Implementation Guideline

Electronic **D**ata **I**nterchange

TRANSACTION SET

820 Payment/Remittance Ver/Rel 004010

Summary of Changes

Version 1.0.0 May 1, 2001	Initial Release
Version 1.5.0 May 1, 2001	 Clarify descriptions on RMR05 (discount) and RMR06 (original 810 amount prior to taking the negotiated discount) on the 820 per Change Control 1. Remove the Summary pages (usually pages 2 and 3) from the implementation guides. These pages are automatically created by Foresight, but the last round of changes to the documents was done in Word and has not been updated in Foresight per Change Control 22.
Version 2.0.0 December 31, 2001	• Reverse the RMR05 and RMR06, which had been transposed. The IG showed the RMR05 as the negotiated discount and the RMR06 as the Original Invoice amount. We inadvertently had these reversed. The RMR05 should be the Original Invoice amount and the RMR06 should be the negotiated discount
Version 2.1.0 June 30, 2002	 Correct Gray Box in the 820 in the RMR04 field to show "If purchasing receivables, RMR05 – RMR06 should equal RMR04". The gray box had the incorrect formula of RMR06 - RMR05. Per Change Control 43. Added text to title on N1 pages to show which N1 per change control 50 Updated RMR01 gray boxes to show SDID per change control 51
Version 2.2.0 October 1, 2005	No Changes
Version 2.3.0 March 9, 2010	• During 3/3/10 meeting, the OSPO Data Working Group reviewed & confirmed EDI change controls up to and including CC67. All changes in the v2.2.0 redline were accepted and v2.3.0 created as the new baseline for Ohio.
Version 2.4.0 February 14, 2012	 Incorporated AEP's administrative changes as per EDI Change Control 70. Added new RMR03 code 'PR' and clarified code descriptions as per EDI Change Control 73 Incorporated First Energy's administrative changes as per EDI Change Control 81.
Version 2.5.0 February 15, 2013	• Clarified use of the REF*60 in the Gray box statements as per EDI Change Control 92.
Version 2.6.0 March 24, 2014	• Incorporated Change Control 99 – add DTM*809 to the RMR loop.

820 Payment Order/Remittance Advice

Functional Group ID=**RA**

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Payment Order/Remittance Advice Transaction Set (820) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to make a payment, send a remittance advice, or make a payment and send a remittance advice. This transaction set can be an order to a financial institution to make a payment to a payee. It can also be a remittance advice identifying the detail needed to perform cash application to the payee's accounts receivable system. The remittance advice can go directly from payer to payee, through a financial institution, or through a third party agent.

Transaction Set Notes

1. The ENT loop is for vendor or consumer third party consolidated payments.

Transaction Set Comments

- 1. The TRN segment is used to uniquely identify a payment order/remittance advice.
- 2. The N1 loop allows for name/address information for the payer and payee which would be utilized to address remittance(s) for delivery.
- **3.** The N1 loop allows for name/address information for the payer and payee which would be utilized to address remittance(s) for delivery.
- 4. ENT09 may contain the payee's accounts receivable customer number.
- 5. Loop RMR is for open items being referenced or for payment on account.

BPR Beginning Segment for Payment Order/Remittance Advice

Segment:	BPR Beginning Segment for Payment Order/Remittance Advice
Position: Loop:	020
Level:	Heading
Usage:	Mandatory
Max Use:	1
Purpose:	To indicate the beginning of a Payment Order/Remittance Advice Transaction Set and
	total payment amount, or to enable related transfer of funds and/or information from
Conton Noton	payer to payee to occur
Syntax Notes:	 If either BPR06 or BPR07 is present, then the other is required. If BPR08 is present, then BPR09 is required.
	3 If either BPR12 or BPR13 is present, then the other is required.
	4 If BPR14 is present, then BPR15 is required.
	5 If either BPR18 or BPR19 is present, then the other is required.
	6 If BPR20 is present, then BPR21 is required.
Semantic Notes:	1 BPR02 specifies the payment amount.
	2 When using this transaction set to initiate a payment, all or some of BPR06 through
	BPR16 may be required, depending on the conventions of the specific financial
	channel being used. BPR06 and BPR07 relate to the originating depository financial institution (ODFI).
	3 BPR08 is a code identifying the type of bank account or other financial asset.
	4 BPR09 is the account of the company originating the payment. This account may be
	debited or credited depending on the type of payment order.
	5 BPR12 and BPR13 relate to the receiving depository financial institution (RDFI).
	6 BPR14 is a code identifying the type of bank account or other financial asset.
	7 BPR15 is the account number of the receiving company to be debited or credited
	with the payment order.
	8 BPR16 is the date the originating company intends for the transaction to be settled (i.e. Payment Effective Deta)
	(i.e., Payment Effective Date).9 BPR17 is a code identifying the business reason for this payment.
	10 BPR18, BPR19, BPR20 and BPR21, if used, identify a third bank identification
	number and account to be used for return items only.
	11 BPR20 is a code identifying the type of bank account or other financial asset.
Comments:	
Notes:	The 820 payment instruction and remittance advice will be sent on a daily basis and will
	include all applicable adjustments as outlined in the guides as long as the adjustments are
	not larger than the payments. If the adjustments are larger than the payments (creating a negative remittance advice), the remittance advice will be held by the sender for one
	business day with the expectation that additional payments due the next business day will
	offset the negative remittance amount.
	\mathcal{C}
	If the negative remittance cannot be offset in one business day, the payer will contact the
	payee and arrange for the adjustment(s) causing the negative condition to be repaid to the
	payer. The payer will remove the negative adjustment(s) from the remittance advice,
	bring the remittance advice to a positive status and transmit the remittance advice to the
	payee.
	Specific qualifiers used in data elements BPR01, BPR03, BPR04 and BPR05 need to be
	discussed and agreed upon between the originator and the originator's financial institution
	prior to using the transaction. In addition to testing with your trading partner, you must
	allow sufficient time to test with your bank. Most banks require setup/lead time to
	implement new trading partners. It is recommended that all new trading partners
	send/receive a prenote in advance of moving live payments.
	For CTX payments and remittance details that travel together, these items may or may not be required by your back. Different backs have different requirements related to the
	not be required by your bank. Different banks have different requirements related to the BPR elements. Your relationship with your bank will be the deciding factor on what
	information you will send and receive.
	BPR01, BPR02, BPR03, BPR04 and BPR16 are Required. The other BPR elements may

be sent when sending the 820 through the banking system. It is important that confidential information, such as bank account numbers, NOT be sent when the remittance is being sent separately.

TRN Tra

Segment:	TRN Trace
Position:	035
Loop:	
Level:	Heading
Usage:	Optional
Max Use:	1
Purpose:	To uniquely identify a transaction to an application
Syntax Notes:	
Semantic Notes:	1 TRN02 provides unique identification for the transaction.
	2 TRN03 identifies an organization.
	3 TRN04 identifies a further subdivision within the organization.
Comments:	
Notes:	Trace numbers will only contain uppercase letters (A to Z) and digits (0 to 9). Note that punctuation (spaces, dashes, etc.) must be excluded, and leading and trailing zeros that are part of the Trace number must be present.
	This segment will be used to generate the addenda record that accompanies the dollars when only remittance information is sent.
	Note: Using "OSPO" as the beginning value for TRN021 is a recommendation. It is not a requirement, but it is felt it would help to minimize confusion with other types of 820 data being transmitted. Required
	TRN~3~OSPO7913

Segments	ENT Entity
Segment:	
Position:	
Loop:	ENT Optional
Level:	Detail
Usage:	Optional
Max Use:	1
Purpose:	To designate the entities which are parties to a transaction and specify a reference meaningful to those entities
Syntax Notes:	1 If any of ENT02 ENT03 or ENT04 is present, then all are required.
•	2 If any of ENT05 ENT06 or ENT07 is present, then all are required.
	3 If either ENT08 or ENT09 is present, then the other is required.
Semantic Notes:	
Comments:	1 This segment allows for the grouping of data by entity/entities at or within a
	 master/masters. A master (e.g., an organization) can be comprised of numerous subgroups (e.g., entities). This master may send grouped data to another master (e.g., an organization) which is comprised of one or more entities. Groupings are as follows: (1) Single/Single: Only ENT01 is necessary, because there is a single entity (the sending master) communicating with a single entity (the receiving master). (2) Single/Multiple: ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master. The sending master is a single entity, so no other data elements need be used. (3) Multiple/Single: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. The receiving master is a single entity, so no other data elements need be used. (4) Multiple/Multiple: ENT02, ENT03, and ENT04 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the sending master. ENT05, ENT06, and ENT07 would be used to identify the entities within the receiving master.
