**Subject:** 16-0253-GA-BTX - Proposed Pipeline Through Blue Ash, OH

I just learned of Duke Energy's plan to put a natural gas pipeline through my community (Blue Ash, OH). I'm sincerely shocked that the project got this far without *any* information being provided to impacted residents.

The reason I have loved northeast Hamilton County is because it has been such a safe and secure place to raise my family. This pipeline has the potential to shatter that feeling, not to mention absolutely devastate property values. As far as resale, it won't matter how safe it is alleged to be. There have been enough catastrophes in the news to make prospective buyers run the other way. It won't take long for a community of choice to deteriorate.

Surely there are more rural or industrial areas that would be safer for such a project than a highly populated residential community. What a betrayal of trust by our government. Please let me know what we can do, with your help, to avoid this threat to our health and homes.
