COMMENT DESCRIPTION:

Re: Case Number 16-0253-GA-BTX : Duke Central Corridor Extension Gas Pipeline Dear Sir: I would urge you in the strongest terms not to grant approval to this project that Duke has proposed to run a high pressure pipeline through well-established residential neighborhoods including ours. The proposed pipelines have a number of deleterious effects on quality of life, safety and property, including real risks that cannot be mitigated. We received a letter from Duke that the pipeline was planned to run through our neighborhood in Amberley Village. From the high level sketch, it would seem that this would be adjacent or very close to our residence. This is a vibrant a close knit community and the disruption of putting in a pipeline, not to mention the permanently ongoing risk that it entails would be disastrous. Duke is still in the planning stage of this project that they're possibly going to try and fast track. I would again strongly urge you to execute your responsibilities in the interests of the people of Ohio, and responsible stewardship to encourage Duke Energy (a private enterprise) to explore other alternatives. Sincerely, Dr Ash Agrawal
