Subject: New Gas Pipeline 16-253-GA-BTX

Plans to extend a new natural gas pipeline through Hamilton County seems like a good and necessary idea. Routing it through residential areas is more problematic. Bluewing Terrace is one proposed route and I and my neighbors are alarmed at seeing it as disruptive in both the short term construction phase and the long term impact to our properties. Public rights of way already established surely would be preferable to slashing through established residential properties for routing these pipes.

We are hoping these early recommendations by Duke and OPSB will lead to a respect for our property values and an understanding of the invasive nature of the plan. There are about 100 feet of woods between my rear property line and the UC Blue Ash's parking lot. Will this disappear?
