COMMENT DESCRIPTION:

This comment is in reference to Case No. 16-253-GA-BTX. I just received a letter from Duke Energy, dated May 24, 2016, with the revised three routes for the 30" compressed pressure transmission gas line. I am on the "pink route." Based on the proximity of my home to Ridge Rd. and the location of the easement on my property, that would place this dangerous gas line 19 feet from my front door. This same route goes extremely close to three temples and a community

center. In fact, all three routes go through heavily populated areas. It is beyond belief, that the powers that be at Duke Energy, have chosen such highly populated areas to place this pipeline. I urge you to force Duke Energy to eliminate all three of these dangerous routes and come up with alternative routes in a more rural area where so many lives would not be put in danger if there were to be a catastrophic accident. Sincerely, Carrie Lipps
