Subject: proposed pipeline through Blue Ash

To Whom It May Concern:

We are writing to oppose any of the proposed pipeline routes through Blue Ash. They go through highly populated areas with private residences, schools, churches, recreation centers, businesses, daycare centers, health care centers, schools, and parks with high volume use, putting the community at risk and destroying private property in the process. The risk is too great and puts these areas of the proposed routes in jeopardy. In particular, the route that is proposed along Plainfield and Cooper roads will directly impact our home on Falling Brook in Carpenters Run as we are located at the corner of Carpenters Run and Cooper.

As we look at a map of the Cincinnati area through which these 3 routes are proposed, we notice that to the east, toward Indian Hill and Indian Hill, which is sparsely populated and has large areas of open space, there is not one proposed route. It would seem that there would be less impact on all aspects of concern including ie businesses (there are none in Indian Hill, other than 2 churches), if the pipeline were to go through the eastern part of Cincinnati.

The best solution is to keep the pipeline outside the I-275 perimeter.

We hope very serious consideration is being made to find an alternate route outside of the Blue Ash area.

Sincerely,

Leslie and Mark Handler, concerned citizens

Subject: proposed pipeline through Blue Ash Case # 16-0253-GA-BTX

To whom It May Concern:

We are resubmitting our letter of opposition to the proposed pipeline through Blue Ash and surrounding communities. It is irresponsible of Duke Energy to ever consider such plans, putting many communities at risk. The routes proposed, go through highly populated areas with private residences, schools,

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

PUCO

daycare centers, businesses, hospitals, churches, synagogues and other religious organizations, recreation centers, health care centers, schools, parks with high volume usage.

To consider these routes because of cost savings , and not consider the ultimate cost of the pipeline being damaged is short-sighted. The damage would be catastrophic in these densely populated areas.

The pipeline needs to be located in rural areas, outside the I-275 perimeter. Looking at the map of Cincinnati, it is interesting to see that the least densely populated area, on the east side, Indian Hill, has no proposed pipeline. We do not believe the pipeline should go through this area either. Why would Duke ever consider the densely populated routes they have chosen, if not for the immediate bottomline?! Lives and property are at stake.

One proposed route along Plainfield and Cooper roads, directly impacts our home which is located at the corner of Carpenters Run and Cooper.

Please give serious consideration to our and others opposition to the proposed pipeline routes.

Sincerely,

Leslie and Mark Handler, concerned citizens

COMMENTS: We wish to oppose the proposed pipeline routes through our community of Blue Ash and other surrounding communities. It is irresponsible and reckless of Duke to consider such a risky venture through these highly/densely populated areas which include but not limited to schools,hospitals, private homes, businesses, high usage parks,religious buildings, daycare centers, health care centers, shopping centers and so on. we cannot state our concerns and opposition strongly enough!!

Find another route, preferably outside the I-275 perimeter in rural areas where the impact is far less.

Leslie and Mark Handler
