OPSB Case Number 16-0253-GA-BTX

We are AGAINST the Pipeline Extension going through Evendale, Ohio, and feel very strongly that it should go outside the 275 beltway, through less densely populated rural areas.

Since we live very close to one of the routes, we are concerned for our safety should it explode, since some of them do. It's already disrupting our neighborhood, since several neighbors have put their homes up for sale immediately upon hearing the news.

The Evendale route would pass close to schools, churches, medical buildings, businesses as well as many well established neighborhoods

One of the main routes to Bethesda Hospital is Glendale Milford Road, which would be affected by tearing up part of the road, and lane closures which would result in huge traffic backups for cars trying to get to 71, 75 and the hospital.

Old growth trees and landscapes would be destroyed. Mature trees are what makes this area so desirable.

Our property values will decline and our insurance will go up, making it harder to eventually sell our homes for a fair price. No one will want to live near a known safety hazard.

It's not even benefiting us. If it must be built, please locate it in a less densely populated, rural area, outside the 275 beltway.

A Concerned Evendale Resident,

Judy Stockmeier
