

The Ohio Power Sitting Board

Case # 16-253-GA-BTX

April 21, 2016

Gentlemen,

PUCO

RECEIVED-DOCKING DIV.
2016 APR 28 PM 12:27

One of the three options for the Central Corridor Pipeline Extension goes directly through my rear yard which is bordered by Ronald Reagan Highway. My rear yard has like a park with many very large, 75 year old mature trees and very large bushes completely blocking my view of automobile traffic.

In addition I built two large gardens midway through my rear yard.

I obviously would have a very difficult time selling the house with this project pending. And if this option were selected and the pipeline constructed on the property it would cause a real problem in trying to sell the property.

There would be no easy way for construction equipment to access my property without doing considerable damage which could never be restored to its present condition.

Therefore I respectfully request
that you select a different option
for the pipeline extension than one which
places it directly on my property.

Sincerely

James J. Mayer
