COMPLAINT DESCRIPTION:

PUCO members, PLEASE reconsider the temporary rates you recently approved for the electric companies, and rescind the approval. We all know Temporary turns into permanent. Many of us have not had ANY sort of income increase, as, seniors (very fixed income); lower paid workers, as many good paying family-providing jobs have left the state/country. We are out here also paying the bills, essentially, for the very low income on aid. I don't know your income, but I'll bet you are very well paid and don't have to worry about a few bucks added to your bill for the

next eight years. I personally have tried everything I can to lower my own bill, but for a company as First Energy to bill us for improvements INSTEAD of using THEIR PROFITS first is highly immoral, just wrong, as many things are in the last 7+ years. (as, a president trying to shut down clean burning coal companies). When you need extra cash for a home improvement, did you use all your (tax- deferred) savings first? Probably not. You likely got an home equity line of credit. That's what the electric company is doing, taking my money instead of using their own. CEO's and board of directions, stockholders aren't penalized but we, out here, are. So, recently I heard the Chair (?) of PUCO is quitting. Why? Because of pressure about this decision? I'm not an attorney, but an average, down to earth citizen with COMMON SENSE. How about quit siding with the elite, the large companies, and instead of doing what's right for so many others.
