Energy.

We should be supporting clean air efforts not supporting more companies that cause issues in the environment. I grew up in Iowa and when I go home and see all the wind generation turbines it shows the effort Iowa has put into clean energy. We need to do the same!

I have been to Alaska and seen the changing environment first hand. Please hold strong and do not assist companies that cause excessive pollution. I am not saying we need to close them down but we need to avoid tax payer dollars going to prop up their ability to make a profit.

Respectfully

Dear Sir/Madam,

Case Number: First Energy 14-1297-EL-SSO

I am writing to you to urge you to stop the bailout of FirstEnergy.

The use of coal plants in our day and age is ridiculous. Really – it's all about making money for the people involved with coal plants. Coal plants have absolutely nothing to do with being environmentally friendly to our earth or to human beings. Perhaps you do not care about our planet. But I urge you to think of your children's future; your grandchildren's future.

FirstEnergy does not need to be bailed out – FirstEnergy needs to be closed down, permanently! Please also stop any increase in rates to the consumer.

I trust you will do the right thing.

Sincerely,

Victoria Davis

Re: **FirstEnergy 14-1297-EL-Sso**

Dear PUCO,

I am unequivocally **opposed** to the Ohio Public Utilities Commission (PUCO) granting permission to Duke Energy, AEP, and First Energy in raising consumer rates in order to cover the costs of operating their dirty coal plants.

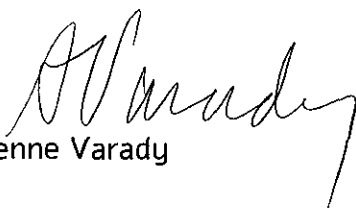

I care about this because my family already must cope with ambient air pollution here in the Mill Creek Valley. It's ridiculous that we are paying as much as we are for electricity that could and should already be produced by clean and renewable technologies. If PUCO supports these energy companies in their request, the State of Ohio will essentially be coddling corporations that must be prodded through competition to improve their services and behave in the Public Interest.

It shouldn't need to be explained already that besides emitting harmful pollutants, coal is a fossil fuel which when burned will release even more CO₂ into our atmosphere. Global warming is a reality and we don't want any more greenhouse gasses needlessly added to our planet's shared atmosphere.

I look forward to the day when we can generate our own clean power from renewable sources and are eager for these companies to evolve, stop emitting harmful pollutants from their old dirty coal plants, and stop emitting greenhouse gasses.

Please join me in opposing coddling corporate polluters and exercise some proper oversight in the Public Interest – not Duke/AEP/First Energy's interests.

Sincerely,

Adrienne Varady

Dear Governor John Kasich:

I am a life-long resident of Ohio, and I am writing to express my concern regarding the FirstEnergy case 14-1297-EL-SSO. I understand FirstEnergy is seeking a bailout at the expense of consumers. I am imploring you to deny their request for rate increases that will lock Ohio consumers into buying power from the oldest, dirtiest, coal plants.

My family and I care about reducing toxic pollution and saving money on our electric bill. I care about this issue because I am a pediatric health care provider and I believe toxins in our environment are contributing to the rise in many pediatric disabilities.

In conclusion, a bailout of old, polluting technology only benefits utility shareholders. Furthermore, it delays Ohio's investment in more efficient and renewable energy.

Sincerely,

Amy Drees

Loveland, OH 45140

FirstEnergy 14-1297-EL-SSO

Public Utilities Commission of Ohio,

I am writing to you in an effort to convey my strong request for a basic human right - right to clean air. Ohio air is commonly known as the "cause for bad allergies" and it's no coincidence that tourists and people who visit Ohio often go home unimpressed with how unclear our city air has become due to major coal plants, if not a full set of allergies!

Please - as a mom of a young child w/ upper respiratory issues, it's critical that we live in an area where the air is clean. It's time that we start doing what's right for the environment, our children's health - so that the future can carry on and thrive.

Respectfully,
Jordan Discher

Cincinnati OH 45223

Kevin J. Mason

3/18/16

case # 14-1297-EL-SSD

To Whom It May Concern:

I am writing today to ask that you deny Duke Energy's request for a railport which would increase consumer rates and essentially locks consumers into buying power from Ohio's oldest, dirtiest coal plants. There is a reason why the survival of these plants relies on a railport, and saving them would hold Ohio back from being a leader in green energy.

I care about this issue because the scientific evidence is overwhelming that climate change, which is man-made, is spiraling out of control. It is fueled by the continued use of dirty, outdated and now EXPENSIVE energy sources. I care not only about saving money on our electric bill but about reducing reducing toxic pollution.

A railport of old, polluting technology only benefits utility shareholders and delays inevitable investment in efficient and renewable energy.

Rachel Tree

Columbus, Ohio 43215

Case #14-1297-EL-SSO

Dear PUCO Members,

I am writing to you as a concerned Ohio constituent regarding FirstEnergy's bailout request. Please deny the rate increase, which would force consumers to buy energy from the oldest and dirtiest power producing coal plants in the state of Ohio. My family and I do our best to help reduce toxic and other pollution and are frugal with our own energy use.

I care about this issue because I want my children and grandchildren to thrive in a clean, energy efficient and future oriented world, not one reliant on energy produced by polluting coal-burning plants. A bailout of such antiquated and pollution producing energy sources only benefits shareholders, not the citizens of this beautiful state.

Please keep the focus on efficient renewable energy sources.

Sincerely,

A handwritten signature in black ink, appearing to read "Geraldyn Hoxsey Sparough", with a long horizontal flourish extending to the right.

Re: **PUCO Case 14-1297-EL-SSO**

Dear PUCO Board Members:

I am writing to urge you to deny the rate increase by First Energy according to the above case.

This increase appears to support the continued use of outdated coal-burning technology, with only vague inferences to improvement in infrastructure. In addition, the money committed to technology upgrades appears woefully inadequate to support a significant technology improvement.

Continuing to support this outdated technology is bad for the environment and would appear to lock us consumers into further rate-hikes needed to keep this outdated technology operating even as it becomes less and less competitive in the market place.

I would appreciate your support in denying this rate increase and pushing for a new, better proposal that reinforces long-term environmental friendliness and long term cost competitiveness.

Thank you for your consideration.

Case #

14-1297-EL-550

Clean environment and sustainable energy sources are beneficial to everyone. Clinging on to old, polluting technology delays the inevitable investment in efficient and renewable energy. I am interested in investing solar energy in my home. I hope the utility companies share the same interest. In the long term, clean energy investment will reward not just Ohio's environment, but also Ohio's citizens with leading technologies and quality jobs.

Re: FirstEnergy case number 14-1297-EL-SSO

Greetings,

I am writing to ask that you to deny FirstEnergy's bailout request. At this point it is clear that the best energy investments for the future, both environmentally and economically, are those in renewable resources. While bailing out the oldest and dirtiest coal plants in Ohio would benefit a small number of the state's elite, it would do so at the expense of the health and safety of all of Ohio's citizens. This bailout would further delay the inevitable changes in efficiency and renewable energy, putting the state at further economic disadvantage relative to its neighbors.

It's time to put the financial and physical health of the people of Ohio, and the future of Ohio's environment above protecting the profits of a handful of wealthy investors.

Thank you,

A handwritten signature in black ink, appearing to read 'D. Myers', with a long horizontal line extending to the right.

Dear Public Utilities Commission of Ohio;

I am writing to you because I am concerned about the high levels of toxic pollution that Ohioians are forced to breathe every day. It is imperative that Ohio starts to look at ways to incorporate renewable energy. We are particularly concerned with case 14-1297-EL-SSO. We care about this issue because we want our children to grow up breathing clean air and live in a healthy environment. If we just bailout old polluting coal plants, it just makes the problem worse and delays the investments we must make in renewable resources.

Thanks for taking the time to read the concerns of your fellow Ohioans and voting citizens.

Sincerely,

A handwritten signature in cursive script that reads "Bethany Federman". The signature is fluid and includes a long horizontal flourish at the end.

Regarding Case#: 14-1297-EL-SSO

As an Ohio resident, I would like to express my opposition to the bailout request by FirstEnergy, as well any consideration that might be given to consideration of an appeal by Duke Energy or AEP for a bailout.

I am a parent and everyone in my family, including my children, care about the environment and reducing toxic pollution. We want to save money and do not want to be locked in to buying power from Ohio's oldest, dirtiest coal plants.

Please consider the people of Ohio and put them, and the environment, first.

Thank you,

Lisa Stewart

To Whom It May Concern,

I am writing to respectfully request the denial of the First Energy's rate increase to lock consumers into bailing out their old, dirty Ohio coal plants. Not only is it unacceptable to force the public to pay a higher rate to keep old, polluting plants running, it's irresponsible and really some I can't believe is being considered. Our country sits on an abundance of natural gas as an alternative in addition to other more sustainable power technologies available. Raising prices to consumers to pollute our planet for the benefit of the few would be shameful.

Sincerely,

Case # 14-1297-EL-SSO

Dear PUCO,

As an Ohioian, I am very concerned about the First Energy Bailout Plan. While I am totally against natural gas from Fracking, I am also totally against energy from these old, inefficient coal plants that are supposedly going to be closed if we - the taxpayer & ^(energy) power buyer don't bail them out. If we bail First Energy out - we will be taking "2 steps" back for finding & using more renewable energy sources such as wind & solar. Please do not support this bailout & on another note, please do not support ^{companies} extracting natural gas via breaking up shale rock ^(fracking) with our good clean water → thereby ruining our water worse than it already is with dirty coal plants. Please invest in the future = solar & wind!

Thank you,

Megan Pirman & Ryan Doan.

Re: Case number 14-1297-EL-SSO

1619 Winchester rd

To Whom it May Concern,

The use of coal to generate electricity is both incredibly harmful and wholly unnecessary. The extraction of coal does irreparable damage to the environment and is detrimental to the lives of people in areas where coal is extracted. Coal-fired power plants greatly reduce air quality and significantly contribute to climate change. The continued use of coal is simply inexcusable. Any argument to the contrary is short-sighted and opportunistic. The citizens of Ohio deserve and demand a future characterized by clean, renewable energy and clean, quality air. We owe it to the next generation and the one after that to take steps now to ensure the health of our planet and the people who live on it. Do not be on the wrong side of history.

March 18, 2016

Dear Sirs or Madams:

In regards to FirstEnergy, case number 14-1297-EL-SSO:

I care about my health and the air I breathe. But even more than that, I care about the health of my children and grandchildren.

We need to put our investments in efficient and renewable energy, not spend huge amounts of taxpayers' money in bailing out old, polluting technology like that used by Duke Energy and AEP at their Kyger Creek and Clifty Creek coal plants.

Please start making plans for future generations to have clean air to breathe, instead of putting a band-aid on the current old, dirty coal plants.

Do you have children? Do you have grandchildren? Don't you want the best for their health, and that of millions of other children?

Thank you for your earnest and honest consideration.

Sincerely,
Susan Hughes

March 16, 2016

Dear members of PUCO,

I am writing to you regarding Duke Energy, AEP, and First Energy's proposal (case number 14-1297-EL-SSO) for the bailout of coal plants. These plants are inefficient and outdated, and bailouts only serve to delay the state and country's transition to cleaner forms of energy. While I understand the need to keep citizens of the state of Ohio employed, and the need to keep a healthy tax base with a mix of industries included, I truly feel this is the wrong way to go. Ohio currently has the third-most polluted air in the country, and nothing should be done to continue to support industries that we KNOW contribute mightily to this problem.

Please find some means to support clean energy and new technologies, rather than agree to support bailouts of Ohio's oldest and dirtiest coal plants. These bailouts primarily benefit utility shareholders, and leave taxpayers (who are also utility-bill payers) holding the bag.

Thank you for your attention to my concerns,

PUBLIC UTILITIES COMMISSION OF OHIO

I THINK WE NEED TO INVEST IN NEWER TECHNOLOGIES
FOR ENERGY SO THAT WE CAN HAVE A GREENER FUTURE.

WILEY KYLE S

Dear PUCO,

3/10/2016

My name is Bob Fleming and I am writing this letter in regard to FirstEnergy Case number 14-1297-EL-SSO. In particular, I am concerned about being "locked-in" on specific energy rates as dictated by Public Utilities Commission of Ohio. I feel that the First Energy bailout would perpetuate not only control over commercial, but residential consumers like myself in regards to energy selection. Consumers should be free to have a choice of who they use as an energy provider. I am happy that energy companies have continued to be more efficient and less of a burden on our environment but we have a long way to go. Many developed countries are much more resourceful with greener energy alternatives and cleaner countries. Renewable, and efficient energy is the undeniable future and I urge you to be at the forefront of this effort and be proactive rather than reactive to the inevitable. Immediate, short-term profits cannot be our objectives for all of our long-term prosperity. Please do not bail out these energy inefficient companies, but rather consider the deregulation of big business to offer the best prices and competitive efforts towards a cleaner country and world.

Sincerest,

Bob Fleming
